Editing notes

The common vocabulary worksheets are the class question papers; the answer lines are left for the student to complete. Personal details, projects and results come from the first version of this portfolio. Items that are plans, ideas or learning notes are labelled that way. No completed product, pilot, internship, certification or award is

PORTFOLIO OVERVIEW

Jaivanth Paul Enoch

B.E. Computer Science and Engineering | 2026–2030 | First Year

“Build strong foundations today for intelligent products tomorrow.”

A first-year profile

This portfolio records my current learning, early project work, career direction and Professional English coursework. It presents a starting point for growth in software engineering, AI and machine learning—not a claim of completed professional experience.

Current foundation	C, C++, Python; programming fundamentals and DSA practice
Career direction	Software engineering, with a long-term interest in AI/ML and SaaS products
Project focus	Rural College Learning Platform — planned education-technology concept
Early project work	Expense Tracker, Basic Calculator and Chatbot
Professional presence	GitHub and LinkedIn profiles; building a record of genuine learning and project progress

What this portfolio contains

01 Profile & career direction	About Me, resume, skills, roadmap and professional profiles.
02 Communication & project work	Soft-skills coursework, the learning-platform concept and project pitches.
03 Reflection & development	SWOC analysis, career inspiration, milestones and English-learning reflection.
04 Course records	NPTEL topic notes, vocabulary worksheets, personal applications and learning summary.

Accuracy note: Planned projects and learning goals are labelled as such. No completed product, pilot, internship, award or professional certification is claimed.

SECTION 01

About Me

Who I am, what drives me and where I am headed

“I chose CSE to build strong programming and problem-solving skills, so I can create software that helps real people.”

I am a first-year Computer Science and Engineering student at St. Joseph's College of Engineering. I enjoy turning ideas into small working projects and I want to grow into an AI-focused software engineer. My first big idea is a learning platform for rural colleges, where students who have limited digital support can reach course material, track their progress and get AI-assisted help. In the long run I want to build useful AI-powered products and, one day, a SaaS company of my own.

Snapshot

Studying	B.E. Computer Science and Engineering (2026 - 2030), Roll No. 26CS159
Core target	Software Engineer, then AI/ML specialisation and AI-powered products
Currently learning	C, C++, Python, Data Structures and Algorithms, Git/GitHub, AI/ML basics
Learning style	Learn by building small projects, then improve through feedback
Long-term goal	Build AI and SaaS products that solve real user problems
Strength	Curiosity about new technology, clear direction, interest in practical projects

Areas of Interest

Software Development
Writing clean programs and building small applications from idea to working result.

AI and Machine Learning
Using Python to learn how models work and how AI can help real users.

Education Technology
Making digital learning easier for students in rural and underserved colleges.

Entrepreneurship
Turning a useful idea into a product people can actually use (SaaS).

SECTION 02

Resume

A concise first-year profile focused on software engineering and AI/ML

Name	Jaivanth Paul Enoch
Role	Aspiring Software Engineer | Long-term focus: AI and Machine Learning
College	St. Joseph's College of Engineering | CSE | 2026 - 2030 | Roll No. 26CS159
Email	jaivanth.p2008@gmail.com
GitHub	github.com/jaivanth-cse
LinkedIn	linkedin.com/in/jaivanth-paul-enoch-117a04440/

Profile

First-year Computer Science and Engineering student building programming fundamentals in C, C++ and Python while exploring Data Structures and Algorithms, Git/GitHub, software development and AI/ML. Interested in turning practical problems into useful software and eventually building AI-powered products and SaaS solutions.

Skills

Programming	C • C++ • Python
Currently learning	DSA • Git/GitHub • Python for AI/ML
Career direction	Software Engineering • AI/ML • SaaS

Projects and Activities

- **Rural College Learning Platform** - Google Classroom-style learning platform concept for rural colleges (planned, see Section 06).
- **Expense Tracker** - foundational application for organising expense records.
- **Basic Calculator** - introductory programming project.
- **Chatbot** - introductory conversational software project.
- **Ignite 360** - college hackathon meetup attended; hackathon participation is a future target.

Awards and Certifications

No competition awards or completed professional certifications are claimed at this stage. Future certifications and hackathon achievements are shown as plans.

SECTION 03

Skills, Roadmap and Achievements

Tech stack, English level and the path ahead

Tech Stack and Tooling

Domain	Tools
Languages	C, C++, Python (learning and practising)
Web (planned)	HTML, CSS, JavaScript, Node.js with Express
Databases (planned)	SQLite or MongoDB, SQL basics
AI/ML (learning)	Python for AI/ML, ML fundamentals
Version control	Git, GitHub, VS Code

English Skills (CEFR)

Skill	Level	Source
Speaking	B1 Intermediate	Cambridge Speak & Improve
Writing	Baseline test planned	Cambridge Write & Improve
Course practice	In progress	Interchange Level 2 workbook

Career Roadmap

DONE	Started B.E. in Computer Science and Engineering; chose a career direction in software and AI/ML; wrote a SWOC analysis.
IN PROGRESS	Building foundations in C, C++, Python and DSA; setting up GitHub; planning the learning platform.
GOAL	Finish three to four small projects, join a hackathon, keep GitHub active.
LONG-TERM	AI-focused software engineer, then AI-powered products or a SaaS startup.

Certifications and Achievements

- CEFR B1 in speaking: Speak & Improve (Cambridge).
- Attended the Ignite 360 college hackathon meetup.
- Built early projects: Expense Tracker, Basic Calculator and Chatbot.
- B.E. candidate in Computer Science and Engineering, batch 2026 - 2030.

GitHub Activity (Starting Point)

Account	Planned first repositories
github.com/jaivanth-cse	Profile README, C-Practice, Expense-Tracker, Learning-Platform

Every journey starts small. Building and sharing projects is the plan to grow this baseline.

SECTION 04

GitHub and LinkedIn Profiles

One professional identity across both platforms

GitHub Profile

Display name	Jaivanth-dev
Link	github.com/jaivanth-cse
Headline	CSE Student | Software Development | DSA | Exploring AI & Machine Learning
Username	jaivanth-cse

About: First-year CSE student exploring software development, DSA and AI/ML. Featured public repository: Inferno-AI, an AI chat assistant. I use GitHub to document my learning and project progress.

Area	Tools	Status
Languages	C, C++, Python	Foundation / learning
Version control	Git, GitHub	Learning / using
AI / ML	Python for AI/ML, ML fundamentals	Learning
Development	Software development fundamentals	Learning

LinkedIn Profile

Link	linkedin.com/in/jaivanth-paul-enoch-117a04440/
Headline	CSE Student | Software Development | AI/ML | Exploring Emerging Technologies
Education	St. Joseph's College of Engineering, CSE, 2026 - 2030 (First Year)
Skills	C, C++, Python, DSA (learning), Git/GitHub, AI/ML fundamentals (learning)

About: CSE student interested in AI/ML, software and entrepreneurship, strengthening programming skills through practice and small projects. My goal is to grow into an AI-focused software engineer who builds products around real user needs.

Project and experience: early project work including a rural-college learning platform idea, an expense tracker, a calculator and a chatbot. Hackathons and deeper projects are part of the planned growth path.

SECTION 05

Soft Skills Coursework

Communication Skills: 8-week course summary

“Communication skills grow in layers.”

Week	Topic	Key ideas I learned
1	The Basics	Communication goes both ways. A clear message has a purpose, knows its audience and uses simple words.
2	Presentation and Interaction	Plan a start, middle and end. Voice, pace and eye contact keep listeners with you.
3	Visual, Nonverbal, Aural	Body language speaks too. Slides should be simple and support the speaker.
4	Individuals, Groups, Cultures	Teams work better when roles are clear and cultural differences are respected.
5	Emotional and Social Skills	Empathy and calm handling of conflict build trust.
6	Creativity and Problem Solving	Define the problem, list options, choose, act, review. Question assumptions.
7	Motivation, Persuasion, Leadership	Persuade with logic and credibility. Aim for win-win results.
8	Survival Strategies	Time management, clear writing and well-being keep you steady.

Why It Matters to Me

Software engineers explain ideas, read requirements and work in teams. For a hackathon pitch or a startup idea, clear speaking and writing matter as much as code. These weeks give me a plan to improve how I present my projects.

Note: summarised from the course topics. Check against your own class notes before submission.

SECTION 06

Featured Project: Rural College Learning Platform

Making organised digital learning easy for underserved colleges

Project lead	Jaivanth Paul Enoch
Project	AI-Powered Rural College Learning Platform (planned)
Domain / Level	EdTech, Full-Stack Web, AI | 1st Year CSE, Beginner

“Our goal is simple: give every student, even in a small college, a clear place to learn and get help.”

The Challenge

Students in rural or underserved colleges often have limited access to organised digital learning. Notes are scattered across chat groups, teachers cannot easily see who is falling behind, and students do not always get timely help with doubts.

Scattered Materials
Notes and assignments live in many places and get lost.

No Progress View
Teachers cannot easily track how each student is doing.

Doubts Go Unanswered
Students wait too long for help outside class hours.

Low Connectivity
The tool must stay light and simple for weak internet.

The Solution

A simple, mobile-friendly web platform, like a lightweight Google Classroom, where teachers share resources and assignments, students track their progress, and an AI assistant helps with doubts. The first version stays small and reliable before any extra features.

How It Works

Step	Action	Result
1. Share	Teacher uploads notes and creates an assignment	Class resource created
2. Notify	Students see the new item on their dashboard	Students informed
3. Learn	Student opens material and submits work	Submission recorded
4. Ask	Student asks a doubt; the AI assistant suggests an answer	Doubt support
5. Track	Dashboards show progress for student and teacher	Progress visible

Key Features, Stack and Plan

- **Features:** class resources, assignments, progress tracking, doubt support, learning recommendations, teacher and student dashboards.
- **Stack:** HTML, CSS, JavaScript front end; Node.js with Express; SQLite or MongoDB; Python and an AI model for the assistant; Git and GitHub.
- **Plan (14 weeks):** learn JavaScript basics and talk to students and teachers about needs (1-3); build the front end (4-6); add back end, login and progress tracking (7-10); add the AI doubt assistant, test with one classroom group and deploy (11-14).
- **Safety and trust:** student data kept private, role-based access (student, teacher, admin), AI answers marked as suggestions.
- **Future scope:** offline-friendly mode, Tamil language support, SMS alerts, partnerships with colleges and NGOs.

Status: this is a planned project. No finished product or pilot is claimed.

SECTION 07

90-Second Project Pitch

A structured pitch script

1. The Problem (30 sec)

“Many students in rural colleges do not have an organised place to learn online. Notes are scattered, teachers cannot see who needs help, and doubts stay unanswered. Good students fall behind only because the support is missing.”

2. The Solution (30 sec)

“Meet the Rural College Learning Platform. Teachers share notes and assignments in one place. Students submit work and track progress. An AI assistant helps with doubts any time of the day, and teachers see simple dashboards of how the class is doing.”

3. Feasibility and Plan (30 sec)

“We start small, with one classroom group. We use simple tools: HTML, CSS, JavaScript, Node.js and a database, and add the AI assistant after the basics work. Success means students who learn more, and teachers who spend less time chasing papers.”

Team / hackathon version

“We are building a practical learning platform for colleges that need a simpler digital classroom. The long-term vision is AI-assisted learning that stays easy to use and scalable.”

Elevator pitch

“Hi, I'm Jaivanth Paul Enoch, a first-year CSE student at St. Joseph's College of Engineering. I'm building my foundation in C, C++ and Python while exploring DSA, AI/ML and software development. My long-term goal is to become an AI-focused software engineer and build products that solve real problems.”

Pitch note: drafted from my project plan; it can be adjusted after talking with students and teachers.

SECTION 08

SWOC Analysis: Software and AI Career Path

Strategic evaluation of my own profile

Target profile	1st Year CSE Student (Roll No: 26CS159)
Target domain	Software Engineering with AI/ML
Core base	C, C++ and Python programming

Strengths (Internal)
- Curiosity about emerging technology
- Interest in practical software projects
- Clear long-term interest in AI/ML
- Early projects already tried

Weaknesses (Internal)
- Limited real-world development experience
- DSA and problem solving still developing
- Need for consistent project execution
- Spoken English at B1, can improve

Opportunities (External)
- Hackathons and technical events
- Open-source and GitHub growth
- Free AI/ML learning resources
- College technical communities

Challenges (External)
- Rapidly changing AI landscape
- Strong competition in software roles
- Balancing academics and technical learning
- Slow progress delaying project readiness

SWOC Action Direction

Build: use curiosity to create small, complete projects. **Improve:** practise DSA in a steady order instead of random hard problems, and raise speaking confidence. **Explore:** move from Python basics to AI/ML once the core is strong. **Manage:** keep a weekly timetable that protects academics and coding time.

90-Day Action System

- Strengthen C, C++ and Python fundamentals through consistent coding.
- Practise DSA progressively instead of chasing random difficult problems.
- Keep GitHub active with genuine projects and learning evidence.
- Explore AI/ML through Python after the core programming is strong.
- Prepare one presentable project for a hackathon or technical event.

SECTION 09

Career Hero: Satya Nadella

A software engineer who became one of the world's most respected leaders

Full name	Satya Narayana Nadella
Role	Chairman and CEO, Microsoft (CEO since February 2014)
Education	Manipal Institute of Technology; University of Wisconsin-Milwaukee; University of Chicago Booth
Known for	Cloud (Azure), AI and culture change

Biographical Summary

Satya Nadella is an engineer by training and a leader by choice. He joined Microsoft in 1992, held leadership roles across enterprise and consumer businesses, and became CEO in 2014. He is known for a thoughtful style: listen first, keep learning and lead with empathy.

Leadership Traits

Empathy
Good products start with understanding people.

Growth Mindset
Moved Microsoft from a know-it-all to a learn-it-all culture.

Collaboration
Teamwork and partnership over ego.

Calm Vision
Early, steady bets on cloud and AI.

Why He Inspires Me

His career joins engineering depth with human-centred leadership, which is exactly the mix I want for AI and software. My takeaway is not to copy his path but to learn the principles: build fundamentals, keep learning as technology changes, work well with people, and build technology that solves meaningful problems. I want to treat mistakes as feedback and understand users before I write code.

Source check: Microsoft's official leadership page and biography. Verify the final reference list with your faculty's requirements.

SECTION 10

Four-Year Milestones

A practical sequence from fundamentals to AI-powered products

Year	Focus	Deliverable	Credential target
Year 1 (2026-27)	Programming and DSA foundations	3-4 small projects and an organised GitHub	One verified beginner or academic credential
Year 2 (2027-28)	Software engineering, stronger DSA	1-2 substantial applications, hackathon participation	A development or cloud credential
Year 3 (2028-29)	AI/ML specialisation	A deployable AI project, internship-ready portfolio	A verified AI/ML credential
Year 4 (2029-30)	Production and career launch	Flagship AI/software product or SaaS prototype	Advanced role-aligned credential, if useful

Presentation Script

My name is Jaivanth Paul Enoch, and I am a first-year Computer Science and Engineering student at St. Joseph's College of Engineering. My immediate goal is to become a strong software engineer by building a solid base in programming and problem solving. I am working with C, C++ and Python, and learning Data Structures and Algorithms, Git/GitHub and AI/ML fundamentals.

My long-term goal is to move into artificial intelligence and machine learning and create useful software products, especially where software, AI, SaaS and entrepreneurship meet.

My roadmap is simple: build fundamentals in the first year, strengthen software projects in the second, specialise in AI/ML in the third, and use the final year to build production-ready work for a strong career or entrepreneurial path.

English Assessment and Interchange Reflection

Communication progress and a forward-looking learning plan

Assessment	Reported result
Cambridge Speak & Improve	B1 Intermediate (CEFR) - speaking
Cambridge Write & Improve	Baseline attempt planned
Cambridge Interchange Level 2	Coursework in progress

Only results I actually have are listed. Plans are marked as plans.

Speak & Improve: next goal

Improve fluency, confidence, pronunciation and structured speaking through regular practice.

What the Interchange exercises help me practise

Short listening, reading and language activities improve how I understand instructions, pick suitable expressions and answer in complete sentences.

How this connects with my goals

A software engineer must explain a bug clearly, read requirements and present a feature. A hackathon or startup pitch also needs clear, confident speaking.

Communication improvement plan

- Speak for 2-3 minutes daily on a technical or general topic.
- Practise introductions, project explanations and short presentations.
- Record some sessions and review clarity and pace.
- Build technical vocabulary and use it in complete sentences.
- Repeat a speaking assessment later to measure progress.

Reflection

A B1 speaking result is a good starting reference, not the finish line. I will use it to find weak areas and make steady, realistic progress.

Week 1 - Lecture 1

Introduction 1: Highlights of Developing Soft Skills

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

Soft skills are the habits that help us listen, speak clearly, prepare, work with others and accept feedback. A degree opens doors, but behaviour decides how well knowledge is used.

Understanding and interpretation

Check that the other person understood the message, not just that I finished speaking.

My learning and personal connection

When I explain my learning platform, I should confirm that a teacher or classmate understands the steps.

Practice activity for this week

Explain the platform idea aloud in one minute, then ask a listener to repeat it back.

Learning note based on the lecture topics; this is not a claim of verified NPTEL course completion.

Week 2 - Lecture 2

Introduction 2: Further Highlights of Developing Soft Skills

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

Self-awareness leads to growth. Looking at how I react to pressure, mistakes and new work shows strengths and gaps. Managing phone use, reading habits and trustworthy behaviour are everyday soft skills.

Understanding and interpretation

Prepare for a purpose: know the audience, organise points, use simple evidence, invite questions.

My learning and personal connection

A teacher, a student and a hackathon judge need different explanations of the same project.

Practice activity for this week

Prepare two short versions of my project pitch, one for a teacher and one for a student.

Learning note based on the lecture topics; this is not a claim of verified NPTEL course completion.

Week 3 - Lecture 3

Mindset 1: Definition and Types

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

A mindset is a set of beliefs that shapes how I read situations. Fixed thinking says a mistake proves I cannot do it. Growth thinking asks what method or support would improve the result.

Understanding and interpretation

Growth mindset is not blind positivity. A task can still be hard, but effort and strategy can change the result.

My learning and personal connection

I do not know full-stack or AI/ML yet. That is a starting point for a plan, not a reason to quit.

Practice activity for this week

Pick one hard topic, such as recursion in DSA, and write a three-step learning plan.

Learning note based on the lecture topics; this is not a claim of verified NPTEL course completion.

Week 4 - Lecture 4

Mindset 2: Learning Mindsets

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

Learning works best when hard work is treated as something I can improve with strategy, feedback and revision. Avoiding hard tasks to protect confidence blocks growth.

Understanding and interpretation

Good feedback is specific. Instead of saying I am bad at DSA, I name the weak concept and compare my answer with a worked example.

My learning and personal connection

A classmate who finds my project screen confusing gives me real information to improve it.

Practice activity for this week

Ask a peer to review one project screen and note one change I made because of the feedback.

Learning note based on the lecture topics; this is not a claim of verified NPTEL course completion.

Week 5 - Lecture 5

Mindset 3: Secrets of Developing Growth Mindsets

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

Growth mindset grows through repeated action: attainable goals, welcoming correction, learning from peers and measuring progress. Turning a negative thought into a hopeful one helps only if action follows.

Understanding and interpretation

A good goal has a clear outcome, a practice schedule and a way to review mistakes. Progress is rarely a straight line.

My learning and personal connection

Weekly coding practice and small projects support my AI/ML goal without pretending the big projects are finished.

Practice activity for this week

Solve one programming exercise on three different days and compare the mistakes.

Learning note based on the lecture topics; this is not a claim of verified NPTEL course completion.

Week 6 - Lecture 6

Managing Time 1: Importance and Perceptions of Time

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

Time is limited, and people value urgent tasks, long goals, rest and duties differently. A timetable only works if it matches how time is really spent.

Understanding and interpretation

A good schedule has focused study, important duties, breaks and some spare room. A one-day time log shows hidden delays.

My learning and personal connection

I need time for college work, coding practice, DSA and English practice, and rest is not wasted time.

Practice activity for this week

Log one full day, then make two changes that protect my most important work.

Learning note based on the lecture topics; this is not a claim of verified NPTEL course completion.

Week 7 - Lecture 7

Managing Time 2: Using Time Efficiently

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

Good time management is not the same as being busy. It means choosing important outcomes, estimating effort, setting priorities, cutting interruptions and checking results.

Understanding and interpretation

Plan two or three priorities a day, place hard work in a good time block and compare the plan with what actually happened.

My learning and personal connection

For my platform, a working login and assignment flow matters more than adding every feature at once.

Practice activity for this week

Choose the three most useful features of my project and postpone the rest.

Learning note based on the lecture topics; this is not a claim of verified NPTEL course completion.

You Choose, We Do It
St. JOSEPH'S COLLEGE OF ENGINEERING
(An Autonomous Institution)
St. Joseph's Group of Institutions
OMR, CHENNAI - 119

VOCABULARY WORK SHEET

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 1, 2, and 3.

1. To find out what someone's job is, you usually ask, "What do you ____?"
2. A manager who oversees a team and ensures targets are met is often said to be ____ the department.
3. Employees who work outside standard office hours in rotation (e.g., one week morning, next week evening) are working in ____.
4. Outside specialists hired by companies to persuade top executives to leave their current firms are known as ____.
5. Job applicants typically submit a ____ (curriculum vitae) detailing the story of their working life alongside a covering letter.

Part B: Matching Terms to Definitions

Match each business term on the left with its correct description on the right.

1. _____ Flexitime
2. _____ Teleworking
3. _____ Psychometric test
4. _____ Shortlist
5. _____ Referees

- **A.** Previous employers or teachers named to provide character or performance references.
- **B.** A system allowing employees to choose working hours within agreed limits.
- **C.** Working from home using a computer and telecommunications.
- **D.** A selected pool of qualified candidates chosen for final interviews.
- **E.** A written test used to assess a candidate's intelligence and personality.

Part C: Sentence Correction

Identify and correct the errors in the following sentences.

1. *Error:* "I am in charge for the design department." -> *Correction:*

   _____
   _____

2. *Error:* "He is going to the work by train every morning." -> *Correction:*

   _____
   _____

3. *Error:* "She is a very responsible in her daily tasks." -> *Correction:*

   _____
   _____

VOCABULARY WORK SHEET

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 4 and 5.

1. Someone who has just left university with a degree is referred to as a ____.
2. A worker who requires virtually no specialized training or formal qualifications is classified as ____.
3. Salespeople often receive a basic salary plus ____, which is a percentage on everything they sell.
4. Senior executives may receive ____, giving them the right to buy company shares at low prices.
5. High-ranking corporate executives with excessive compensation packages are sometimes referred to informally as ____.

Part B: Matching Collocations

Match the adjectives/phrases on the left with their correct prepositional complements.

1. _____ Skilled _____
2. _____ Good _____
3. _____ Computer _____
4. _____ Self _____
5. _____ Fringe _____

- **A.** literate
- **B.** starter / motivated
- **C.** benefits
- **D.** at / in
- **E.** with

Part C: Application & Context Analysis

Explain the difference between the following pairs in 1-2 sentences:

1. **Salary vs. Wages**

   _____
   _____

2. **Severance package vs. Bonus**

   _____
   _____

VOCABULARY WORK SHEET

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 6, 7, and 8.

1. Manual workers who use their hands and wear blue collars are often contrasted with ____ workers in offices.
2. When workers stop working temporarily to protest pay or conditions, they go on ____.
3. A company that reduces its management layers and makes itself leaner is said to have ____.
4. When an employee is dismissed through no fault of their own because their job no longer exists, they are made ____.
5. An invisible barrier that prevents women from rising beyond a certain corporate level is called the ____ ceiling.

Part B: Matching Health & Safety / Legal Terms

Match each workplace issue with its accurate classification.

1. _____ Repetitive Strain Injury (RSI)
2. _____ Passive smoking
3. _____ Sexual harassment
4. _____ Equal opportunities
5. _____ Whistleblowing

- **A.** Unwelcome sexual behavior in the workplace
- **B.** Physical injury caused by continuous data entry or typing
- **C.** British term equivalent to US affirmative action
- **D.** Breathing in other people's tobacco smoke involuntarily
- **E.** Reporting illegal or unethical practices within an organization

Part C: Short Answer Exercises

Answer in 1-2 sentences:

1. What is the difference between being **dismissed** and being **made redundant**?

   _____
   _____

2. What is an **open-plan office**?

   _____
   _____

VOCABULARY WORK SHEET

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 9, 10, and 11.

1. Directors who are outsiders and do not participate in the day-to-day running of the company are ____ directors.
2. In the US, the top manager is often the ____, while chief operating officers (COOs) take care of the day-to-day running.
3. Someone who founds or establishes their own company and takes financial risks is an ____.
4. Powerful leaders who control massive business empires are often called ____.
5. Businesses that are sold off by the state to private investors are ____.

Part B: Matching Corporate Terms

Match the terms on the left with their definitions.

1. _____ SME
2. _____ Corporate culture
3. _____ Enterprise zone
4. _____ Head up
5. _____ Boardroom

- **A.** Small and Medium-sized Enterprise
- **B.** To head or lead a department or activity
- **C.** The room where directors meet
- **D.** The shared beliefs and working style of a company
- **E.** A designated region with fewer laws and lower taxes to encourage business

Part C: Error Correction

Correct the italicized phrases:

1. *Error:* "He is the head up of our marketing department." -> *Correction:*

   _____
   _____

2. *Error:* "We need to buy a commerce for our new online shop." -> *Correction:*

   _____
   _____

VOCABULARY WORK SHEET

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 12, 13, and 14.

1. A self-employed person working alone, especially a builder or plumber, is a ____.
2. A company whose shares can be freely bought and sold on the stock market is a Public ____.
3. Organizations with social aims like helping the sick or poor are ____.
4. Software developers often release a final test version, called a ____, before official launch.
5. If a design defect is discovered after a product launch, a company may have to ____ it.

Part B: Sector Classification

Classify each industry as either Manufacturing (M) or Services (S).

1. _____ Aerospace
2. _____ Catering
3. _____ Pharmaceuticals
4. _____ Property / Real Estate
5. _____ Steel production

Part C: Short Definitions

Define the following:

1. Define **CADCAM**:

   _____
   _____

2. Define **Focus group**:

   _____
   _____

VOCABULARY WORK SHEET

Part A: Fill in the Blanks

   _____
   _____

Vocabulary in My Own Words

These examples use words from the common vocabulary worksheets. They are examples, not completed projects or work experience.

01. Workplace roles
A team lead on my learning platform would be in charge of keeping the assignment feature on schedule.

02. Recruitment and skills
In an internship application I should describe my C, C++ and Python skills accurately and not overstate my experience.

03. Working schedules
A project team can use flexitime, but every member still needs fixed meeting slots.

04. Team management
Teachers, students and admins on the platform need separate, clearly defined roles.

05. Company structures
A start-up and a large company plan differently, but both need clear responsibilities.

06. Industry categories
A learning platform belongs to the service sector, while a laptop maker belongs to manufacturing.

07. Operations and quality
Testing every feature before release matters more than adding extra features.

08. Service improvement
Feedback from students and teachers would show where the platform is slow or confusing.

09. Marketing and communication
A short demo video can explain the platform to college managements.

10. Retail practices
Free trials and pricing tiers are common in SaaS, a model I may study for my future product.

11. Professional meetings
A project meeting should start with an agenda: tasks done, bugs found, next steps.

Vocabulary in My Own Words

These examples use words from the common vocabulary worksheets. They are examples, not completed projects or work experience.

12. Presentations
In a hackathon pitch I should state the problem first, then the solution, then the plan.

13. Legal responsibility
A platform that stores student data needs consent and sensible privacy rules.

14. Finance vocabulary
A small budget for hosting and an AI service should be planned before launch.

15. Economic awareness
Cheap data plans and device costs affect how rural students can use an online tool.

16. Information safeguards
Only the right teacher should see a student's marks, protected by login and roles.

17. Planning and deadlines
I can split the work into learning JavaScript, designing pages, building login and testing.

18. Leadership
Listening to teachers before changing a feature is a practical form of empathetic leadership.

19. Workplace communication
A bug report should say what happened, where, and how to repeat it.

20. Introductions and roles
At a demo I should introduce who is the student user and who is the teacher user.

21. Meeting documentation
Action points should say who will fix which bug before the next review.

22. Negotiation
If teammates disagree on features, listing constraints can lead to a win-win plan.

JAIVANTH PAUL ENOCH

VOCABULARY WORKSHEETS | ONE-PAGE LEARNING SUMMARY

Professional and workplace vocabulary
I learned useful terms for jobs, recruitment, working arrangements and responsibilities, which helps me follow formal communication in an office.

Word meanings and matching
Matching words with definitions helped me recognise unfamiliar terms and pick the word that fits the context.

Grammar and sentence correction
Correcting sentences made me notice prepositions, verb forms and sentence structure, which I can use in emails and reports.

Business and employment concepts
Ideas such as salaries, benefits, marketing and meetings gave me a first view of how companies work, useful for a future start-up.

Applying words in context
Fill-in-the-blank and short-answer tasks made me think about meaning instead of memorising answers.

My next steps
I will revise new words, use them in original sentences and practise them in interviews, presentations and emails.

Overall reflection: better vocabulary, clearer English and greater professional confidence.
