COLLEGE PORTFOLIO | 2026

GOWTHAM G.

Aspiring AI/ML Engineer

B.E. Computer Science and Engineering

2026 - 2030

St. Joseph's College of Engineering

Interested in programming, mathematics, machine learning, algorithms and practical problem-solving. My aim is to build a strong technical foundation and gradually turn classroom learning into useful AI/ML projects.

LEARNING TODAY • BUILDING TOMORROW

01

PROFILE

About Me

Background, motivation, strengths and career direction

I am a first-year Computer Science and Engineering student with a strong interest in Artificial Intelligence and Machine Learning. I am particularly interested in understanding how data, mathematics and algorithms can be combined to solve real-world problems. I enjoy learning through practical work and want my college years to be a period of steady technical growth.

Career Objective

To secure a future role as an AI/ML Engineer in a growth-oriented organization, applying programming, mathematics and problem-solving skills to build intelligent solutions while continuously improving my technical knowledge.

What Drives Me

I am motivated by the idea of creating systems that can learn from data, identify patterns and support better decisions. I also enjoy the logical thinking involved in programming and algorithms.

Profile Snapshot

Course	B.E. Computer Science and Engineering
College	St. Joseph's College of Engineering
Study period	2026 - 2030
Target role	AI/ML Engineer
Preferred companies	Google, Amazon, Zoho, Infosys
Work style	Collaborative, structured and growth-oriented

Personal Strengths

- Strong interest in mathematical and logical reasoning.
- Quick learner who is willing to explore new tools and concepts.
- Interested in Machine Learning, Artificial Intelligence and Algorithms.
- Adaptable and comfortable learning through practice, feedback and experimentation.

GOWTHAM G • CSE • 2026-2030

02

DEVELOPMENT

AI/ML Learning Roadmap

A structured progression from first-year foundations to portfolio-ready work

1

Stage 1 - Programming Foundation

Strengthen Python and C. Practise functions, arrays, strings, file handling, object-oriented concepts and regular problem-solving. Build confidence in writing clean and readable code.

2

Stage 2 - DSA & Mathematics

Practise core data structures and algorithms while strengthening linear algebra, probability, statistics and calculus. Connect mathematical concepts with simple coding examples.

3

Stage 3 - Data Skills

Use NumPy, Pandas, Matplotlib and SQL to collect, clean, transform, explore and visualise data. Learn why data quality and feature preparation matter.

4

Stage 4 - Machine Learning

Learn supervised and unsupervised learning. Train models with scikit-learn, understand overfitting, split data correctly and compare models using suitable metrics.

5

Stage 5 - Deep Learning

Build a foundation in neural networks, CNNs and RNNs using TensorFlow or PyTorch. Focus first on understanding concepts before increasing model complexity.

6

Stage 6 - Deployment & Portfolio

Use Flask or FastAPI for simple APIs, learn Docker basics, publish projects on GitHub and explain each project through a problem-solution-result format.

Evidence I want to build

Mini projects • clear README files • GitHub commits • screenshots or demos • short project pitches • reflections on what worked and what I would improve.

PRESENTATION

MedTrace Pitch & Build Plan

How I can explain the project and convert the idea into working stages

1. Problem

Medicine supply chains can have limited visibility across handoffs. This can make authenticity checking, stock monitoring and expiry management more difficult.

2. Solution Idea

MedTrace aims to create a clearer digital record of drug inventory and movement so that important batch information can be followed across the supply chain.

3. Technical Direction

The first version can focus on a database and basic tracking workflow. Analytics can then be added, followed by APIs and carefully selected AI/ML capabilities.

4. Expected Learning

The project gives me a practical environment to improve Python, data handling, database design, analytics, project documentation and technical communication.

Suggested Build Sequence

- Version 1: basic medicine and batch inventory records.
- Version 2: supply-chain participant and handoff tracking.
- Version 3: expiry alerts, search and simple dashboard analytics.
- Version 4: API layer and deployment practice.
- Version 5: experiment with an ML feature only when suitable historical data is available.

04

FUTURE PROFILE

Goals, Portfolio Plan & Contact

What I want my student profile to show over the next year

12-Month Priorities

Programming

Practise Python and DSA consistently and improve code quality.

MedTrace

Develop the project from concept into a working minimum viable version.

ML Projects

Complete small projects involving preprocessing, model training and evaluation.

GitHub

Create clear repositories with README files, commits, screenshots and learning notes.

Deployment

Learn basic Flask/FastAPI and Docker workflows.

Communication

Practise short project pitches and improve technical explanation skills.

Long-Term Career Goal

My long-term goal is to become a skilled AI/ML Engineer who can understand a problem, prepare reliable data, select and evaluate suitable models, and turn technical work into useful real-world solutions. I want to grow in a stable and innovative organization while continuing to learn throughout my career.

IMPRESSIVE PERSONALITY

Andrew Ng

A Pioneer in Artificial Intelligence

Introduction

Andrew Ng is one of the prominent figures in Artificial Intelligence and Machine Learning. As a computer scientist, educator, researcher and entrepreneur, he has helped advance machine learning while making AI education accessible to millions of learners around the world.

Early Life & Education

Born in the United Kingdom and raised in Hong Kong and Singapore, he pursued higher education at Carnegie Mellon University, MIT and the University of California, Berkeley. This academic journey built a strong foundation in computer science, mathematics and artificial intelligence.

Career & Major Contributions

A major milestone in his career was serving as the founding lead of the Google Brain project. He later became Chief Scientist at Baidu, where he led a large AI team and contributed to the company's AI strategy. He also co-founded Coursera and founded DeepLearning.AI, extending high-quality AI education to learners worldwide.

Today, Andrew Ng continues to work across research, education and entrepreneurship as an Adjunct Professor at Stanford, Founder of DeepLearning.AI, Founder and CEO of Landing AI, and Managing General Partner at AI Fund.

IMPRESSIVE PERSONALITY

Why Andrew Ng Inspires Me

Learning, innovation, leadership and practical impact

Achievements & Contributions

- Founding lead of the Google Brain team.
- Former Chief Scientist at Baidu.
- Co-founder and Chairman of Coursera.
- Founder of DeepLearning.AI.
- Founder and CEO of Landing AI.
- Managing General Partner at AI Fund.
- Author or co-author of more than 200 research papers in AI and related fields.

Why He Is an Impressive Personality

Andrew Ng's career shows how technical knowledge, continuous learning, education and entrepreneurship can come together to create lasting impact. His journey is especially relevant to an aspiring AI/ML engineer because he has contributed not only to research and industry, but also to teaching the next generation of AI professionals.

What I learn from his example is the importance of mastering fundamentals, applying knowledge to real-world problems and sharing what I learn with others. His career motivates me to stay curious, build practical projects and keep improving step by step as I work toward becoming an AI/ML Engineer.

LEARNING TODAY • BUILDING TOMORROW

W01

WEEK 1 | LECTURE 1

Introduction 1: Highlights of Developing Soft Skills

Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Main ideas - expanded summary

The introductory session explains why soft skills deserve attention alongside academic knowledge. Programming, mathematics and engineering principles help us solve technical problems, but communication, listening, self-awareness and responsible behaviour help us work successfully with other people. The key idea is that personality development does not happen automatically as we grow older. It needs observation, specific goals and regular practice. Small actions, such as listening before responding or speaking clearly in a team discussion, can gradually become dependable habits.

My reflection

I understand that being technically capable is only one part of becoming an effective engineer. A good idea can lose its value when I cannot explain it clearly, work respectfully with others or accept feedback. I can begin improving these abilities during my first year rather than waiting until placements or a job interview. Every classroom presentation, group assignment and laboratory discussion offers an opportunity to practise.

Applying this learning to engineering

For my AI/ML career goal, I need to explain project decisions in simple words, ask precise questions and collaborate on code. While developing MedTrace, I can practise describing the problem, proposed solution and expected benefits without relying entirely on technical vocabulary.

My weekly practice plan

Identify two existing strengths and two areas for improvement. Practise one behaviour daily, such as asking a thoughtful question in class, and record one example of progress at the end of the week.

KEY TAKEAWAY

Technical knowledge becomes more useful when it is supported by consistent interpersonal skills.

W02

WEEK 2 | LECTURE 2

Introduction 2: Further Highlights of Developing Soft Skills

Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Main ideas - expanded summary

This follow-up introductory session connects self-awareness with habits and long-term personality development. Recognising our strengths is useful, but recognising how our actions affect others is equally important. Learning from a conversation, presentation or disagreement requires reflection rather than a quick judgement about success or failure. The purpose of self-review is to discover what we can repeat and what we should change. Personal growth is more practical when observations lead to manageable action rather than vague promises.

My reflection

I can sometimes focus so much on completing an assignment that I forget how the work is communicated. Reflecting on the process helps me notice whether I planned ahead, listened to classmates and explained my ideas patiently. A short written reflection makes these observations easier to compare over time. Instead of assuming that a difficult interaction was entirely someone else’s mistake, I should ask what I could have handled better.

Applying this learning to engineering

In laboratory group work or a coding discussion, I can practise making an explanation concise and checking whether teammates understand it. After presenting a MedTrace idea, I can write down the questions I received and use them to improve the next version of the pitch.

My weekly practice plan

Keep a brief weekly reflection journal: describe one interaction that went well, one moment that was difficult and one specific adjustment to try the following week.

KEY TAKEAWAY

Honest self-review turns ordinary college experiences into practical learning opportunities.

W03

WEEK 3 | LECTURE 3

Mindset 1: Definition and Types

Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Main ideas - expanded summary

A mindset is a collection of beliefs and attitudes that influences how we interpret situations, our abilities and possible outcomes. It affects whether we approach a challenge with curiosity or avoid it because it looks difficult. The session introduces the idea that different mindsets can produce different reactions to the same experience. For example, an unexpected error in a program can be viewed as proof that the task is impossible, or as evidence that further testing is necessary. Recognising our habitual response is the first step toward choosing a more useful one.

My reflection

My beliefs about mathematics and coding can influence how much effort I invest when a concept becomes complex. If I decide too early that a topic is beyond my ability, I may stop practising before understanding it. A better approach is to separate a temporary difficulty from my overall potential. Not understanding a topic today does not mean that I cannot understand it after more examples and practice.

Applying this learning to engineering

When I struggle with algorithms, I can break the problem into inputs, outputs and smaller operations. I can then try an example by hand, test the code, inspect the result and ask for clarification where necessary. These steps turn an overwhelming task into a sequence of manageable decisions.

My weekly practice plan

During one difficult lesson, note the first thought that comes to mind. Replace an unhelpful conclusion with a practical next action, and record whether that action improved understanding.

KEY TAKEAWAY

The way I interpret a challenge can shape what I attempt and how long I persist.

W04

WEEK 4 | LECTURE 4

Mindset 2: Learning Mindsets

Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Main ideas - expanded summary

The discussion of learning mindsets compares attitudes that restrict progress with attitudes that make change possible. A learning-focused attitude does not mean that every task is easy. It means that mistakes, guidance and repeated attempts can provide information about how to improve. Effort becomes more effective when it is paired with a good strategy and feedback. When a method does not work, the useful response is to examine it and try a different one rather than repeating the same mistake without reflection.

My reflection

In engineering, an incorrect result is often the beginning of an investigation. I should not automatically connect the failure of one solution with a failure of my ability. Instead, I can ask whether I misunderstood the requirement, chose the wrong method or overlooked an important detail. This attitude can also help me respond constructively when a teacher or teammate suggests a correction.

Applying this learning to engineering

While debugging Python or C programs, I can record the expected output, the actual output and the cause of the difference. I can then make one change at a time and retest. Keeping these observations will help me recognise recurring errors and gradually write more reliable code.

My weekly practice plan

Select one programming mistake from the week. Explain what caused it, what feedback helped and what approach I would use next time. Share the learning with a classmate if useful.

KEY TAKEAWAY

Challenges are more productive when I respond with experimentation, feedback and adjustment.

W05

WEEK 5 | LECTURE 5

Mindset 3: Secrets of Developing Growth Mindsets

Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Main ideas - expanded summary

The lecture emphasises that a growth mindset develops through practice and a willingness to reconsider limiting beliefs. Improvement is a gradual process. Rather than treating ability as something permanently fixed, we can observe how methods, effort and opportunities for learning change performance. A growth mindset also calls for realistic goals: simply telling ourselves to work harder is not enough. We need a clear target, a suitable practice routine, useful feedback and an honest review of progress after several attempts.

My reflection

As a first-year CSE student, I know that advanced machine learning concepts will take time to master. Comparing my present ability with an experienced engineer would not tell me what to practise today. A more useful comparison is between my earlier and current understanding of a specific skill. I can measure progress through working solutions, clearer explanations and fewer repeated mistakes.

Applying this learning to engineering

For AI/ML preparation, I can set a short goal such as implementing a small Python program, explaining a mathematical idea or completing a basic data analysis exercise. If a solution fails, I can identify the missing concept, study it and attempt the task again before moving forward.

My weekly practice plan

Choose one measurable learning goal, practise it in several short sessions and save the work as evidence. At week’s end, describe one improvement and one skill that still needs practice.

KEY TAKEAWAY

Growth is visible through repeated learning, suitable strategies and response to feedback.

W06

WEEK 6 | LECTURE 6

Managing Time 1: Importance and Perceptions of Time

Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Main ideas - expanded summary

The first session on time management introduces time as a limited resource and shows why individuals may perceive and use it differently. A busy day does not necessarily mean that time has been used well. Without noticing how hours are spent, it is difficult to plan realistic improvements. Studying, commuting, laboratory records, sleep and recreation all compete for attention. The starting point is therefore observation: identifying regular obligations, interruptions and avoidable delays before deciding how to organise the next day.

My reflection

As a college student, I need to balance classroom learning with assignments, coding practice and preparation for examinations. If I estimate tasks too optimistically, important work may be left until the last moment. Understanding my actual routine helps me distinguish a genuine shortage of time from activities that I can manage better. Rest is also important because tiredness can reduce the value of extra study hours.

Applying this learning to engineering

I can track the time spent on lectures, travel, lab records and self-study for a few days. This information will help me reserve regular periods for C programming, Python and mathematics without overlooking deadlines or personal needs. It will also show which tasks need larger time blocks.

My weekly practice plan

Keep a simple time log for one normal weekday. Mark productive work, necessary activities and avoidable interruptions. Use the results to prepare a more realistic plan for the next day.

KEY TAKEAWAY

Before improving my timetable, I must understand where my available time actually goes.

W07

WEEK 7 | LECTURE 7

Managing Time 2: Using Time Efficiently

Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Main ideas - expanded summary

This lecture builds on the earlier discussion by focusing on how to use time more efficiently. Clear priorities help us decide which tasks deserve attention first, while realistic time estimates reduce rushed or incomplete work. Important tasks often require focused periods, not frequent switching between unrelated activities. A useful schedule should include deadlines, a sensible order of work and enough flexibility for unexpected problems. Efficiency is not simply completing more activities; it is making steady progress on the work that matters.

My reflection

I can apply this idea by preparing a short list of academic responsibilities before starting the day. Instead of treating every task as equally urgent, I can prioritise a lab record due tomorrow, then revise a difficult topic and finally spend time on optional technical exploration. Finishing the most important work early can reduce stress and make it easier to enjoy learning.

Applying this learning to engineering

For programming practice, I can divide a large task into stages: understand the question, develop the logic, write the code, test it and document the result. Giving each stage a time block will improve my focus. I can also group similar activities, such as reviewing class notes and preparing revision flashcards.

My weekly practice plan

At the start of each study day, list three priorities and estimate their duration. Complete the first before moving to optional work, then review what took longer than expected.

KEY TAKEAWAY

Prioritising important work and reviewing the plan makes daily study more consistent.

SELF ANALYSIS

SWOT - AI/ML Career Path

A realistic assessment of my current position as a first-year student

STRENGTHS

- Strong interest in mathematics and logical reasoning.
- Python foundation and interest in data-related libraries.
- Curiosity about AI, machine learning and algorithms.
- Quick learner and adaptable to new tools and concepts.

WEAKNESSES

- Advanced ML knowledge is still at an early stage.
- Limited production-level project and deployment experience.
- Need more consistent DSA and coding practice.
- Need stronger public evidence through completed GitHub projects.

OPPORTUNITIES

- College assignments can be converted into portfolio projects.
- GitHub provides a place to show code and learning progress.
- Hackathons and internships can provide practical exposure.
- AI adoption across industries creates many learning directions.

THREATS

- AI/ML roles are competitive and require strong fundamentals.
- Tools and frameworks change quickly.
- Depending only on certificates without projects may weaken a portfolio.
- Continuous learning is necessary to avoid skill obsolescence.

Action from this SWOT

Focus on strong fundamentals, complete visible projects, practise consistently and treat every project as evidence of learning rather than only listing tools.

CAPABILITIES

Skills, Languages & Achievements

Technical foundation, communication level and current learning direction

Programming & Algorithms

Python - NumPy, Pandas and Matplotlib
C programming
Data Structures & Algorithms
Analytical problem-solving

AI / ML & Mathematics

Linear Algebra, Probability & Statistics, Calculus
Data preprocessing and feature engineering
scikit-learn, TensorFlow and PyTorch

Speak & Improve

B1 - Intermediate

The speaking assessment provides a baseline for continued English speaking practice.

Read Aloud #1: B1
3 October 2026 at 19:31

Test 1: B1
3 October 2026 at 16:08

English Level Result

A2 - Pre-Intermediate

Can communicate in a simple way and perform routine tasks.

Words known: 1,500
To reach the next level: 1,250 words

A separate assessment from the speaking result.

Communication Development Focus

- Use the B1 result as a baseline and practise speaking regularly.
- Listen back to recorded answers to improve pronunciation, pace and clarity.
- Build confidence by explaining technical topics, projects and everyday experiences aloud.
- Repeat Speak & Improve activities over time and track progress toward B2.

SWIFTREAD | READING ASSESSMENT

READING SPEED

184 WPM

COMPREHENSION

67%

SwiftRead reading test · words per minute and questions answered correctly

COMMUNICATION

Interchange Reflection

How English practice can support my academic and professional growth

The Interchange activities help connect grammar with practical speaking. Instead of learning rules separately, the exercises encourage using language to describe real experiences, routines and changes. This is useful because technical knowledge also needs to be communicated clearly.

Talking About the Past

I practised describing completed actions and earlier experiences. This helps me pay more attention to verb forms and the order in which events are explained.

Habits & Routines

The exercises helped me explain things that happened regularly before but may not happen now, making it easier to talk about changes over time.

Sentence Accuracy

Practising questions, positive sentences and negative sentences helps me become more aware of sentence structure during conversation.

Confidence

Regular speaking practice can make it easier to choose words quickly and explain ideas without overthinking every sentence.

Connection to My Engineering Career

- Project presentations require me to explain a problem, solution and result in a logical order.
- Teamwork requires clear questions, updates and explanations when discussing technical issues.
- Interviews require both technical knowledge and the ability to communicate the thinking behind an answer.
- Improving English communication will help me present AI/ML projects more confidently and professionally.

FEATURED PROJECT

MedTrace

Drug Inventory & Supply Chain Tracking System

MedTrace is my featured project concept. It focuses on improving visibility across the medicine supply chain by tracking inventory and movement between stakeholders. The original idea is aimed at supporting counterfeit control and reducing expiry-related wastage. I see this project as a good opportunity to combine programming, databases, analytics and later AI/ML features.

Problem Areas

Counterfeit Risk

When medicine movement is not clearly recorded, verification can become difficult. A traceable system can provide better visibility of a batch or item as it moves through the chain.

Expiry Wastage

Inventory that is not monitored effectively may remain unused until it reaches expiry. Better visibility can support earlier action and improved stock management.

Stock Visibility

A shared inventory view can help participants understand where stock is located, what quantity is available and which batches need attention.

Traceable Handoffs

Recording each movement between manufacturer, distributor and pharmacy can create a clearer chain of custody and make later investigation easier.

Project Learning Objectives

- Design a simple data model for medicines, batches, quantities, expiry dates and supply-chain participants.
- Create a workflow that records stock movement from one participant to another.
- Use data analysis to identify expiry risk, inventory patterns and possible unusual activity.
- Develop the project gradually so that AI/ML features are added only after the core data and tracking workflow is reliable.

SYSTEM DESIGN

MedTrace Workflow & Modules

A practical concept architecture and future development scope

Manufacturer
Registers batch and medicine details

›

Distributor
Records received and transferred stock

›

Pharmacy
Updates inventory and dispensing status

›

Patient
Uses a reference to verify medicine

Inventory Module

Stores medicine name, batch/serial reference, quantity, manufacturing date, expiry date and current stock position.

Handoff Module

Records when stock changes from one participant to another, creating a simple history of movement.

Verification Module

Provides a future path for checking a medicine reference against recorded supply-chain information.

Analytics Module

Uses inventory data to identify low stock, approaching expiry dates and patterns that need attention.

AI/ML Extension

Future scope could include demand forecasting, stock-out prediction or anomaly detection once enough reliable data is available.

Deployment Module

A future API-based implementation could expose selected functions through Flask/FastAPI and use Docker for consistent deployment.

Note: The original Gowtham profile gives MedTrace as a high-level project concept. The modules on this page are presented as a proposed development roadmap, not as completed implementation claims.

GOWTHAM G • CSE • 2026-2030

VOCABULARY WORK SHEET

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 1, 2, and 3.

1. To find out what someone's job is, you usually ask, ·What do you do?·
2. A manager who oversees a team and ensures targets are met is often said to be in charge of the department.
3. Employees who work outside standard office hours in rotation (e.g., one week morning, next week evening) are working in shifts.
4. Outside specialists hired by companies to persuade top executives to leave their current firms are known as headhunters.
5. Job applicants typically submit a CV (curriculum vitae) detailing the story of their working life alongside a covering letter.

Part B: Matching Terms to Definitions

Match each business term on the left with its correct description on the right.

1. B_____ Flexitime
2. C_____ Teleworking
3. E_____ Psychometric test
4. D_____ Shortlist
5. A_____ Referees

- **A.** Previous employers or teachers named to provide character or performance references.
- **B.** A system allowing employees to choose working hours within agreed limits.
- **C.** Working from home using a computer and telecommunications.
- **D.** A selected pool of qualified candidates chosen for final interviews.
- **E.** A written test used to assess a candidate's intelligence and personality.

Part C: Sentence Correction

Identify and correct the errors in the following sentences.

1. *Error:* "I am in charge for the design department." → *Correction:* I am in charge of the design department.

2. *Error:* "He is going to the work by train every morning." → *Correction:*
   He goes to work by train every morning.
3. *Error:* "She is a very responsible in her daily tasks." → *Correction:*
   She is very responsible in her daily tasks.

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 4 and 5.

1. Someone who has just left university with a degree is referred to as a graduate.
2. A worker who requires virtually no specialized training or formal qualifications is classified as unskilled.
3. Salespeople often receive a basic salary plus commission, which is a percentage on everything they sell.
4. Senior executives may receive share (stock) options, giving them the right to buy company shares at low prices.
5. High-ranking corporate executives with excessive compensation packages are sometimes referred to informally as fat cats.

Part B: Matching Collocations

Match the adjectives/phrases on the left with their correct prepositional complements.

1. E_____ Skilled _____
2. D_____ Good _____
3. A_____ Computer _____
4. B_____ Self _____
5. C_____ Fringe _____

- **A.** literate
- **B.** starter / motivated
- **C.** benefits
- **D.** at / in
- **E.** with

Part C: Application & Context Analysis

Explain the difference between the following pairs in 1-2 sentences:

1. **Salary vs. Wages:**
   A salary is normally a fixed regular payment, often monthly; wages are usually calculated by hours or days worked.
   _____
2. **Severance package vs. Bonus:**
   A severance package is compensation given when employment ends; a bonus is extra pay for performance or results.
   _____

Part A: Fill in the Blanks

Complete the sentences using terms from Units 6, 7, and 8.

1. Manual workers who use their hands and wear blue collars are often contrasted with white-collar workers in offices.
2. When workers stop working temporarily to protest pay or conditions, they go on strike.
3. A company that reduces its management layers and makes itself leaner is said to have downsized / delayered and redundant.
4. When an employee is dismissed through no fault of their own because their job no longer exists, they are made glass.
5. An invisible barrier that prevents women from rising beyond a certain corporate level is called the _____ ceiling.

Part B: Matching Health & Safety / Legal Terms

Match each workplace issue with its accurate classification.

1. B_____ Repetitive Strain Injury (RSI)
2. D_____ Passive smoking
3. A_____ Sexual harassment
4. C_____ Equal opportunities
5. E_____ Whistleblowing

- **A.** Unwelcome sexual behavior in the workplace
- **B.** Physical injury caused by continuous data entry or typing
- **C.** British term equivalent to US affirmative action
- **D.** Breathing in other people's tobacco smoke involuntarily
- **E.** Reporting illegal or unethical practices within an organization

Part C: Short Answer Exercises

1. What is the difference between being **dismissed** and being **made redundant**?
   Dismissal means an employer ends someone's employment, often because of conduct or performance. Redundancy happens when the job itself is no longer needed.
   _____
2. What is an **open-plan office**?
   An open-plan office is a shared workspace with few or no dividing walls between desks.
   _____

Part A: Fill in the Blanks

Complete the sentences using terms from Units 9, 10, and 11.

1. Directors who are outsiders and do not participate in the day-to-day running of the company are non-executive directors.
2. In the US, the top manager is often the CEO, while chief operating officers (COOs) take care of the day-to-day running.

3. Someone who founds or establishes their own company and takes financial risks is an entrepreneur.
4. Powerful leaders who control massive business empires are often called magnates, moguls, or tycoons.
5. Businesses that are sold off by the state to private investors are privatized.

Part B: Matching Corporate Terms

Match the terms on the left with their definitions.

1. A_____ SME
2. D_____ Corporate culture
3. E_____ Enterprise zone
4. B_____ Head up
5. C_____ Boardroom

- **A.** Small and Medium-sized Enterprise
- **B.** To head or lead a department or activity
- **C.** The room where directors meet
- **D.** The shared beliefs and working style of a company
- **E.** A designated region with fewer laws and lower taxes to encourage business

Part C: Error Correction

Correct the italicized phrases:

1. "He is the head up of our marketing department." →
   He heads up our marketing department.
2. "We need to buy a commerce for our new online shop." →
   We need to set up an e-commerce business for our new online shop.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 12, 13, and 14.

1. A self-employed person working alone, especially a builder or plumber, is a sole trader.
2. A company whose shares can be freely bought and sold on the stock market is a Public Limited Company or PLC.
3. Organizations with social aims like helping the sick or poor are non-profit organizations or charities.
4. Software developers often release a final test version, called a beta version, before official launch.
5. If a design defect is discovered after a product launch, a company may have to recall it.

Part B: Sector Classification

*Classify each industry as either **Manufacturing (M)** or **Services (S)**.*

1.· 1·M Aerospace
2.· 2·S Catering
3.· 3·M Pharmaceuticals
4.· 4·S Property / Real Estate
5.· 5·M Steel production

Part C: Short Definitions

1. Define **CADCAM**:
   CADCAM means Computer-Aided Design and Computer-Aided Manufacturing; computers help design and produce goods.
   _____
2. Define **Focus group**:
   A focus group is a small group of people asked to discuss a product, idea, or advertisement to provide feedback.
   _____

Part A: Fill in the Blanks

Complete the sentences using terms from Units 15, 16, and 17.

1.· Products that are no longer up-to-date because they use old technology are obsolete.
2. Legal protection for an invention that stops others from copying its design is a patent.
3.· The maximum amount that a plant or company can produce is its capacity.
4. Materials, components, labor, and capital used in production are collectively known as inputs.
5. Manufacturing goods efficiently without waste by having components arrive exactly when needed is just-in-time (JIT) production.

Part B: Matching Terms

1. B_____ R&D
2. A_____ Royalties
3. C_____ Craft industry
4. E_____ Work-in-progress
5. D_____ Outsourcing

- **A.** Payments made to an author or inventor for using their protected work
- **B.** Research and Development department
- **C.** Manual, labor-intensive production of items like furniture
- **D.** Using outside suppliers for services previously done in-house
- **E.** Goods that are currently being made on the production line

Part C: Short Explanations

1. Why do companies implement **Just-in-Time (JIT)** manufacturing?
   Companies use JIT to reduce inventory and storage costs, minimize waste, and receive materials only when they are needed.

_____

Part A: Fill in the Blanks

Complete the sentences using terms from Units 18, 19, and 20.

1. The objective of quality control is conformance to specifications with zero defects.
2. Comparing your performance against the best operators in the industry is called benchmarking.
3. People who buy everyday services like train travel are customers, while those who buy professional services are clients.
4. A company that sells more than any other competitor in a market is the market leader.
5. When competition is extremely strong and aggressive, it is often described as cut-throat or fierce.

Part B: Matching Terms

1. B_____ Kaizen
2. C_____ Mystery shopper
3. E_____ Market segment
4. D_____ Key players
5. A_____ BPR

- **A.** Business Process Re-engineering
- **B.** Japanese term for continuous improvement
- **C.** Person pretending to be a customer to check service quality
- **D.** The most important companies in a particular market
- **E.** A distinct group of buyers targeted within a market

Part C: Analysis Task

1. What is the difference between a **market leader** and a **challenger**?
   A market leader has the largest market share; a challenger is a competitor trying to increase its share and overtake the leader.

_____

Part A: Fill in the Blanks

1. The four Ps of marketing are product, price, place, and promotion.
2. Consumer goods that last a long time, such as cars and washing machines, are consumer durables.
3. Products that do not have a brand name are known as unbranded products or generics.
4. Cheap items sold at or below cost to attract customers into a store are loss leaders.

5.· A small group of buyers with specialized needs forms a niche market.

Part B: Matching Terms

1. A_____ FMCG
2. B_____ Own-brand
3. D_____ Upmarket
4. C_____ Trade up
5. E_____ Price war

- **A.** Fast-Moving Consumer Goods (fast-selling items like food)
- **B.** Products sold under the retailer's own name
- **C.** Moving from basic models to more sophisticated, expensive ones
- **D.** Designed for higher-income users; upscale
- **E.** When competing companies continually reduce prices in response to each other

Part C: Short Answer

1. Name the **Four Ps** of the marketing mix:
   Product, Price, Place and Promotion.

   _____

Part A: Fill in the Blanks

Complete the sentences using terms from Units 24, 25, and 26.

1.· Wholesalers and retailers are collectively known as intermediaries.
2.· A retail store that is part of a group of shops all sharing the same name is a chain store.
3. Unsolicited direct mail sent to consumers' homes is often dismissively called junk mail.
4. A series of advertisements for a particular product or company is an advertising campaign.
5. Businesses combining traditional physical shops with online e-commerce operations practice bricks-and-mortar retail.

Part B: Matching Terms

1. C_____ Cold call
2. E_____ Franchise
3. A_____ Billboard (AmE)
4. D_____ Loyalty card
5. B_____ B2B

- **A.** Open-air hoarding used for advertising
- **B.** Business-to-Business e-procurement
- **C.** Unannounced sales phone call to someone with no prior contact

- **D.** Card offering reward points based on customer spending
- **E.** Business format run by a franchisee under a franchisor's brand

Part A: Fill in the Blanks

1. Money received from sales is known as revenue or turnover.
2. Costs that do not change when production goes up or down (e.g., rent) are fixed costs.
3. Products that have very good profitability and generate large cash surpluses are cash cows.
4. Customers who owe money to a business are recorded as accounts receivable.
5. Independent outside accountants who examine a company's accounts to see if they give a true and fair view are auditors.

Part B: Matching Financial Terms

1. A_____ COGS
2. C_____ Goodwill
3. B_____ Depreciation
4. E_____ In the red
5. D_____ Window dressing

- **A.** Cost of Goods Sold (variable manufacturing costs)
- **B.** Reduction in the book value of fixed assets over time
- **C.** An intangible asset representing a company's good reputation
- **D.** Creative accounting making results look better than they are
- **E.** Operating at a financial loss or having a negative bank balance

Part A: Fill in the Blanks

1. The person who is in charge of running a meeting and keeping participants on track is the chairperson or chair, often referred to simply as the chair.

2. A list of items to be discussed during a meeting, sent out in advance, is called the agenda.

3. When negotiators or meeting participants reach a middle-ground solution where both sides make concessions, they reach a compromise.

4. Using cautious language to avoid making overly direct or absolute statements is known in discussion techniques as hedging.

5. When a meeting discussion completely breaks down and no agreement can be reached, it is referred to as a deadlock.

Part B: Matching Meeting Terms

1. C AGM
2. E Minutes
3. A Consensus
4. B Action points
5. D Hedging

- **A.** General agreement reached by all participants
- **B.** Specific tasks assigned to individuals to complete after a meeting finishes
- **C.** Annual General Meeting held once a year for shareholders
- **D.** Avoiding direct or committal statements using qualifying language
- **E.** The written record of decisions and discussions made during a meeting

Part C: Short Answer Exercises

1. What is the main responsibility of a meeting chairperson before a meeting begins?

The chairperson should plan the meeting, prepare an agenda and ensure participants receive the relevant information in advance.

2. What is the difference between reaching a **consensus** and voting on a decision?

Consensus means the group reaches general agreement through discussion; voting decides an issue by counting individual choices.

Part A: Fill in the Blanks

1. The visual items used during a presentation, such as slides, handouts, or overhead projections, are called visual aids.

2. Establishing a positive connection and good mutual relationship with your audience during a presentation is building rapport.

3. The opening part of a presentation where you welcome the audience and outline your structure is the introduction.

4. Moving around too much or making nervous hand gestures can distract from your body language during a speech.

5. When concluding a presentation, speakers typically open the floor to deal with questions from the audience.

Part B: Matching Presentation Stages

1. _C_____ Visual aids
2. _B_____ Body language
3. _D_____ Rapport
4. _E_____ Q&A session
5. _A_____ Handouts

- **A.** Printed materials distributed to listeners to supplement a presentation
- **B.** Postures, gestures, and facial expressions used while speaking
- **C.** Charts, slides, and diagrams used to illustrate key points visually
- **D.** A harmonious, trusting relationship between speaker and listeners
- **E.** The time at the end of a presentation dedicated to answering inquiries

Part C: Error Correction

Correct the italicized phrases:

1. "During my presentation, I will show you some visual supports." → During my presentation, I will show you some visual aids.

2. "Let's open the floor for some inquiries from the spectators." → Let's open the floor for questions from the audience.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 62 through 66.

1. A negotiation style where both sides aim for an outcome that benefits everyone involved is known as a win-win situation.

2. Offering something you value less in exchange for something the other party values less during talks is making trade-offs.

3. When negotiations completely stall and neither side is willing to move or compromise, they have reached a deadlock.

4. An agreement between two or more parties that is enforceable by law after a successful negotiation is a contract.

5. A neutral third party brought in to help resolve a deadlock and mediate an agreement is a mediator.

Part B: Matching Negotiation Tactics

1. _A_____ Probing

2. _D_____ Counter-proposal

3. _B_____ Deadlock

4. _E_____ Concession

5. _C_____ Mediator

- **A.** Asking probing questions to discover the other party's underlying needs
- **B.** A stall in talks where neither side will compromise
- **C.** An independent third party assisting in dispute resolution
- **DT.** A responding offer made in reaction to an initial proposal
- **E.** Something given up voluntarily to reach an agreement

Part C: Short Answer Exercises

1. What is the difference between a **hard bargaining** style and a **win-win** style?
Hard bargaining focuses on winning as much as possible for one side; a win-win style seeks a mutually beneficial agreement.

2. Why is checking the final contract details essential after reaching an agreement?
Checking contract details ensures that all terms are accurate, understood, lawful, and consistent with what was agreed.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 36 and 37.

1. When a company sells its shares to the public for the first time, it floats the company in a flotation / initial public offering (IPO).

2. Short-term lending to businesses is known as commercial credit.

3. Financial products derived from underlying assets, such as futures and options contracts, are known as derivatives.

4. An extended period of rising share prices and optimistic dealer sentiment is referred to as a bull market.

5. Shares in long-established, stable companies with a history of profit in both good and bad times are called blue chips.

Part B: Matching Financial Markets

1. _B_____ Forex

2. _C_____ Bourse

3. _A_____ NASDAQ

4. _E_____ FTSE

5. _D_____ Bear market

- **A.** New York stock market index focusing heavily on high-tech companies
- **B.** Foreign exchange market for buying and selling national currencies
- **C.** An alternative term for a stock market or stock exchange
- **D.** A market characterized by falling prices and pessimistic dealer sentiment
- **E.** London's Financial Times Stock Exchange index

Part C: Short Answer Exercises

1. What is the difference between a **futures contract** and an **options contract**?
A futures contract generally obliges the parties to transact later at agreed terms; an option gives its buyer the right, but not the obligation, to transact.

2. Why are major financial centres like London and New York often referred to by nicknames like "The City" or "Wall Street"?

The City and Wall Street are famous financial districts, so their names are used as shorthand for the financial industries based there.

Part A: Fill in the Blanks

1. The study of how money works, is used, and whether economic activities are profitable is called economics.

2. When a country exports more goods and services than it imports, it maintains a trade surplus.

3. The total monetary value of all goods and services produced within a particular country is its Gross Domestic Product (GDP).

4. A period of negative economic growth where economic output contracts is known as a recession.

5. When a bad recession becomes extremely severe, widespread, and prolonged, it is called a slump or depression.

Part B: Matching Economic Indicators

1. C Inflation rate
2. D Trade deficit
3. E Stagflation
4. B Trough
5. A Stagnation

- **A.** A period when the economy is growing very slowly or not at all
- **B.** The lowest point in an economic cycle before output starts rising again
- **C.** The speed at which general consumer price levels are rising
- **D.** When import payments exceed export earnings, creating a trade gap
- **E.** A difficult economic condition combining slow growth with rapid inflation

Part C: Error Correction

Correct the italicized phrases:

1. "The country's economic indicators show a high rate of inflation speeds." → The country's economic indicators show a high rate of inflation.

2. "When output reaches its lowest level, it hits a peak before rising." → When output reaches its lowest level, it hits a trough before rising.

Part A: Fill in the Blanks

1. Buying or selling securities using confidential information that is not publicly available is illegal insider dealing.

2. A secret agreement among competing companies in the same market to fix prices at a certain level is price fixing.

3. A type of fraud where an employee illegally steals and gets money from their employer is known as embezzlement.

4. The process of hiding the illegal origin of criminal money, often by purchasing property, is money laundering.

5. Directing investment funds exclusively into companies that do not harm people or the environment is ethical investment.

Part B: Matching Crime & Ethics Terms

1. _D_____ Embezzlement

2. _A_____ Counterfeiting

3. _B_____ Bribery

4. _E_____ Code of ethics

5. _C_____ Sweatshop labor

- **A.** Making illegal fake copies of banknotes, documents, or luxury goods
- **B.** Offering or receiving illegal payments to persuade someone to act corruptly
- **C.** Manual labor performed under severely exploitative, underpaid conditions
- **D.** The illegal theft of funds by someone entrusted with managing them within a firm
- **E.** A formal corporate document outlining required moral standards of behavior

Part C: Short Answer Exercises

1. What is the purpose of establishing **Chinese walls** within financial institutions?
Chinese walls separate departments and restrict confidential information to prevent conflicts of interest and insider dealing.

2. Why do institutional investors conduct annual **social performance audits**?
Social performance audits check whether companies meet ethical, social and environmental standards and help investors assess risks.

Part A: Fill in the Blanks

1. The overall period during which a project or task should be completed is referred to as the timescale or timeframe.

2. When work is completed later than the planned completion date, it is behind schedule and there is a delay.

3. Work that is difficult in an interesting, rewarding, and enjoyable way is described as challenging.

4. An extreme state of physical and mental exhaustion caused by chronic work stress is known as burnout.

5. The metaphor used to describe the exhausting, highly competitive modern corporate work environment is the rat race.

Part B: Matching Time & Stress Terms

1. D Downtime
2. E Prioritize
3. C Perfectionism
4. A Downshifting
5. B Stress-induced

- **A.** Choosing to leave behind a stressful career for a simpler, balanced lifestyle
- **B.** An unexpected illness or condition brought on by excessive pressure
- **C.** An unworkable aim for flawlessness when there is no need for it

- **D.** Periods when machinery or computers cannot operate because they are broken
- **E.** Arranging tasks in order of importance before working on them

Part C: Short Answer Exercises

1. What are the key dangers of striving for **perfectionism** when managing daily tasks?
Perfectionism can waste time, delay deadlines, increase stress and reduce productivity by focusing too much on minor details.

2. How do **downshifters** typically redefine their personal idea of success?
Downshifters often define success through well-being, family time, balance and satisfaction rather than salary or status.

Part A: Fill in the Blanks

1. People working below a manager in an organizational hierarchy are known as subordinates.

2. A leadership quality that is forward-thinking, with the power to see clearly how things will be in the future, is called being a visionary.

3. Management decisions that are arrived at by asking employees to contribute in a process of consultation are built on consultation.

4. Granting employees the initiative and authority to make decisions without asking managers first is called empowerment.

5. A corporate environment characterized by male dominance, aggressiveness, and physical strength is a macho culture.

Part B: Matching Leadership & Cultural Terms

1. B Authoritarian
2. E Decentralized
3. D Deference
4. C Corporate culture
5. A Canteen culture

- **A.** Unofficial, unapproved ways that people within an organization think and talk

- **B.** A management style that imposes decisions from above without consultation
- **C.** The shared values, habits, and working style of a specific company
- **D.** Respectful submission and yielding to the authority of superiors
- **E.** Organizational structures where decision-making authority is spread out

Part C: Error Correction

Correct the italicized phrases:

1. "The manager is very remote, so she is completely approachable by all staff." → The manager is very approachable, so all staff feel comfortable speaking to her.

2. "We operate a top-down consensus approach in our department." → We use a consultative, consensus-based approach in our department.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 46, 47, and 48.

1. In the English-speaking business world, people routinely use first names even when they do not know each other very well.

2. A company day where employees are allowed to wear less formal clothing than a standard business suit is called a casual Friday.

3. Being at work when you do not actually need to be there, simply to demonstrate commitment, is known as a culture of presenteeism.

4. A phone extension that is not connected by a physical wire, allowing movement around a home or office, is a cordless phone.

5. A phone number that provides free access for callers, such as an 0800 number, is a toll-free number.

Part B: Matching Etiquette Terms

1. B Surname
2. E Smart casual
3. D Punctuality
4. C Pager

5. AVideoconferencing

- **A.** Holding a face-to-face meeting across locations using computers and cameras
- **B.** A family name shared across relatives
- **C.** A device that receives written messages while on the move
- **D.** Arriving at meetings or appointments on time
- **E.** A relaxed yet professional style of dress that avoids full suits

Part C: Short Answer Exercises

1. What is the standard convention regarding names in the English-speaking business world?
In many English-speaking workplaces, colleagues often use first names, even when they do not know each other well.

2. How do attitudes toward **time** and schedules vary across different business cultures? Some business cultures value strict punctuality and fixed schedules, while others take a more flexible approach to time.

Part A: Fill in the Blanks

1. A formal meeting open to all shareholders of a company held once a year is an Annual General Meeting or AGM.

2. Before a meeting begins, the chairperson prepares a list of items to be discussed, known as the agenda.

3. During a meeting, the person taking notes records the decisions and discussions to produce the official minutes.

4. When a chairperson wants to open a meeting or direct attention to the first item, they formally opens the meeting.

5. Inviting specific participants to speak during a discussion helps ensure everyone has an opportunity to share their views.

Part B: Matching Meeting Terms

1. C Chairperson
2. E Agenda
3. D Minutes

4. B Action points

5. A Venue

- **A.** The official physical or virtual location where a meeting takes place
- **B.** Specific tasks assigned to individuals to execute after the meeting concludes
- **C.** The person responsible for running the meeting and keeping order
- **D.** The written record of what was discussed and decided
- **E.** The structured list of topics scheduled for discussion

Part C: Short Answer Exercises

1. What are the key responsibilities of a chairperson *during* a meeting?
The chairperson opens and guides the meeting, follows the agenda, manages time, encourages participation and summarizes decisions.

2. Why is it important to distribute an agenda well in advance of a meeting?
An agenda sent early helps participants prepare, gather information and make the meeting more efficient.

Part A: Fill in the Blanks

1. Using cautious language and qualifying phrases to avoid making overly direct or absolute statements is called hedging.

2. A negotiation approach where both parties work to find solutions that benefit everyone involved is a win-win situation.

3. Asking detailed and probing questions during negotiations helps uncover the other party's underlying needs.

4. When negotiators offer something they value less in exchange for a concession from the other side, they are making trade-offs.

5. When a negotiation stalls completely because neither side will compromise or move forward, they have reached a deadlock.

Part B: Matching Discussion & Negotiation Terms

1. D Hedging

2. C Consensus

3. EProbing

4. BCounter-proposal

5. AMediator

- **A.** An independent third party brought in to help resolve a deadlock
- **B.** A responding offer made in reaction to an initial bargaining position
- **C.** General agreement reached collectively by all participants
- **D.** Using cautious, non-committal language to soften statements
- **E.** Asking exploratory questions to investigate underlying interests

Part C: Error Correction

Correct the italicized phrases:

1. "We reached a deadlock, so we made a win-win compromise that pleased nobody." → We avoided deadlock by reaching a win-win compromise that satisfied both sides.

2. "During the meeting, he used too much hedging so his point was extremely direct and clear." → During the meeting, he used very little hedging, so his point was direct and clear.

Part A: Fill in the Blanks

1. A brief presentation given to inform colleagues or clients about a specific project update or status report is often structured around different types of presentations, such as a product launch.

2. When preparing a presentation, speakers should practice to ensure proper timing, avoiding rushing through the material or exceeding the allocated time.

3. Maintaining eye contact, varying vocal tone, and projecting your voice properly are all vital elements of managing your delivery during a speech.

4. Building positive engagement and mutual connection with your audience is essential for establishing good rapport early in your presentation.

5. Visual materials such as slides, handouts, and diagrams used to illustrate key concepts during a speech are called visual aids.

Part B: Matching Presentation Terms

1. D Preparation

2. A Rapport

3. B Body language

4. C Visual aids

5. E Q&A session

- **A.** A harmonious, trusting relationship established between speaker and listeners
- **B.** Postures, gestures, and physical movements used while speaking
- **C.** Charts, slides, and diagrams used to clarify information visually
- **D.** The structured process of planning, drafting, and organizing your speech
- **E.** The concluding segment dedicated to answering listener inquiries

Part C: Short Answer Exercises

1. What are the key dos and don'ts when preparing the introduction of a presentation?
Do welcome the audience, state the purpose and outline the presentation.
Don't start with irrelevant details, lengthy apologies or an unclear opening.

2. How should a speaker handle difficult or hostile questions during the final question-and-answer period?
Remain calm and respectful, listen fully, clarify the question,
answer with facts and admit when you need to check something.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 62 and 63.

1. A negotiation where two parties try to reach an agreement over a contract or dispute is heavily influenced by the initial stage of negotiation.

2. Before entering formal talks, experienced negotiators spend significant time preparing their strategy, identifying their objectives and acceptable bargaining points.

3. The bargaining stage involves making concessions and counter-proposals to move the discussion closer to a mutually acceptable agreement.

4. Different negotiators exhibit different negotiating styles, ranging from cooperative and collaborative to highly confrontational and hard bargaining.

5. When preparing for a complex international deal, understanding cultural nuances is just as critical as analyzing the financial terms of the deal.

Part B: Matching Negotiation Terms

1. C Bargaining
2. D Concession
3. A Counter-proposal
4. E Negotiating style
5. B Deal

- **A.** A responding offer made in reaction to an initial bargaining position
- **B.** An agreement or contract reached after successful discussions
- **C.** The active discussion process of trading concessions to reach agreement
- **D.** Something given up voluntarily by one party to encourage agreement
- **E.** The characteristic approach or behavioral pattern adopted by a negotiator

Part C: Error Correction

Correct the italicized phrases:

1. "During the bargaining phase, we refused to make any concessions and immediately signed the contract." →
During the bargaining phase, we exchanged concessions before agreeing on and signing the contract.

2. "His negotiating style was entirely cooperative, meaning he shouted down every proposal made by the other side." →
His negotiating style was entirely confrontational: he shouted down every proposal made by the other side.

GOWTHAM G

VOCABULARY WORKSHEETS | ONE-PAGE LEARNING SUMMARY

Professional and workplace vocabulary

I learned useful terms for jobs, recruitment, working arrangements and workplace responsibilities. This helps me understand formal communication in an office.

Word meanings and matching

Matching words with definitions helped me recognise the meaning of unfamiliar terms and choose vocabulary that fits the context.

Grammar and sentence correction

Correcting sentences helped me pay attention to prepositions, verb forms and clear sentence structure. I can use these skills in writing and speaking.

Business and employment concepts

The exercises introduced ideas such as salaries, wages, employee benefits and workplace policies, helping me understand professional situations.

Applying words in context

Fill-in-the-blanks and short-answer activities encouraged me to think about the meaning of each sentence instead of memorising answers.

My next steps

I will revise unfamiliar words, practise using them in original sentences and apply them in interviews, presentations, emails and everyday conversations.

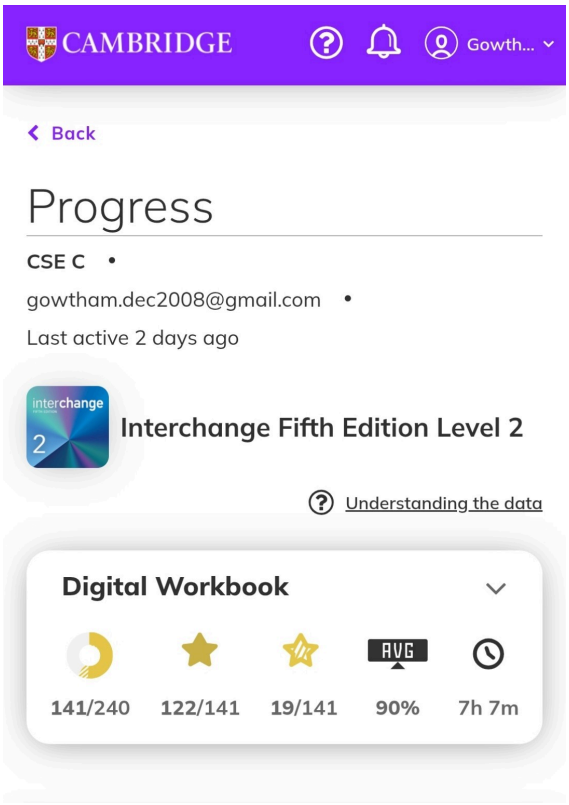

Overall reflection: Better vocabulary, clearer English and greater professional confidence.
