LAB RECORD

Professional English Lab Integrated

CLASS CODE: EN25C09

STUDENT DETAILS

Student Name: Glenn Christo

Roll No: 26CS1145

Date:

Subject Name: Professional English Lab Integrated

DEPARTMENT OF HUMANITIES & SCIENCES • AFFILIATED TO ANNA UNIVERSITY • CHENNAI

STUDENT PORTFOLIO

Learning with purpose

A personal record of communication, technical curiosity and professional growth.

ABOUT THIS RECORD

This record brings together my profile, career plan, project concepts, English practice and completed worksheets. It reflects my present learning stage and the direction in which I hope to grow.

STUDENT

Glenn Christo
First-year Computer Science and Engineering student
St. Joseph's College of Engineering, Chennai
Register No. 26CS1145 | Section C

MY DIRECTION

I am interested in cloud computing and software development. My aim is to build reliable, useful technology while strengthening the communication and teamwork skills needed to work with others.

GUIDING THOUGHT

"Keep learning, ask better questions and build solutions that make a difference."

CONTENTS

Contents & page guide

Organised in the same overall sequence as the reference record.

College record cover	1
Personal student cover	2
Contents and page guide	3
About me and skills	4-5
Four-year milestones and professional profiles	6-7
Project concepts: TerraShield and Student Performance Analyzer	8-9
Inspiration and SWOC	10-11
English speaking practice	12
Cambridge One: workbook progress	13
Soft-skills study notes: seven lecture themes	14-20
Expanded lecture notes from reference record	21-27
Vocabulary worksheet: supplied answers	28-43
Vocabulary application and learning reflection	44
Model examination: supplied answer key	45-55

Expanded lecture pages include examples from the reference record and are not evidence of course completion.

PERSONAL PROFILE

About me

Who I am, what motivates me and the work I hope to do.

INTRODUCTION

I am Glenn Christo, a first-year Computer Science and Engineering student at St. Joseph's College of Engineering. I enjoy exploring how programming and cloud technology can be used to solve practical problems. I am at the beginning of my journey and want to develop my abilities through steady practice.

CAREER OBJECTIVE

My goal is to pursue cloud computing and software engineering. I want to strengthen my programming and problem-solving skills, gain practical experience and eventually contribute to dependable systems that serve real users.

AREAS OF INTEREST

Cloud computing: scalable infrastructure and reliable services.
Software development: creating useful applications and improving them through feedback.
Data and emerging technologies: exploring AI, data engineering, cybersecurity and automation.

PERSONAL QUALITIES

Curiosity, logical thinking, adaptability and a willingness to learn are qualities I want to develop further. Clear communication and collaboration are equally important to me as technical knowledge.

SKILLS AND DEVELOPMENT

Skills & roadmap

Current interests and a realistic path from foundations to cloud engineering.

TECHNICAL FOUNDATION

Learning: C, Python, data structures and problem solving.
Tools: Git, GitHub and Visual Studio Code.
Exploring: cloud infrastructure, AI, Internet of Things, DevOps and data engineering.

PROFESSIONAL SKILLS

Communication, teamwork, critical thinking, time management and presentation skills are essential for explaining ideas and working effectively with others.

ROADMAP

01 Foundation: practise C and Python, use Git and learn Linux basics.
02 Core systems: study networks, operating systems, databases and HTTP.
03 Cloud basics: explore compute, storage, identity and networking on a cloud platform.
04 Applied practice: experiment with containers, deployment, security and small projects.
05 Experience: seek feedback, internships and suitable certifications as opportunities arise.

A PRACTICAL HABIT

For each topic, I will make a small example, explain it in plain English and note one question for further study.

PLANNING

Four-year milestones

A flexible plan, not a claim of completed achievements.

YEAR 1 | BUILD FOUNDATIONS

Learn C and Python fundamentals, practise problem solving, become comfortable with Git and present small ideas clearly.

YEAR 2 | CONNECT CONCEPTS

Develop data-structure skills; study databases, operating systems and networking; build a small, documented application.

YEAR 3 | APPLY KNOWLEDGE

Explore cloud services and deployment, collaborate on projects, attend technical events and look for internship opportunities.

YEAR 4 | PREPARE FOR TRANSITION

Refine a portfolio, practise interviews, complete a substantial project and apply for roles aligned with cloud or software engineering.

MEASURING PROGRESS

I will review my plan regularly using completed practice, project feedback and personal reflections rather than relying only on certificates.

PROFESSIONAL COMMUNICATION

Professional profiles

A concise introduction for academic and professional settings.

PROFILE SUMMARY

First-year Computer Science and Engineering student interested in cloud computing and software development. Currently learning C and Python and exploring how secure, scalable systems are designed. Keen to learn through projects, teamwork and feedback.

LINKEDIN

Suggested headline: CSE Student | Learning C and Python | Aspiring Cloud Engineer
Profile: linkedin.com/in/glenn-christo-3373a4431/

GITHUB

Profile: github.com/glennchristo-ctrl
The supplied profile does not show public repositories. My next step is to document learning exercises and publish projects when they are ready.

30-SECOND INTRODUCTION

Hello, I am Glenn Christo, a first-year Computer Science student. I am learning C and Python and exploring cloud computing. I am interested in building practical systems, such as tools that help people understand climate risks or student progress. I look forward to learning from projects and collaborating with others.

PROJECT CONCEPT 01

TerraShield

AI-powered climate risk prediction and community alerts.

THE PROBLEM

Floods, droughts and heatwaves can disrupt communities. People need clear, timely information to understand possible local risks and prepare safely.

PROPOSED SOLUTION

TerraShield is a concept for analysing weather and environmental data, including rainfall, temperature, humidity, wind speed and historical flood patterns. It would classify potential area-level risk as low, moderate or high and communicate practical guidance in Tamil and English.

HOW IT COULD WORK

Collect: gather relevant weather and historical data.
Analyse: explore patterns using appropriate AI and machine-learning methods.
Communicate: display understandable risk levels, safety guidance and verified local contacts where available.

RESPONSIBLE DESIGN

A prototype should clearly label sample data and communicate uncertainty. Public warnings require validated data, careful testing and coordination with appropriate authorities; this concept is not an operational warning service.

PRESENTATION PRACTICE

“TerraShield aims to turn complex climate data into information that communities can understand and use.”

PROJECT CONCEPT 02

Student Performance Analyzer

Turning academic records into useful learning insights.

THE PROBLEM

Marks and attendance may be stored in separate places. Manual calculations take time, and a declining trend or subject-specific learning gap can be difficult to notice early.

PROPOSED SOLUTION

This concept organises marks, attendance and assessment records into summaries and visualisations. It is intended to help teachers review progress and identify students who may benefit from additional support.

WORKFLOW

Collect: import structured student records.
Check and analyse: validate missing or out-of-range values and calculate averages and attendance percentages.
Visualise: display subject comparisons and progress charts.
Report: provide concise summaries for students and authorised teachers.

PRIVACY AND FAIRNESS

Begin with sample or anonymised data, use role-based access and keep teachers involved in decisions. A flag is a prompt for review, not an automatic high-stakes judgement.

POSSIBLE BEGINNER STACK

Python, Pandas, SQLite and Streamlit; cloud-based storage can be explored later as an extension.

PERSONAL INSPIRATION

The one who inspires me

Dr. Werner Vogels | Cloud computing and distributed systems

WHO HE IS

Dr. Werner Vogels is Chief Technology Officer at Amazon. His work on distributed systems and his role in shaping Amazon's technology vision make him an inspiring figure for a student interested in cloud computing.

HIS JOURNEY

Before joining Amazon in 2004, he worked as a distributed-systems researcher at Cornell University. He holds a PhD from Vrije Universiteit Amsterdam. His career connects research, engineering practice and technology leadership.

WHAT I LEARN

His emphasis on scalable and resilient systems reminds me that technology must remain useful and dependable as it grows. I also value the importance of curiosity, systems thinking, customer focus and clear communication.

MY TAKEAWAY

I want to follow a patient learning path: master the fundamentals, practise with real projects, seek feedback and consider the people who depend on the systems I create. My aim is to become a cloud engineer who builds secure and reliable solutions.

SELF-ASSESSMENT

SWOC & action plan

Strengths, weaknesses, opportunities and challenges in my learning journey.

STRENGTHS

Curiosity about technology; interest in programming and problem solving; willingness to learn step by step; motivation to build practical projects.

WEAKNESSES

I am still developing confidence in programming, have limited hands-on cloud experience and need stronger foundations in networking, operating systems and large-scale system design.

OPPORTUNITIES

Accessible online learning materials, cloud labs, academic projects, workshops, internships and collaboration with other students can support my growth.

CHALLENGES

Cloud tools change quickly, complex systems take time to understand, and security and reliability demand careful practice. Balancing theory with practical work will require consistency.

ACTION PLAN

Set a regular programming practice schedule; revise core concepts weekly; complete small projects using sample data; ask for feedback; and maintain a short learning log to track progress.

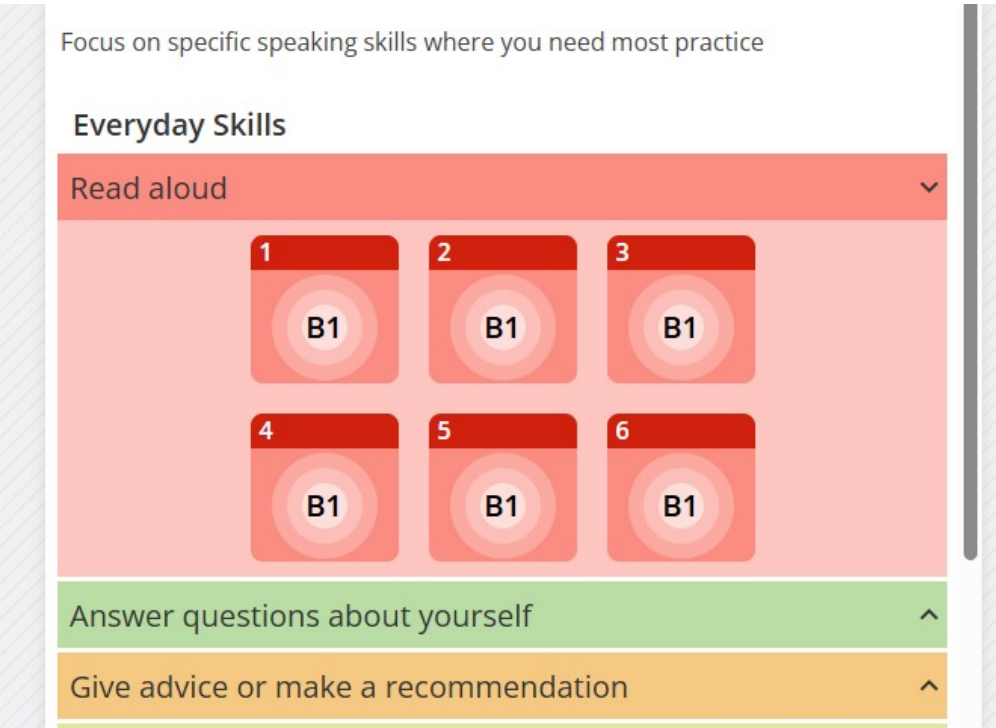

ENGLISH COMMUNICATION

Speaking practice

The supplied screenshot shows six B1 labels under Read aloud.

OBSERVED EVIDENCE

The image displays six Read Aloud activities, each marked B1. The screenshot does not show a name, date, overall score or certificate, so it is included as supplied practice evidence rather than proof of an independently verified qualification.

IMPROVEMENT PLAN

Record a short reading, listen for pronunciation and pauses, practise unfamiliar words in context, and repeat the activity. For writing, draft a short paragraph and revise it for clarity, grammar and logical order.

SOFT-SKILLS STUDY NOTES | 01

Introduction: soft skills

Based on the lecture themes in the reference record; these notes do not claim course completion.

CORE IDEA

Technical knowledge becomes more effective when it is supported by listening, clear explanation, responsibility and cooperation. Soft skills influence how we respond to classmates, teachers and future colleagues.

WHY IT MATTERS

Communication and professional habits support technical learning. A student who reflects, listens and plans can work more effectively with a team and explain a solution more confidently.

MY APPLICATION

When presenting a cloud concept, I should explain the purpose first and use examples before introducing technical terms.

PRACTICAL ACTION

Listen without interrupting and summarise the other person’s point before responding.

REFLECTION

I will revisit this idea as I gain experience and adjust my approach based on feedback and results.

SOFT-SKILLS STUDY NOTES | 02

Self-awareness and communication

Based on the lecture themes in the reference record; these notes do not claim course completion.

CORE IDEA

Professional growth starts with noticing habits. Preparation, respectful behaviour and attention to the audience make communication clearer and more purposeful.

WHY IT MATTERS

Communication and professional habits support technical learning. A student who reflects, listens and plans can work more effectively with a team and explain a solution more confidently.

MY APPLICATION

After a project discussion, I can check whether everyone understands the task and next steps.

PRACTICAL ACTION

Write one strength and one improvement after a class presentation.

REFLECTION

I will revisit this idea as I gain experience and adjust my approach based on feedback and results.

SOFT-SKILLS STUDY NOTES | 03

Understanding mindset

Based on the lecture themes in the reference record; these notes do not claim course completion.

CORE IDEA

A mindset is a pattern of beliefs that shapes how we interpret difficulties and feedback. Recognising an unhelpful assumption allows us to choose a more constructive response.

WHY IT MATTERS

Communication and professional habits support technical learning. A student who reflects, listens and plans can work more effectively with a team and explain a solution more confidently.

MY APPLICATION

A difficult programming exercise is a signal to change my strategy, not proof that I cannot learn.

PRACTICAL ACTION

Replace “I cannot do this” with “I need to practise this step.”

REFLECTION

I will revisit this idea as I gain experience and adjust my approach based on feedback and results.

SOFT-SKILLS STUDY NOTES | 04

Learning mindsets

Based on the lecture themes in the reference record; these notes do not claim course completion.

CORE IDEA

A growth-oriented approach treats mistakes as information. Improvement still requires deliberate practice, useful feedback and a willingness to try different methods.

WHY IT MATTERS

Communication and professional habits support technical learning. A student who reflects, listens and plans can work more effectively with a team and explain a solution more confidently.

MY APPLICATION

If a Python program fails, I can inspect the error, test a smaller example and ask for help when needed.

PRACTICAL ACTION

Keep a short record of one mistake, its cause and the correction.

REFLECTION

I will revisit this idea as I gain experience and adjust my approach based on feedback and results.

SOFT-SKILLS STUDY NOTES | 05

Developing a growth mindset

Based on the lecture themes in the reference record; these notes do not claim course completion.

CORE IDEA

Growth is supported by achievable goals, consistent effort and reflection. Progress is more sustainable when challenges are broken into manageable steps.

WHY IT MATTERS

Communication and professional habits support technical learning. A student who reflects, listens and plans can work more effectively with a team and explain a solution more confidently.

MY APPLICATION

I can divide a cloud project into data collection, analysis, presentation and review.

PRACTICAL ACTION

Choose one small weekly goal and review the result honestly.

REFLECTION

I will revisit this idea as I gain experience and adjust my approach based on feedback and results.

SOFT-SKILLS STUDY NOTES | 06

Time: importance and perception

Based on the lecture themes in the reference record; these notes do not claim course completion.

CORE IDEA

Time is limited, and priorities compete for attention. Planning helps match important tasks to available time while allowing room for rest and unexpected work.

WHY IT MATTERS

Communication and professional habits support technical learning. A student who reflects, listens and plans can work more effectively with a team and explain a solution more confidently.

MY APPLICATION

A weekly schedule can balance English practice, programming, classes and revision.

PRACTICAL ACTION

List the week’s key tasks and estimate the time needed for each.

REFLECTION

I will revisit this idea as I gain experience and adjust my approach based on feedback and results.

SOFT-SKILLS STUDY NOTES | 07

Using time efficiently

Based on the lecture themes in the reference record; these notes do not claim course completion.

CORE IDEA

Effective time management involves prioritising, avoiding distractions and reviewing how time is actually spent. A schedule should be realistic rather than overloaded.

WHY IT MATTERS

Communication and professional habits support technical learning. A student who reflects, listens and plans can work more effectively with a team and explain a solution more confidently.

MY APPLICATION

I can reserve a focused practice period for programming and a separate short session for vocabulary.

PRACTICAL ACTION

Work on one task at a time, then record what was completed.

REFLECTION

I will revisit this idea as I gain experience and adjust my approach based on feedback and results.

REFERENCE LECTURE NOTES | 01

Week 1 - Lecture 1 | Introduction 1: Highlights of Developing Soft Skills

Course: Enhancing Soft Skills and Personality (IIT Kanpur, Prof. T. Ravichandran). These are expanded study notes derived from the lecture themes in the uploaded portfolios, not proof of course completion.

Reference notes and personal examples are reproduced from the supplied first record.

CONCEPT EXPLAINED

Soft skills influence how knowledge becomes useful in daily life. Communication, listening, responsibility and the ability to work with other people affect both study and employment. The introductory session connects these habits with individual character and the decision to improve deliberately.

WHY THIS MATTERS

Technical ability is not enough on its own. An accurate explanation of a solution, an honest response to criticism, and a calm conversation in a team are also evidence of professional growth.

MY UNDERSTANDING

The material encouraged me to work deliberately, review my behaviour and make one measurable adjustment at a time.

CONNECTION TO MY OWN STUDIES

I want to work toward software engineering, so I need to explain technical decisions in understandable language. For example, when presenting the calculator and expense-tracker projects, I should describe the problem, my method and what I learned.

PRACTICAL ACTION

Notice how I respond when someone disagrees with an idea; practise listening first and summarising their point before answering.

REFERENCE LECTURE NOTES | 02

Week 2 - Lecture 2 | Introduction 2: Further Highlights of Developing Soft Skills

Course: Enhancing Soft Skills and Personality (IIT Kanpur, Prof. T. Ravichandran). These are expanded study notes derived from the lecture themes in the uploaded portfolios, not proof of course completion.

Reference notes and personal examples are reproduced from the supplied first record.

CONCEPT EXPLAINED

The second introductory lecture builds on personal development. It places attention on self-awareness, preparation, ethical conduct, listening, communication and the willingness to examine one's own behaviour. Progress is more realistic when a person observes habits instead of relying only on good intentions.

WHY THIS MATTERS

A conversation has a purpose, an audience and an expected result. Choosing precise words and checking understanding makes both presentations and everyday teamwork more effective.

MY UNDERSTANDING

I understood the central message as a reminder to turn an idea into a habit, not simply memorise a definition.

CONNECTION TO MY OWN STUDIES

As I strengthen C, Python, HTML and mathematics, I can practise concise presentations and active listening. A good team discussion should leave everyone knowing the next action, not merely the words that were spoken.

PRACTICAL ACTION

After one class discussion, write down what I explained clearly, what confused others, and one small adjustment for next time.

REFERENCE LECTURE NOTES | 03

Week 3 - Lecture 3 | Mindset 1: Definition and Types

Course: Enhancing Soft Skills and Personality (IIT Kanpur, Prof. T. Ravichandran). These are expanded study notes derived from the lecture themes in the uploaded portfolios, not proof of course completion.

Reference notes and personal examples are reproduced from the supplied first record.

CONCEPT EXPLAINED

A mindset refers to the beliefs and assumptions through which a person interprets experiences. A positive outlook encourages effort, but an unexamined negative assumption can discourage action before a problem is even attempted. Mindsets influence reactions to success, mistakes, advice and unfamiliar situations.

WHY THIS MATTERS

Recognising a limiting belief is different from pretending difficulties do not exist. I can acknowledge that a topic is challenging and still choose to attempt a smaller, achievable step.

MY UNDERSTANDING

The main lesson for me is that a useful skill appears in ordinary actions, especially when circumstances become demanding.

CONNECTION TO MY OWN STUDIES

When progress on the calculator and expense-tracker projects is slow, I should question the assumption that a first attempt must be perfect. Breaking a complex problem into smaller parts makes the challenge easier to investigate.

PRACTICAL ACTION

Identify one sentence I use when a task feels hard, then rewrite it as a realistic statement about a skill I can practise.

REFERENCE LECTURE NOTES | 04

Week 4 - Lecture 4 | Mindset 2: Learning Mindsets

Course: Enhancing Soft Skills and Personality (IIT Kanpur, Prof. T. Ravichandran). These are expanded study notes derived from the lecture themes in the uploaded portfolios, not proof of course completion.

Reference notes and personal examples are reproduced from the supplied first record.

CONCEPT EXPLAINED

The learning-mindset lecture distinguishes responses that close off improvement from responses that welcome it. A fixed outlook may treat errors as proof of inability; a growth-oriented approach treats them as feedback about a method, strategy or level of preparation.

WHY THIS MATTERS

Progress in a difficult subject usually requires several attempts, good feedback and corrections. This does not guarantee immediate success, but it encourages sustained, thoughtful practice.

MY UNDERSTANDING

This discussion made me compare the way I think about a challenge with the steps I actually take to solve it.

CONNECTION TO MY OWN STUDIES

If I cannot solve a task using C, Python, HTML and mathematics immediately, I will experiment with examples, read feedback carefully and retry. The main evidence of improvement is a better method after each attempt.

PRACTICAL ACTION

When an exercise fails, record the cause, try a second method, and describe what changed rather than merely recording a wrong answer.

REFERENCE LECTURE NOTES | 05

Week 5 - Lecture 5 | Mindset 3: Secrets of Developing Growth Mindsets

Course: Enhancing Soft Skills and Personality (IIT Kanpur, Prof. T. Ravichandran). These are expanded study notes derived from the lecture themes in the uploaded portfolios, not proof of course completion.

Reference notes and personal examples are reproduced from the supplied first record.

CONCEPT EXPLAINED

This session focuses on building a growth mindset through purposeful effort, reflection and practical goals. Improvement becomes more visible when long ambitions are divided into small tasks and when feedback is used to modify the approach rather than judge personal worth.

WHY THIS MATTERS

The word “yet” helps reframe an unfinished skill, but a useful growth mindset also requires evidence: repeated practice, specific study methods and honest review of results.

MY UNDERSTANDING

I can relate this topic to preparing for a technical career while still developing my fundamentals.

CONNECTION TO MY OWN STUDIES

My plan to develop in software engineering benefits from frequent practice. I can track a practical target, such as solving a set of small coding problems or improving one feature in the calculator and expense-tracker projects.

PRACTICAL ACTION

Set one weekly skill goal, complete three practice attempts and compare the final attempt with the first.

REFERENCE LECTURE NOTES | 06

Week 6 - Lecture 6 | Managing Time 1: Importance and Perceptions of Time

Course: Enhancing Soft Skills and Personality (IIT Kanpur, Prof. T. Ravichandran). These are expanded study notes derived from the lecture themes in the uploaded portfolios, not proof of course completion.

Reference notes and personal examples are reproduced from the supplied first record.

CONCEPT EXPLAINED

Time is limited, and different activities compete for it. This lecture asks learners to consider how they perceive time and where their hours go. Without first observing real habits, a timetable may become unrealistic or fail to account for interruptions.

WHY THIS MATTERS

Time management starts with awareness. Planning can balance urgent work, long-term learning, breaks and responsibilities while leaving room to adjust when a task takes longer than expected.

MY UNDERSTANDING

The lecture showed me that knowing a rule and consistently following it are two different things.

CONNECTION TO MY OWN STUDIES

When juggling classes and C, Python, HTML and mathematics, I need an honest picture of my schedule. I can compare planned study time with what I actually use, then adjust without removing necessary rest.

PRACTICAL ACTION

Record one study day in half-hour blocks, identify avoidable delays and reserve a fixed period for a priority task.

REFERENCE LECTURE NOTES | 07

Week 7 - Lecture 7 | Managing Time 2: Using Time Efficiently

Course: Enhancing Soft Skills and Personality (IIT Kanpur, Prof. T. Ravichandran). These are expanded study notes derived from the lecture themes in the uploaded portfolios, not proof of course completion.

Reference notes and personal examples are reproduced from the supplied first record.

CONCEPT EXPLAINED

Efficient time use means selecting priorities, estimating effort and limiting distractions. Working for many hours is not the same as producing good work. Concentrated sessions, realistic deadlines and checking completed tasks can improve the use of available time.

WHY THIS MATTERS

A short task list works best when it names a concrete output rather than an unclear intention. Reviewing progress also reveals which tasks repeatedly need more time.

MY UNDERSTANDING

I would describe the principle through the choices I make each day, rather than through a single examination result.

CONNECTION TO MY OWN STUDIES

To make steady progress toward software engineering, I should rank important tasks, avoid constant switching and set a visible result for each study session, such as a tested function or a written explanation.

PRACTICAL ACTION

Choose three tasks for tomorrow, estimate minutes for each, finish the most important one early and review actual times.

St. Joseph's Group of Institutions
OMR, CHENNAI - 119

VOCABULARY WORK SHEET

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 1, 2, and 3.

1. To find out what someone's job is, you usually ask, "What doyou do?"
2. A manager who oversees a team and ensures targets are met is often said to be in charge of the department.
3. Employees who work outside standard office hours in rotation (e.g., one week morning, next week evening) are working in shifts.
4. Outside specialists hired by companies to persuade top executives to leave their current firms are known as headhunters.
5. Job applicants typically submit a CV(curriculum vitae) detailing the story of their working life alongside a covering letter.

Part B: Matching Terms to Definitions

Match each business term on the left with its correct description on the right.

1. B Flexitime
2. C Teleworking
3. E Psychometric test
4. D Shortlist
5. A Referees

- **A.** Previous employers or teachers named to provide character or performance references.
- **B.** A system allowing employees to choose working hours within agreed limits.
- **C.** Working from home using a computer and telecommunications.
- **D.** A selected pool of qualified candidates chosen for final interviews.
- **E.** A written test used to assess a candidate's intelligence and personality.

Part C: Sentence Correction

Identify and correct the errors in the following sentences.

1. *Error:* "I am in charge for the design department." *Correction:* I am in charge of the design department
2. *Error:* "He is going to the work by train every morning." *Correction:* He goes to work by train every morning
3. *Error:* "She is a very responsible in her daily tasks." *Correction:* She is very responsible in her daily task

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 4 and 5.

1. Someone who has just left university with a degree is referred to as a graduate.
2. A worker who requires virtually no specialized training or formal qualifications is classified as unskilled.
3. Salespeople often receive a basic salary plus commission, which is a percentage on everything they sell.
4. Senior executives may receive share options, giving them the right to buy company shares at low prices.
5. High-ranking corporate executives with excessive compensation packages are sometimes referred to informally as fat cats.

Part B: Matching Collocations

Match the adjectives/phrases on the left with their correct prepositional complements.

1. E Skilled
2. D Good
3. A Computer
4. B Self
5. C Fringe

- **A.** literate
- **B.** starter / motivated
- **C.** benefits
- **D.** at / in
- **E.** with

Part C: Application & Context Analysis

Explain the difference between the following pairs in 1-2 sentences:

1. **Salary vs. Wages:** A salary is normally a fixed regular payment often monthly wages are usually calculated by hours or days worked.
2. **Severance package vs. Bonus:** A server package is compensation given when employment ends.
3. A bonus is extra pay for performance or result.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 6, 7, and 8.

1. Manual workers who use their hands and wear blue collars are often contrasted with white-collar workers in offices.
2. When workers stop working temporarily to protest pay or conditions, they go on strike.
3. A company that reduces its management layers and makes itself leaner is said to have downsized and delayered .
4. When an employee is dismissed through no fault of their own because their job no longer exists, they are made redundant.
5. An invisible barrier that prevents women from rising beyond a certain corporate level is called the glass ceiling.

Part B: Matching Health & Safety / Legal Terms

Match each workplace issue with its accurate classification.

1. B Repetitive Strain Injury (RSI)
2. D Passive smoking
3. A Sexual harassment
4. C Equal opportunities
5. E Whistleblowing

- **A.** Unwelcome sexual behavior in the workplace
- **B.** Physical injury caused by continuous data entry or typing
- **C.** British term equivalent to US affirmative action
- **D.** Breathing in other people's tobacco smoke involuntarily
- **E.** Reporting illegal or unethical practices within an organization

Part C: Short Answer Exercises

1. What is the difference between being **dismissed** and being **made redundant**? Being **dismissed** means an employer terminates someone's employment,often for conduct or performance reasons.Being **made redundant** means the job itself is no longer needed.
2. What is an **open-plan office**? An **open-plan office** is a workspace where many employees work in one shared area rather than seperate enclosed offices.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 9, 10, and 11.

1. Directors who are outsiders and do not participate in the day-to-day running of the company are non-executive directors.
2. In the US, the top manager is often the CEO, while managers take care of the day-to-day running.
3. Someone who founds or establishes their own company and takes financial risks is an entrepreneur.
4. Powerful leaders who control massive business empires are often called magnates, moguls, or tycoons.
5. Businesses that are sold off by the state to private investors are privatized.

Part B: Matching Corporate Terms

Match the terms on the left with their definitions.

1. ___A_____ SME
2. ___D_____ Corporate culture
3. ___E____ Enterprise zone
4. ___B_____ Head up
5. ___C_____ Boardroom

- **A.** Small and Medium-sized Enterprise
- **B.** To head or lead a department or activity
- **C.** The room where directors meet
- **D.** The shared beliefs and working style of a company
- **E.** A designated region with fewer laws and lower taxes to encourage business

Part C: Error Correction

Correct the italicized phrases:

1. "He is the head up of our marketing department." He **heads up** our marketing department
2. "We need to buy a commerce for our new online shop." We need to buy **e-commerce software.**

Part A: Fill in the Blanks

Complete the sentences using terms from Units 12, 13, and 14.

1. A self-employed person working alone, especially a builder or plumber, is a one-man band.
2. A company whose shares can be freely bought and sold on the stock market is a Public Limited Company or PLC.
3. Organizations with social aims like helping the sick or poor are non-profit organizations or charities.
4. Software developers often release a final test version, called a beta version, before official launch.
5. If a design defect is discovered after a product launch, a company may have to recall it.

Part B: Sector Classification

*Classify each industry as either **Manufacturing (M)** or **Services (S)**.*

1. ____M____ Aerospace
2. ____S____ Catering
3. ____M____ Pharmaceuticals
4. ____S____ Property / Real Estate
5. ____M____ Steel production

Part C: Short Definitions

1. Define **CADCAM**: **CADCAM** means computer-aided design and computer-aided manufacturing
2. Define **Focus group**: A **focus group** is a small group of people asked for opinions about a product, service, or idea

Part A: Fill in the Blanks

Complete the sentences using terms from Units 15, 16, and 17.

1. Products that are no longer up-to-date because they use old technology are obsolete.
2. Legal protection for an invention that stops others from copying its design is a patent.

3. The maximum amount that a plant or company can produce is its capacity.
4. Materials, components, labor, and capital used in production are collectively known as resources.
5. Manufacturing goods efficiently without waste by having components arrive exactly when needed is just in timeproduction.

Part B: Matching Terms

1. ____B____ R&D
2. ____A____ Royalties
3. ____C____ Craft industry
4. ____E____ Work-in-progress
5. ____D____ Outsourcing

- **A.** Payments made to an author or inventor for using their protected work
- **B.** Research and Development department
- **C.** Manual, labor-intensive production of items like furniture
- **D.** Using outside suppliers for services previously done in-house
- **E.** Goods that are currently being made on the production line

Part C: Short Explanations

1. Why do companies implement **Just-in-Time (JIT)** manufacturing? . Companies use Just-in-Time (JIT) to receive materials when needed, reduce storage and inventory costs, and minimize waste.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 18, 19, and 20.

1. The objective of quality control is conformance to specifications with zero defects.
2. Comparing your performance against the best operators in the industry is called benchmarking.
3. People who buy everyday services like train travel are customers, while those who buy professional services are clients.
4. A company that sells more than any other competitor in a market is the market leader.
5. When competition is extremely strong and aggressive, it is often described as cut-throat or fierce.

Part B: Matching Terms

1. ____B____ Kaizen
2. ____C____ Mystery shopper
3. ____E____ Market segment
4. ____D____ Key players
5. ____A____ BPR

- **A.** Business Process Re-engineering
- **B.** Japanese term for continuous improvement
- **C.** Person pretending to be a customer to check service quality
- **D.** The most important companies in a particular market
- **E.** A distinct group of buyers targeted within a market

Part C: Analysis Task

1. What is the difference between a **market leader** and a **challenger**? . A market leader has the largest market share or strongest position. A challenger tries to gain share and compete with the leader.

Part A: Fill in the Blanks

1. The four Ps of marketing are product, price, place , and promotion.
2. Consumer goods that last a long time, such as cars and washing machines, are consumer durables .
3. Products that do not have a brand name are known as generic products or generics.

3. Unsolicited direct mail sent to consumers' homes is often dismissively called junk mail.
4. A series of advertisements for a particular product or company is an advertising campaign.
5. Businesses combining traditional physical shops with online e-commerce operations practice bricks -and-mortar retail.

Part B: Matching Terms

1. ____C____ Cold call
2. ____E____ Franchise
3. ____A____ Billboard (AmE)
4. ____D____ Loyalty card
5. ____B____ B2B

- **A.** Open-air hoarding used for advertising
- **B.** Business-to-Business e-procurement
- **C.** Unannounced sales phone call to someone with no prior contact
- **D.** Card offering reward points based on customer spending
- **E.** Business format run by a franchisee under a franchisor's brand

Part A: Fill in the Blanks

1. Money received from sales is known as revenue or turnover .
2. Costs that do not change when production goes up or down (e.g., rent) are fixed costs.
3. Products that have very good profitability and generate large cash surpluses are cash cows .
4. Customers who owe money to a business are recorded as accounts receivable.
5. Independent outside accountants who examine a company's accounts to see if they give a true and fair view are auditors.

Part B: Matching Financial Terms

1. ___A_____ COGS
2. ___C_____ Goodwill
3. ___B_____ Depreciation
4. ___E_____ In the red
5. ___D_____ Window dressing

- **A.** Cost of Goods Sold (variable manufacturing costs)
- **B.** Reduction in the book value of fixed assets over time
- **C.** An intangible asset representing a company's good reputation
- **D.** Creative accounting making results look better than they are
- **E.** Operating at a financial loss or having a negative bank balance

Part A: Fill in the Blanks

1. The person who is in charge of running a meeting and keeping participants on track is the chairperson or chair, often referred to simply as the chair.

2. A list of items to be discussed during a meeting, sent out in advance, is called the agenda .

3. When negotiators or meeting participants reach a middle-ground solution where both sides make concessions, they reach a compromise .

4. Using cautious language to avoid making overly direct or absolute statements is known in discussion techniques as hedging.

5. When a meeting discussion completely breaks down and no agreement can be reached, it is referred to as a deadlock.

Part B: Matching Meeting Terms

1. ____C____ AGM

2. ____E____ Minutes

3. ____A____ Consensus

4. ____B____ Action points

5. ____D____ Hedging

- **A.** General agreement reached by all participants
- **B.** Specific tasks assigned to individuals to complete after a meeting finishes
- **C.** Annual General Meeting held once a year for shareholders
- **D.** Avoiding direct or committal statements using qualifying language
- **E.** The written record of decisions and discussions made during a meeting

Part C: Short Answer Exercises

1. What is the main responsibility of a meeting chairperson before a meeting begins? . Before the meeting, the chairperson should prepare and review the agenda, clarify the purpose, and ensure participants and arrangements are ready

2. What is the difference between reaching a **consensus** and voting on a decision? Consensus means the group broadly agrees on a decision; voting selects an option by counting votes, even if some people disagree.

Part A: Fill in the Blanks

1. The visual items used during a presentation, such as slides, handouts, or overhead projections, are called visual aids.

2. Establishing a positive connection and good mutual relationship with your audience during a presentation is building rapport.

3. The opening part of a presentation where you welcome the audience and outline your structure is the introduction.

4. Moving around too much or making nervous hand gestures can distract from your body language during a speech.

5. When concluding a presentation, speakers typically open the floor to deal with questions from the audience .

Part B: Matching Presentation Stages

1. ____C____ Visual aids

2. ____B____ Body language

3. ____D____ Rapport

4. ____E____ Q&A session

5. ____A____ Handouts

- **A.** Printed materials distributed to listeners to supplement a presentation
- **B.** Postures, gestures, and facial expressions used while speaking
- **C.** Charts, slides, and diagrams used to illustrate key points visually
- **D.** A harmonious, trusting relationship between speaker and listeners
- **E.** The time at the end of a presentation dedicated to answering inquiries

Part C: Error Correction

Correct the italicized phrases:

1. "During my presentation, I will show you some visual supports." During my presentation, I will show you some visual aids

2. "Let's open the floor for some inquiries from the spectators." Let’s open the floor for some questions from the audience.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 62 through 66.

1. A negotiation style where both sides aim for an outcome that benefits everyone involved is known as a win-win situation.

2. Offering something you value less in exchange for something the other party values less during talks is making trade -offs.

3. When negotiations completely stall and neither side is willing to move or compromise, they have reached a deadlock.

4. An agreement between two or more parties that is enforceable by law after a successful negotiation is a contract.

5. A neutral third party brought in to help resolve a deadlock and mediate an agreement is a mediator.

Part B: Matching Negotiation Tactics

1. ___A_____ Probing

2. ___D_____ Counter-proposal

3. ___B_____ Deadlock

4. ___E_____ Concession

5. ___C_____ Mediator

- **A.** Asking probing questions to discover the other party's underlying needs
- **B.** A stall in talks where neither side will compromise
- **C.** An independent third party assisting in dispute resolution
- **DT.** A responding offer made in reaction to an initial proposal
- **E.** Something given up voluntarily to reach an agreement

Part C: Short Answer Exercises

1. What is the difference between a **hard bargaining** style and a **win-win** style? Hard bargaining focuses on winning and protecting one side's position; win-win negotiation seeks an outcome that benefits both sides

2. Why is checking the final contract details essential after reaching an agreement? Checking the final contract ensures that terms, responsibilities, dates, and costs are accurate and that the written agreement reflects what was agreed.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 36 and 37.

1. When a company sells its shares to the public for the first time, it floats the company in a IPO.

2. Short-term lending to businesses is known as commercial credit .

Part A: Fill in the Blanks

1. The study of how money works, is used, and whether economic activities are profitable is called economics.

2. When a country exports more goods and services than it imports, it maintains a trade surplus.

3. The total monetary value of all goods and services produced within a particular country is its Gross Domestic Product (GDP).

4. A period of negative economic growth where economic output contracts is known as a recession.

5. When a bad recession becomes extremely severe, widespread, and prolonged, it is called a slump or depression.

Part B: Matching Economic Indicators

1. ____C____ Inflation rate

2. ____D____ Trade deficit

3. ____E____ Stagflation

4. ____B____ Trough

5. ____A____ Stagnation

- **A.** A period when the economy is growing very slowly or not at all
- **B.** The lowest point in an economic cycle before output starts rising again
- **C.** The speed at which general consumer price levels are rising
- **D.** When import payments exceed export earnings, creating a trade gap
- **E.** A difficult economic condition combining slow growth with rapid inflation

Part C: Error Correction

Correct the italicized phrases:

1. "The country's economic indicators show a high rate of inflation speeds." The country's economic indicators show a high rate of inflation.

2. "When output reaches its lowest level, it hits a peak before rising." When output reaches its lowest level, it hits a trough before rising.

Part A: Fill in the Blanks

1. Buying or selling securities using confidential information that is not publicly available is illegal insider dealing.

2. A secret agreement among competing companies in the same market to fix prices at a certain level is price fixing .

3. A type of fraud where an employee illegally steals and gets money from their employer is known as embezzlement .

4. The process of hiding the illegal origin of criminal money, often by purchasing property, is money laundering.

5. Directing investment funds exclusively into companies that do not harm people or the environment is ethical investment.

Part B: Matching Crime & Ethics Terms

1. ____D____ Embezzlement

2. ____A____ Counterfeiting

3. ____B____ Bribery

4. ____E____ Code of ethics

5. ____C____ Sweatshop labor

- **A.** Making illegal fake copies of banknotes, documents, or luxury goods
- **B.** Offering or receiving illegal payments to persuade someone to act corruptly
- **C.** Manual labor performed under severely exploitative, underpaid conditions
- **D.** The illegal theft of funds by someone entrusted with managing them within a firm
- **E.** A formal corporate document outlining required moral standards of behavior

Part C: Short Answer Exercises

1. What is the purpose of establishing **Chinese walls** within financial institutions? Chinese walls separate sensitive information between departments to prevent conflicts of interest and inappropriate sharing of confidential information.

2. Why do institutional investors conduct annual **social performance audits**? . Social performance audits assess whether companies act responsibly toward workers, communities, and the environment.

Part A: Fill in the Blanks

1. The overall period during which a project or task should be completed is referred to as the timescale or deadline.

4. A phone extension that is not connected by a physical wire, allowing movement around a home or office, is a cordless phone.

5. A phone number that provides free access for callers, such as an 0800 number, is a toll-free number.

Part B: Matching Etiquette Terms

1. ____B____ Surname

2. ____E____ Smart casual

3. ____D____ Punctuality

4. ____C____ Pager

5. ____A____ Videoconferencing

- **A.** Holding a face-to-face meeting across locations using computers and cameras
- **B.** A family name shared across relatives
- **C.** A device that receives written messages while on the move
- **D.** Arriving at meetings or appointments on time
- **E.** A relaxed yet professional style of dress that avoids full suits

Part C: Short Answer Exercises

1. What is the standard convention regarding names in the English-speaking business world? First names are commonly used in English-speaking business settings, though formal titles and surnames may be appropriate initially or in formal contexts.

2. How do attitudes toward **time** and schedules vary across different business cultures?

Some cultures value strict punctuality and fixed schedules, while others take a more flexible approach and place greater emphasis on relationships.

Part A: Fill in the Blanks

1. A formal meeting open to all shareholders of a company held once a year is an Annual General Meeting or AGM.

2. Before a meeting begins, the chairperson prepares a list of items to be discussed, known as the agenda.

3. During a meeting, the person taking notes records the decisions and discussions to produce the official minutes.

4. When a chairperson wants to open a meeting or direct attention to the first item, they formally . opens / calls to order the meeting.

5. Inviting specific participants to speak during a discussion helps ensure everyone has an opportunity to share their views / opinions.

Part B: Matching Meeting Terms

1. ___C_____ Chairperson

2. ___E_____ Agenda

3. ___D_____ Minutes

4. ___B_____ Action points

5. ___A_____ Venue

- **A.** The official physical or virtual location where a meeting takes place
- **B.** Specific tasks assigned to individuals to execute after the meeting concludes
- **C.** The person responsible for running the meeting and keeping order

- **D.** The written record of what was discussed and decided
- **E.** The structured list of topics scheduled for discussion

Part C: Short Answer Exercises

1. What are the key responsibilities of a chairperson *during* a meeting?

The chairperson guides the discussion, keeps order and time, gives participants a chance to speak, clarifies decisions, and summarizes action points

2. Why is it important to distribute an agenda well in advance of a meeting?

An early agenda lets participants prepare, gather information, and understand the meeting's purpose and topics.

Part A: Fill in the Blanks

1. Using cautious language and qualifying phrases to avoid making overly direct or absolute statements is called hedging.

2. A negotiation approach where both parties work to find solutions that benefit everyone involved is a win-situation.

3. Asking detailed and probing questions during negotiations helps uncover the other party's underlying interests / needs.

4. When negotiators offer something they value less in exchange for a concession from the other side, they are making trade-offs.

5. When a negotiation stalls completely because neither side will compromise or move forward, they have reached a deadlock.

Part B: Matching Discussion & Negotiation Terms

1. ____D____ Hedging

2. ____C____ Consensus

3. ____E____ Probing

4. ____B____ Counter-proposal

5. ____A____ Mediator

- **A.** An independent third party brought in to help resolve a deadlock
- **B.** A responding offer made in reaction to an initial bargaining position
- **C.** General agreement reached collectively by all participants
- **D.** Using cautious, non-committal language to soften statements
- **E.** Asking exploratory questions to investigate underlying interests

Part C: Error Correction

Correct the italicized phrases:

1. "We reached a deadlock, so we made a win-win compromise that pleased nobody."

We reached a deadlock, so we could not reach a win-win compromise that pleased both sides

2. "During the meeting, he used too much hedging so his point was extremely direct and clear."

During the meeting, he used too little hedging, so his point was extremely direct and clear.

Part A: Fill in the Blanks

1. A brief presentation given to inform colleagues or clients about a specific project update or status report is often structured around different types of presentations, such as a product launch.

2. When preparing a presentation, speakers should practice to ensure proper timing, avoiding rushing through the material or exceeding the allocated . time limit / allotted time.

3. Maintaining eye contact, varying vocal tone, and projecting your voice properly are all vital elements of managing your delivery / voice during a speech.

4. Building positive engagement and mutual connection with your audience is essential for establishing good rapport early in your presentation.

5. Visual materials such as slides, handouts, and diagrams used to illustrate key concepts during a speech are called visual aids.

Part B: Matching Presentation Terms

1. ___D_____ Preparation

2. ___A_____ Rapport

3. ___B_____ Body language

4. ___C_____ Visual aids

5. ___E_____ Q&A session

- **A.** A harmonious, trusting relationship established between speaker and listeners
- **B.** Postures, gestures, and physical movements used while speaking
- **C.** Charts, slides, and diagrams used to clarify information visually
- **D.** The structured process of planning, drafting, and organizing your speech
- **E.** The concluding segment dedicated to answering listener inquiries

Part C: Short Answer Exercises

1. What are the key dos and don'ts when preparing the introduction of a presentation?

Start with a clear welcome, introduce the topic and purpose, and give a brief outline. Avoid long, irrelevant openings, reading everything from slides, or making unsupported claims

2. How should a speaker handle difficult or hostile questions during the final question-and-answer period?

Stay calm and respectful, listen fully, clarify the question if needed, answer with facts, and admit honestly when you do not know. Do not argue or take the question personally.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 62 and 63.

1. A negotiation where two parties try to reach an agreement over a contract or dispute is heavily influenced by the initial opening offer / opening position of negotiation.

2. Before entering formal talks, experienced negotiators spend significant time preparing their strategy, identifying their objectives and acceptable walk-away points.

3. The bargaining stage involves making concessions and counter-proposals to move the discussion closer to a mutually acceptable agreement.

4. Different negotiators exhibit different negotiating styles, ranging from cooperative and collaborative to highly confrontational and hard bargaining.

5. When preparing for a complex international deal, understanding cultural nuances is just as critical as analyzing the financial terms of the deal.

Part B: Matching Negotiation Terms

1. ____C____ Bargaining

2. ____D____ Concession

3. ____A____ Counter-proposal

4. ____E____ Negotiating style

5. ____B____ Deal

- **A.** A responding offer made in reaction to an initial bargaining position
- **B.** An agreement or contract reached after successful discussions
- **C.** The active discussion process of trading concessions to reach agreement
- **D.** Something given up voluntarily by one party to encourage agreement
- **E.** The characteristic approach or behavioral pattern adopted by a negotiator

Part C: Error Correction

Correct the italicized phrases:

1. "During the bargaining phase, we refused to make any concessions and immediately signed the contract."

During the bargaining phase, we made concessions and then signed the contract after reaching agreement

2. "His negotiating style was entirely cooperative, meaning he shouted down every proposal made by the other side."

His negotiating style was confrontational, meaning he shouted down every proposal made by the other side

VOCABULARY AND REFLECTION

Words into practice

Applying workplace language to my own academic and professional goals.

RECRUITMENT AND PROFILES

A clear **career objective** helps a recruiter understand the role I hope to pursue.

PROJECTS AND TEAMWORK

An **agenda** sets the topics for a project meeting; **action points** identify what each person will do next.

PRESENTATIONS

I can build **rapport** by acknowledging the audience and use a visual aid to explain an unfamiliar concept.

NEGOTIATION

A **counter-proposal** offers an alternative, while a **compromise** can help a team resolve a disagreement.

QUALITY AND RESPONSIBILITY

A prototype should be **validated** before it is relied upon, and private student information must be handled responsibly.

MY LEARNING REFLECTION

The worksheet activities strengthen vocabulary, sentence construction and professional expression. I will revise unfamiliar words, use them in original sentences and apply them in presentations and emails.

St. Joseph's Group of Institutions
OMR, CHENNAI - 119

EN25C09: Professional English- I (LAB INTEGRATED)

MODEL EXAM I –PRACTICE WORKSHEET

PART - A (15 X 1 = 15 Marks)

Answer ALL questions. Each question carries 1 mark.

1. Fill in the blank with the correct form of the verb given in bracket:

The automated system _____ (monitor) the temperature continuously to ensure safe operation.

Answer: monitors

2. Fill in the blank with the correct past form of the verb given in bracket:

The engineers _____ (record) the vibration readings during yesterday's trial.

Answer: recorded

3. Complete the sentence with the appropriate comparative form of the adjective in bracket:

The newly developed composite material is significantly _____ (strong) than the conventional material while maintaining a lower weight.

Answer: stronger

4. Fill in the blank with an appropriate modal auxiliary verb: (must/can/might)

Engineers _____ follow safety regulations while operating heavy machinery.

Answer: must

5. Fill in the blank with a suitable modal auxiliary verb expressing capability: (can, may, might)

Modern sensors _____ detect even minor changes in temperature.

Answer: can

6. Combine the sentences into a single coherent sentence using a suitable relative pronoun:

(a) The laboratory developed a new testing device. (b) The device measures material strength with high precision.

Answer: the laboratory developed a new testing device that measures material strength with high precision

7. Complete the sentence using the correct form of the verb in bracket (First Conditional – If Clause):

If the temperature rises (rise) above the permissible limit, the cooling system will activate automatically.

8. Complete the sentence using the correct form of the verb in bracket (Third Conditional – Past Unreal Conditional):

If the technician had inspected the circuit earlier, the equipment _____(not / fail) during operation.

Answer: would not have failed

9. Combine the following sentence using an infinitive of purpose (to + verb):

The mechanics installed dual damper springs. They wanted to isolate chassis resonance.

Answer: the mechanics installed dual damper springs to isolate classic resonance

10. Fill in the blank with the gerund form of the verb in bracket after the preposition:

The research team reduced energy consumption by _____ (optimize) the motor control algorithm.

Answer: optimizing

11. Convert the following active voice into the Impersonal Passive Voice:

The lab assistant poured 50 mL of hydrochloric acid into the titration flask.

Answer: 50 ml of hydrolchloric acid was poured into the titration flask

12. Fill in the blank with the appropriate adverbial form derived from the adjective in bracket:

The robotic arm moves _____ (smooth) to ensure accurate positioning of the component.

Answer: smoothly

3. ***Combine the technical statements into a single cohesive sentence using a defining or non-defining relative clause:***

   The engineer designed a new cooling system. It reduces the temperature of industrial machines.

   Answer:
   (Non-defining alternative: a new cooling system, which reduces the temperature of industrial machines.)

4. ***Complete the following conditional sentences logically:***

   (a) If the battery voltage drops below the required level,
   Answer :The device will shutdown automatically .

   (b) If the technician had checked the connections earlier,
   Answer The failure would not have occured.

5. ***Convert the following active sentences into the Impersonal Passive Voice suitable for formal engineering reports:***

   The laboratory assistant heated the solution to 80°C before testing.

   Answer:
   The solution was heated to 80 c before testing

6. ***Rewrite the following direct engineering query into Reported (Indirect) Speech:***

   The project manager asked the technician, "Have you inspected the pressure valves before starting the compressor?"

   Answer:
   The project manager asked the technician whether he had inspected the pressure valves before starting the computer

7. ***Identify and correct the grammatical errors involving mass/uncountable nouns in the following sentences:***

   (a) ***The engineer received many feedbacks on the new design.***
   Answer ;The engineer received a lot of feedback (not 'feedbacks') on the new design

   (b) ***The students received several useful advices from their teacher.*** Answer : The students received several pieces of useful advice (not 'advices') from their teacher.

8. ***Rewrite the sentences using an Infinitive of Purpose or a Gerund construction:***

13. Rewrite the direct into indirect speech:

The project supervisor asked the engineer, "Did you calibrate the pressure sensor before testing?"

Answer: the project supervisor asked the engineer whether(if) he had calibrated the pressure sensors before testing

14. Identify the incorrect noun form and rewrite the sentence correctly:

The laboratory purchased several new equipments for conducting material testing.

Answer: incorrect noun: equipments .correct sentence :the laboratory purchased several new pieces of equipment for conducting material testing

15. Fill in the blank using the correct irregular comparative form (better, worse, farther/further, less, more):

Because the heat sink had poor thermal paste contact, heat dissipation was _____ (bad) than expected.

Answer: worse

PART - B(10X2=20Marks)

Answer all questions. Each question carries 2 marks.

1. ***Rewrite the following active operational and laboratory description in the Simple Past Tense:***

   The engineer calibrates the pressure sensor and verifies its accuracy.

   Answer:
   the engineer calibrated the pressure sensor and verified its accuracy

2. ***Draft two comparative sentences comparing a laptop and a desktop computer in terms of portability and screen size.***

   Answer **(Portability):a laptop is more portable than a desktop computer**

   Answer ***(Screen Size):*** A desktop computer usually has a large screen than a laptop

(a) ***The technician wears safety gloves. He wants to protect his hands.*** rightarrow
Answer:The technician wears safety gloves to protect his hands.

(b) ***The cooling fan operates continuously. It prevents the motor from overheating.*** Answer:The cooling fan operates continuously to prevent the motor from overheating_

9. ***Fill in the blanks with the correct adverbial forms of the bracketed words:***

a) The machine operates efficiently.(efficient) to reduce energy consumption.

(b) The technician checked the electrical connections carefully (careful) before starting the machine.

10. ***Insert suitable modal auxiliary verbs to match the specified functional meaning:***

(a) The robotic arm can (capability) lift heavy components with precision.

(b) Visitors must not (strict prohibition) enter the testing area without authorization.

PART - C(5X13=65Marks)

Answer all questions (Choose either 'a' or 'b' where options are provided). Each question carries 13 marks.

Question 26

26. a) Write a set of eight clear, imperative safety instructions to promote safe and responsible use of the internet and protect users from cyber threats. ***(13 Marks)***

o ***Workspace / Planning Area:***

1. Create strong, unique passwords for every account, and never reuse them.
2. Enable two-factor authentication on all important accounts.
3. Do not click suspicious links or open attachments from unknown senders.
4. Keep your operating system, browser and antivirus software updated.
5. Never share passwords, OTPs or bank details with anyone online
6. Avoid public Wi-Fi for banking, or use a trusted VPN.
7. Download apps and files only from official stores and verified we
8. Report cyberbullying, scams and fraud immediately to the cyber crime helpline (1930) or cybercrime.gov.in.

Question 27 (Choose either 27.a or 27.b)

27. a) Write a descriptive essay of 250 words about "A Traditional art form in your region and how modern initiatives can preserve its cultural significance." Discuss its historical origins, traditional practices, and ways to promote and sustain it among younger generations. ***(13 Marks)***

OR

27. b) Write a structured travel plan and descriptive feature (250 words) on "An Educational Trip to a Place of Historical and Cultural Importance." Include travel arrangements, important landmarks, local food experiences, and observations of the region's cultural heritage and traditions. ***(13 Marks)***

Q27.a.

Bharatanatyam: a traditional art form of Tamil Nadu Outline: Introduction (origin) - Body 1 (traditional practices) - Body 2 (preservation and promotion) Conclusion. Word count: 250 Bharatanatyam is the pride of Tamil Nadu and one of India's oldest classical dance forms. Its roots lie in the ancient Tamil epic Silappathikaram and in the temple sculptures of Thanjavur and Chidambaram, which depict poses described in the Natya Shastra. Originally called Sadir or Dasi Attam, it was performed by devadasis in temples as an offering to the deity. In the twentieth century, Rukmini Devi Arundale and E. Krishna Iyer revived it and restored its dignity on the public stage. Traditionally, the dance combines nritta (pure movement), nritya (expressive storytelling) and natya (drama). Dancers wear pleated silk costumes, temple jewellery and ghungroos, and use precise footwork, hand gestures called mudras and facial expressions to narrate mythological stories. The art is taught through the guru-shishya parampara, in which students train for years under a master. The training ends with the arangetram, the debut performance. Today, rapidly changing entertainment habits threaten this heritage, but modern initiatives can protect it. Schools and colleges can introduce dance classes and cultural clubs. Online platforms can stream performances and tutorials. Government scholarships and festivals such as the Margazhi season in Chennai can support young artists. Collaborations with film, fusion music and digital storytelling can attract youth without losing the tradition's core, while video archives can safeguard rare compositions. In conclusion, Bharatanatyam is more than entertainment; it is a living record of our history, spirituality and identity. By combining tradition with technology and encouraging young learners, we can ensure its anklet bells keep ringing for generations.

Q27.b **An educational trip to Mahabalipuram Travel plan**

Destination: Mahabalipuram, about 55 km from Chennai

Transport: College bus via East Coast Road, leaving 7:00 AM and returning by 6:00 PM

Arrangements: Principal's permission, accompanying faculty, official guide, entry tickets, first-aid kit

Schedule: Shore Temple, Pancha Rathas, Arjuna's Penance, lunch, sculpture street Descriptive feature

(Word count: 250)

Our department organised an educational trip to Mahabalipuram, a UNESCO World Heritage Site about 55 km from Chennai. The visit aimed to help us understand the history and culture of Tamil Nadu through first-hand observation. We left the college by bus at 7 a.m. and reached the ancient Pallava port town in ninety minutes along the scenic East Coast Road. Our first stop was the Shore Temple, an eighth-century granite structure standing proudly against the sea breeze. Next we visited the Pancha Rathas, five monolithic chariots carved from single rocks, and Arjuna's Penance, a giant relief narrating mythological scenes. Krishna's Butter Ball, a massive boulder balanced on a slope, amazed everyone. Our guide explained Dravidian architecture and the maritime trade between the Pallavas and Southeast Asia. For lunch, we enjoyed local food: fresh seafood, sambar rice, curd rice and crispy vadai at a beachside restaurant, followed by filter coffee. The simple, flavourful meals showed us how closely cuisine is tied to coastal culture. Observing the region, we noticed that stone carving is still a living tradition. Local sculptors chisel idols using techniques passed down through generations. The residents were warm and proud of their heritage, and the annual Mamallapuram Dance Festival shows how the culture is celebrated. We returned by 6 p.m., tired but enriched. Everyone carried home notes, photographs and memories. The trip taught us that history is best learned by standing in front of it, and it deepened our respect for the artisans who created this timeless legacy.

28. b) Draft a formal Letter of Request to the Principal of your college seeking permission to participate in a technical workshop on Artificial Intelligence and Emerging Technologies organised by a reputed institution. Mention the objectives of participation, the expected learning outcomes, and the arrangements required. ***(13 Marks)***

CSE, I Year
St. Joseph's College of Engineering, OMR, Chennai - 119
20 October 2026

The Principal
St. Joseph's College of Engineering
OMR, Chennai - 119

Subject: Request for permission to attend a technical workshop on Artificial Intelligence and Emerging Technologies

Respected Sir/Madam,

I am a first-year student of **CSE. I request your permission to participate in a technical** workshop on "Artificial Intelligence and Emerging Technologies", organised by [Name of Institution] on [date] at [venue].

Objectives: To gain practical knowledge of AI tools and concepts, learn about emerging technologies from industry experts, and strengthen my technical skills for future projects.

Expected learning outcomes: I expect to understand the basics of machine learning, gain hands-on experience and earn a participation certificate. I will also share what I learn with my classmates.

Arrangements required:

1. Permission for absence from classes on the workshop days, with a commitment to cover the missed portions.
2. A bonafide certificate for registration.
3. Permission to travel to the venue at my own expense.

I will follow the rules of both institutions. I shall be grateful if you grant my request.

Thanking you,

Yours obediently,
Glenn christo Roll No. 26CS1 236

Question 29 (Choose either 29.a or 29.b)

29. a) Compose an analytical essay (250–300 words) comparing the advantages and disadvantages of Artificial Intelligence–Based Assessment versus Traditional Teacher-Based Assessment in engineering education. Evaluate assessment accuracy, feedback time, fairness, and the role of human judgement. ***(13 Marks)***

OR

29. b) Write a compare-and-contrast essay of 250–300 words analysing the advantages and disadvantages of Living in Urban Areas versus Rural Areas. Discuss employment opportunities, cost of living, access to education and healthcare, and quality of life. ***(13 Marks)***

Question 28 (Choose either 28.a or 28.b)

28. a) Write a formal Letter of Request to the Librarian of your college seeking permission to extend library working hours during the semester examination period. Explain the academic benefits, the expected student participation, and the arrangements required to ensure proper use of library facilities. ***(13 Marks)***

Glenn christo Roll No. 26CS1 236

CSE, I Year
St. Joseph's College of Engineering, OMR, Chennai - 119
20 October 2026

The Librarian
St. Joseph's College of Engineering
OMR, Chennai - 119

Subject: Request for extension of library working hours during semester examinations

Respected Madam/Sir,

I am a first-year student of **CSE. I request your kind permission to extend the library·s** working hours during the upcoming semester examinations.

During examinations, students need a quiet, well-resourced place to study. The library's reference books, previous question papers and journals are not easily available elsewhere, and hostel students find it hard to study in shared rooms. Hours extended until 9:00 PM would allow systematic revision, reduce last-minute stress and improve academic performance.

I expect about 100 to 150 students to use the library daily. To ensure proper use, I suggest that:

1. A staff member be on duty during the extra hours.
2. Entry be allowed only with a valid ID card.
3. Silence and library rules be strictly followed.
4. Lights and fans be arranged in the reading hall.

I assure you of the students' full cooperation. Kindly consider my request.

Thanking you,

Yours faithfully,
Glenn christo Roll No. 26CS1 236

Q29.a AI-based vs teacher-based assessment in engineering education

Matrix: Accuracy, feedback time, fairness and human judgement, compared for AI and teachers.

Word count: 266

Assessment is central to engineering education, and the rise of Artificial Intelligence has sparked a debate between AI-based and traditional teacher-based evaluation. On accuracy, AI grades objective answers, code and numerical problems consistently and without fatigue. Teachers, however, interpret creative or partially correct solutions better, where an algorithm may miss the student's intent. Feedback time is AI's greatest strength: students receive results and suggestions within seconds, while manual evaluation of large classes can take weeks and delay improvement

Fairness is a mixed issue. An AI tool is free from mood, favouritism and tiredness, so every script is judged by the same rules. However, it may carry bias from its training data and can penalise unusual but valid answers. Teachers may be subjective, but they can consider effort, context and progress. Human judgement remains irreplaceable. Teachers evaluate originality, ethical reasoning, teamwork and communication, qualities engineers need but machines cannot fully measure. They also provide motivation and personal mentoring. AI, on the other hand, offers analytics that reveal learning gaps across a whole class. AI assessment also has disadvantages, including high setup cost, technical failures, data privacy risks and over-dependence on technology. Traditional assessment is slow and inconsistent for large groups, yet it builds a personal bond between teacher and student. In conclusion, neither method is perfect alone. The best approach is a blended model in which AI handles routine, objective evaluation and instant feedback, while teachers assess creativity, reasoning and character. Such cooperation will make assessment faster, fairer and more meaningful. In engineering education, where skills and problem-solving matter most, this balance is especially valuable for students.

Q29.b Living in urban areas vs rural areas

Matrix: Employment, cost of living, education and healthcare, and quality of life, compared for urban and rural **Word count:** 275

Choosing between city and village life is a decision many young engineers face, as both have clear benefits and drawbacks. Employment: Urban areas offer a wide range of jobs in IT, manufacturing, finance and services, with higher salaries and career growth. Cities also host internships, startups and industry networking that help fresh graduates. Rural areas depend mainly on agriculture and small industries, so opportunities are limited and many young people migrate. Cost of living: Cities are expensive; rent, transport, food and utilities consume a large share of income. However, higher salaries in cities do not always translate into higher savings. Villages are cheaper, with lower housing costs and fresh local food, although earnings are also lower. Education and healthcare: Cities have reputed colleges, coaching centres, specialist hospitals and advanced diagnostic facilities. Urban children also enjoy wider exposure to libraries, laboratories and extracurricular activities. Rural areas often lack good schools, higher education institutions and hospitals, so people travel long distances for emergency care. Digital learning and telemedicine are now narrowing this gap. Quality of life: Villages offer clean air, open space, peace and strong community bonds. Rural residents also face fewer transport options and limited entertainment. Cities bring pollution, traffic, noise, overcrowding and stress, but they also provide entertainment, better transport, high-speed internet and modern amenities. Improved roads and internet in villages, together with the spread of remote work, are reducing the difference between the two. To conclude, urban life suits those seeking career growth and facilities, while rural life suits those who value affordability, calm and community. With better infrastructure in villages and better planning in cities, both can offer a good quality of life.

Question 30 (Choose either 30.a or 30.b)

30. a) Draft a personal email to your school friend sharing your experiences during the first semester of your engineering course. Describe your new friendships, classroom activities, adjustment to college life, and expectations for the upcoming semester examinations. ***(13 Marks)***

OR

30. b) Draft a personal email to your school friend describing your experience attending the orientation programme for first-year engineering students at your college. Highlight the activities conducted, the introduction to academic facilities and college regulations, and how the programme helped you understand college life and prepare for your academic journey. ***(13 Marks)***

Q30.b Email about the orientation programee

To:deepak001@gmail.com
Subject: My orientation programme at college

Hi Deepak,

How are you? I want to tell you about the orientation programme for first-year students at my college. It was a wonderful start. The programme began with a welcome address by the Principal, followed by icebreaking games and group activities that helped us meet our classmates. Seniors shared their experiences and gave useful advice about studies and campus life. We were then taken on a tour of the library, laboratories, workshops, sports ground and canteen. The faculty explained the college rules, including attendance requirements, the dress code and the examination system. The programme helped me understand college life and removed much of my nervousness. I now feel prepared and motivated for my academic journey. Please write back and tell me about your college too. Hoping to meet you soon!

Best wishes,
Deepak

Q30.a Email about the first semester

To:deepak001@gmail.com
Subject: My first semester in engineering

Hi,Deepak

I hope you are doing well! I wanted to tell you about my first semester. College felt strange at first, but I have made great friends. My roommate and classmates have become like family, and we study and have fun together. In class, we have lab sessions, group presentations and coding practice, which are very different from school. I enjoy the hands-on experiments the most. Adjusting to hostel life took time, especially managing my schedule and daily chores, but I now feel more independent and disciplined. The workload is heavier, so I have learnt to plan my time and make notes regularly. The semester examinations are coming up. I am a little nervous but confident, as I revise daily and do group study. How is your college going? Do write back and tell me everything. Let's meet during the holidays!

Take care,
Glenn christo
