SELF INTRODUCTION: WRITTEN SCRIPT AND ONE-PAGE PROFILE

S. ISWARYA

Aspiring AI & ML Engineer

Course: Computer Science and Engineering | St. Joseph's College of Engineering | 2026–2030

Contact: iishu6978@gmail.com
GitHub: github.com/ishucore
LinkedIn: linkedin.com/in/iswarya-sreenivasulu-941769312

Profile Summary

I am a first-year Computer Science and Engineering student who is curious about how technology works and how it can solve real-world problems. I enjoy asking questions, exploring ideas from different perspectives, and learning concepts step by step. I am building my foundations in C programming, computational thinking, logical reasoning, and problem-solving while developing a focused interest in Artificial Intelligence and Machine Learning.

My long-term career goal is to become an AI & ML Engineer. I want to strengthen my programming, mathematics, and analytical skills, understand how machine-learning models learn from data, and gain practical experience by building useful projects. I hope to keep learning, accept feedback, and apply technology responsibly to meaningful problems.

Skills and Interests

Current skills: Foundational C programming, creative problem-solving, presentation design, communication, and public-speaking practice.

Areas of interest: Artificial Intelligence, Machine Learning, Deep Learning, Data Science, Computer Vision, Natural Language Processing, Python programming, and computational thinking.

Languages: Telugu — Native; Tamil — Proficient; English — Proficient.

Career direction: Build strong computer-science foundations, practise with small projects, and gradually develop the skills required for AI and machine-learning engineering.

IMPRESSIVE PERSONALITY: BIOGRAPHICAL NOTE

Andrew Ng and Fei-Fei Li

Introduction

I selected Andrew Ng and Fei-Fei Li because their work has influenced the development and learning of Artificial Intelligence. Their careers show two complementary paths in AI: building practical machine-learning systems and advancing research that helps computers understand the world.

Andrew Ng: AI Education and Applied Machine Learning

Andrew Ng is a computer scientist, educator, and entrepreneur known for his contributions to machine learning and AI education. He has been associated with Stanford University, Google Brain, Baidu, Coursera, and DeepLearning.AI. Through DeepLearning.AI, he has helped make structured AI and machine-learning education accessible to learners around the world.

His work demonstrates the value of connecting theory with practical implementation. His teaching and educational programmes encourage learners to understand core concepts, practise with real examples, and continue improving their technical skills. His career also shows how AI knowledge can be translated into products, research, and learning opportunities.

What I Learn from Andrew Ng

I admire his focus on making complex technical subjects easier to learn and apply. His journey motivates me to strengthen my fundamentals in programming, mathematics, and machine learning instead of rushing into advanced topics without understanding the basics.

IMPRESSIVE PERSONALITY: BIOGRAPHICAL NOTE

Fei-Fei Li: Research, Computer Vision and Human-Centred AI

Professional Journey and Contributions

Dr. Fei-Fei Li is a computer scientist and professor at Stanford University. She is a co-director of Stanford's Institute for Human-Centered Artificial Intelligence and is widely recognised for her contributions to computer vision and machine learning. Her work on ImageNet and the ImageNet Challenge helped advance large-scale visual recognition research and supported progress in modern deep learning.

Her research interests include artificial intelligence, machine learning, deep learning, computer vision, robotic learning, and AI applications in healthcare. Alongside technical research, she has advocated for inclusive AI education and for developing technology in ways that consider people and society.

What I Learn from Fei-Fei Li

Her career inspires me to explore AI with curiosity, patience, and a sense of responsibility. I find her combination of scientific research, innovation, and human-centred thinking especially meaningful. It reminds me that an AI engineer should consider not only whether a system works, but also how it affects the people who use it.

Personal Takeaway

Andrew Ng motivates me to build strong foundations and learn through practical exercises. Fei-Fei Li encourages me to explore research, computer vision, and the human impact of AI. I hope to follow my own path by studying consistently, developing projects, learning from feedback, and using AI and machine learning to create useful solutions.

Conclusion

Both personalities show that progress in AI depends on continuous learning, experimentation, collaboration, and responsible thinking. Their journeys encourage me to remain curious and work steadily towards my goal of becoming an AI & ML Engineer.

Summary of Lecture Notes

NPTEL: Enhancing Soft Skills and Personality — Prof. T. Ravichandran, IIT Kanpur

Week 1: Course Introduction and Growth Mindset

The opening lectures revisit key soft-skill themes such as self-management, listening, communication, stress, habits, presentations, trust, and non-verbal communication. They then focus on mindset: the way people interpret their abilities and circumstances. The shoe-salesperson example shows that the same situation can be viewed as either a dead end or an opportunity. A fixed mindset treats ability as limited and may avoid challenges or feedback, whereas a growth mindset regards effort, mistakes, and feedback as opportunities to improve. Belonging, encouragement, and rejecting limiting stereotypes can also support learning.

Week 2: Time, Procrastination and Assertiveness

Rather than trying to control time itself, the lectures recommend managing habits, priorities, and the way time is used. Keeping a time log can reveal distractions such as indecision, interruptions, and excessive social-media use. Prioritisation tools include the urgent–important matrix and the Pareto principle. Procrastination may arise from fear, perfectionism, feeling overwhelmed, or delaying difficult tasks. Suggested approaches include breaking large tasks into smaller steps, beginning with the hardest task, trying a one-minute start, organising the workspace, setting meaningful goals, and rewarding progress. Assertiveness is introduced as expressing one’s needs honestly without disregarding other people’s rights.

Week 3: Assertiveness, Anger and Positive Thinking

Assertive communication differs from passive behaviour and aggression because it aims to express needs clearly while respecting others. A constructive response to anger may involve pausing before reacting, counting, breathing slowly, taking a walk, writing an unsent letter, or redirecting energy into useful work. Positive thinking requires more than wishful thoughts: it involves self-reflection, persistence, challenging limiting beliefs, and deliberately building a healthier self-image. The lectures use stories to show how a change in perspective can alter a person’s response to difficult circumstances.

Experiment No: II-1

Week 4: People Skills and Personal Appeal

The lectures discuss habits that affect relationships, including arrogance, gossip, pessimism, blame, unreliable promises, and favouritism. Their alternatives include humility, optimism, honesty, courtesy, trustworthiness, and giving credit to others. Before passing on gossip, the three-filter approach asks whether it is true, kind, and useful. Personal appeal is presented as more than appearance: it also includes intellectual curiosity, emotional maturity, authenticity, mindfulness, and helping others without expecting an immediate reward.

Week 5: English Skills and Common Errors

This section explores frequent English-language errors and how they affect clear communication. Topics include commonly confused words, expressions influenced by Indian English, subject–verb agreement, prepositions, articles, collocations, and choosing words that fit the context. The central lesson is that knowing a rule is not enough; learners need to notice how language is naturally used and practise applying it in speaking and writing.

Week 6: Humour and Money

Humour can ease tension, support communication, and encourage creativity when used appropriately. The lectures distinguish friendly humour from sarcasm that may hurt others. In professional settings, a light approach can help people discuss difficult matters and reduce conflict. The second topic considers how attitudes towards money reflect responsibility and integrity. Helpful practices include recording income and expenses, distinguishing needs from wants, avoiding impulse purchases, honouring trust, and aiming to contribute value through one’s work. A meaningful life also depends on qualities and relationships that cannot be purchased.

Week 7: Health and Love

The course connects well-being with daily habits and personal effectiveness. It discusses regular physical activity, balanced eating, sufficient sleep, and routines that make healthy choices easier to maintain. Love is considered broadly as care that involves patience, respect, and consistency. Healthy relationships also require understanding non-verbal signals, allowing trust to develop over time, handling rejection maturely, and maintaining appropriate boundaries between personal relationships and professional responsibilities.

Week 8: Ethics, Etiquette, Memory and the Environment

Ethics and etiquette shape personal character and professional conduct. Examples include respecting confidentiality, not interrupting, introducing people appropriately, avoiding public criticism of colleagues, and offering praise openly while giving corrective feedback privately. The lectures also describe ways to direct attention and improve memory, such as positive self-talk, association, vivid mental images, linking names with faces, and using memory aids. The final theme is environmental responsibility: saving water and electricity, reducing plastic use, planting trees, and choosing more sustainable transport. It encourages people to consider the needs of the wider environment rather than focusing only on human convenience.

Overall Reflection

The course shows that soft skills develop through repeated practice rather than memorising advice alone. Time management, assertiveness, emotional control, language awareness, ethical behaviour, and environmental responsibility all influence how effectively a person studies, works, and communicates. I can apply these lessons by planning my tasks, accepting feedback, practising English regularly, communicating respectfully, and reflecting on areas where I can improve.

SWOC PRESENTATION: STRATEGIC CAREER ROADMAP

S. Iswarya | Aspiring AI & ML Engineer | CSE 2026–2030

Career Vision

My goal is to grow from a curious CSE student into a capable AI & ML Engineer who can understand data, develop machine-learning models, and build practical solutions to real-world problems.

Learning Objective

Build a strong foundation in programming, mathematics, statistics, data structures, and core computer-science concepts. Then apply these foundations through small projects, practical exercises, and continuous learning.

My Development Framework

The SWOC analysis helps me identify my internal strengths and weaknesses and understand the external opportunities and challenges that may influence my career journey.

SWOC MATRIX AT A GLANCE

STRENGTHS	WEAKNESSES
Curiosity and willingness to learn; creative problem-solving; interest in AI and ML; communication and presentation practice.	Still developing programming confidence; limited hands-on AI/ML project experience; need to strengthen mathematics, Python, and technical portfolio.

OPPORTUNITIES	CHALLENGES
College coursework, NPTEL learning, hackathons, beginner-friendly datasets, online learning platforms, internships, and open-source communities.	Rapid changes in AI tools, strong competition, mathematical complexity, access to computing resources, and maintaining consistency alongside academics.

My approach: learn the fundamentals, practise regularly, build evidence through projects, and review progress at each stage.

SWOC ANALYSIS: INTERNAL FACTORS

Strengths and Weaknesses

STRENGTHS — WHAT I CAN BUILD ON

Curiosity and learning mindset

I enjoy exploring how concepts work and asking questions until I understand them.

Problem-solving

I try to break a problem into smaller parts and approach it logically instead of giving up immediately.

Creative thinking and communication

I enjoy presenting ideas and finding different ways to explain or approach a task.

Interest in AI and ML

My interest in intelligent systems gives me motivation to learn programming, data, and model-building concepts.

WEAKNESSES — AREAS TO IMPROVE

Programming practice

I am at an early stage and need regular practice in C and Python to become more confident.

Mathematical foundations

I need to strengthen algebra, probability, statistics, and the mathematical ideas used in machine learning.

Project experience

I need to build more beginner-level projects and document my learning so that my portfolio shows steady progress.

SWOC ANALYSIS: EXTERNAL FACTORS

Opportunities and Challenges

OPPORTUNITIES — WHERE I CAN GROW

Structured learning

Use college subjects, NPTEL/SWAYAM courses, tutorials, and practice platforms to develop a clear learning path.

Practical experience

Participate in hackathons, coding events, team projects, and beginner-friendly AI challenges to apply what I learn.

Projects and communities

Work with public datasets, build small applications, explore open-source repositories, and learn from peers and mentors.

Career exposure

Prepare for internships, research opportunities, and specialised learning after developing stronger fundamentals.

CHALLENGES — WHAT I MUST MANAGE

Rapid technological change

AI tools and methods evolve quickly, so I need to focus on core concepts and keep learning without chasing every trend.

Competition and complexity

AI/ML requires sustained practice in coding, mathematics, and problem-solving; I must build skills step by step.

Time and resources

Balancing coursework, projects, and self-learning can be difficult. I will use a realistic schedule and accessible tools.

ACTION PLAN: TURNING GOALS INTO PROGRESS

A practical plan for developing the skills required for AI and machine learning.

01 Strengthen the basics

Practise C and begin Python consistently. Improve problem-solving, mathematics, statistics, and data-handling skills.

02 Learn core AI/ML concepts

Study data preparation, supervised and unsupervised learning, model evaluation, and the basic workflow of a machine-learning project.

03 Build small projects

Start with manageable projects such as data visualisation, simple prediction, classification, or recommendation exercises. Explain the problem, method, and result clearly.

04 Participate and collaborate

Take part in hackathons, coding events, and group projects. Use feedback to improve both technical work and communication.

05 Create a learning portfolio

Maintain GitHub repositories with readable code, project descriptions, and progress notes. Update my professional profile as I gain new skills.

06 Review and specialise

Review my progress every semester and explore areas such as computer vision, natural language processing, or applied machine learning based on my interests and experience.

Progress principle

Consistency matters more than trying to learn everything at once. I will focus on one achievable milestone at a time.

FOUR-YEAR CAREER ROADMAP

A staged path from CSE foundations to AI/ML project readiness.

Year-by-year development plan

YEAR	FOCUS	EXPECTED OUTPUT
Year 1	C and Python basics, mathematics, logical reasoning, and core computer-science subjects.	Regular coding practice and one or two beginner projects.
Year 2	Data structures, statistics, data analysis, and introductory machine learning.	A small ML project using a public dataset and a documented GitHub repository.
Year 3	Deep learning, model evaluation, a chosen area of interest, and practical collaboration.	Hackathon or research participation, internship preparation, and a stronger project portfolio.
Year 4	Advanced project work, responsible AI practices, deployment basics, and career preparation.	Capstone project, polished portfolio, interview preparation, and applications for AI/ML roles.

How I will measure progress

- Complete planned weekly coding and learning sessions.
- Build projects that demonstrate concepts I have studied.
- Record what I learned, what was difficult, and what I will improve next.
- Seek feedback from teachers, peers, and mentors.

Career vision: become an AI & ML Engineer who combines strong fundamentals, practical skills, and responsible problem-solving.

WRITE AND IMPROVE / SPEAK AND IMPROVE

Practice Record

Recorded proficiency level

B2 — Upper-Intermediate

Write & Improve

My writing practice is recorded at B2 proficiency. At this level, I work on expressing ideas clearly, organising paragraphs, using a wider range of vocabulary, and maintaining appropriate grammar and sentence structure.

Areas I practise:

• Writing clear paragraphs with a logical beginning, development, and conclusion.

• Using linking words and varied sentence structures naturally.

• Checking grammar, punctuation, word choice, and coherence after drafting.

• Explaining opinions and supporting them with relevant reasons or examples.

My writing goal

To communicate ideas confidently and accurately in academic tasks, emails, reports, and other practical writing situations.

WRITE AND IMPROVE / SPEAK AND IMPROVE

Speaking Practice Record

Recorded proficiency level

B2 — Upper-Intermediate

Speak & Improve

My speaking practice is recorded at B2 proficiency. I focus on speaking with reasonable fluency, explaining ideas in a clear sequence, giving opinions, and responding to questions with relevant details.

Areas I practise:

• Speaking about familiar topics and describing experiences clearly.

• Giving reasons, examples, and explanations to support an opinion.

• Summarising information and presenting key points in an organised way.

• Improving pronunciation, pace, confidence, and the ability to continue speaking.

My speaking goal

To express my thoughts naturally in classroom discussions, presentations, interviews, and professional communication.

Note: B2 is the proficiency level recorded for this practice entry; this page does not claim a separate external certificate.

OMR, CHENNAI - 119

VOCABULARY WORK SHEET

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 1, 2, and 3.

1. To find out what someone's job is, you usually ask, ·What do you do?·
2. A manager who oversees a team and ensures targets are met is often said to be in charge of the department.
3. Employees who work outside standard office hours in rotation (e.g., one week morning, next week evening) are working in shifts.
4. Outside specialists hired by companies to persuade top executives to leave their current firms are known as headhunters.
5. Job applicants typically submit a CV (curriculum vitae) detailing the story of their working life alongside a covering letter.

Part B: Matching Terms to Definitions

Match each business term on the left with its correct description on the right.

1. B _____ Flexitime
2. C _____ Teleworking
3. E _____ Psychometric test
4. D _____ Shortlist
5. A _____ Referees

- **A.** Previous employers or teachers named to provide character or performance references.
- **B.** A system allowing employees to choose working hours within agreed limits.
- **C.** Working from home using a computer and telecommunications.
- **D.** A selected pool of qualified candidates chosen for final interviews.
- **E.** A written test used to assess a candidate's intelligence and personality.

Part C: Sentence Correction

Identify and correct the errors in the following sentences.

1. *Error:* "I am in charge for the design department." → *Correction:* I am in charge of the design department.

2. *Error:* "He is going to the work by train every morning." → *Correction:*
   He goes to work by train every morning.
3. *Error:* "She is a very responsible in her daily tasks." → *Correction:*
   She is very responsible in her daily tasks.

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 4 and 5.

1. Someone who has just left university with a degree is referred to as a graduate.
2. A worker who requires virtually no specialized training or formal qualifications is classified as unskilled.
3. Salespeople often receive a basic salary plus commission, which is a percentage on everything they sell.
4. Senior executives may receive share (stock) options, giving them the right to buy company shares at low prices.
5. High-ranking corporate executives with excessive compensation packages are sometimes referred to informally as fat cats.

Part B: Matching Collocations

Match the adjectives/phrases on the left with their correct prepositional complements.

1. E_____ Skilled _____
2. D_____ Good _____
3. A_____ Computer _____
4. B_____ Self _____
5. C_____ Fringe _____

- **A.** literate
- **B.** starter / motivated
- **C.** benefits
- **D.** at / in
- **E.** with

Part C: Application & Context Analysis

Explain the difference between the following pairs in 1-2 sentences:

1. **Salary vs. Wages:**
   Salaried staff receive a fixed amount at regular intervals. Wage earners are generally paid according to time worked.
2. **Severance package vs. Bonus:**
   An employee may receive severance on leaving a job; a bonus is an extra payment for good results.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 6, 7, and 8.

1. Manual workers who use their hands and wear blue collars are often contrasted with white-collar workers in offices.
2. When workers stop working temporarily to protest pay or conditions, they go on strike.
3. A company that reduces its management layers and makes itself leaner is said to have downsized / delayered and redundant.
4. When an employee is dismissed through no fault of their own because their job no longer exists, they are made glass.
5. An invisible barrier that prevents women from rising beyond a certain corporate level is called the _____ ceiling.

Part B: Matching Health & Safety / Legal Terms

Match each workplace issue with its accurate classification.

1. B_____ Repetitive Strain Injury (RSI)
2. D_____ Passive smoking
3. A_____ Sexual harassment
4. C_____ Equal opportunities
5. E_____ Whistleblowing

- **A.** Unwelcome sexual behavior in the workplace
- **B.** Physical injury caused by continuous data entry or typing
- **C.** British term equivalent to US affirmative action
- **D.** Breathing in other people's tobacco smoke involuntarily
- **E.** Reporting illegal or unethical practices within an organization

Part C: Short Answer Exercises

1. What is the difference between being **dismissed** and being **made redundant**?
   Being dismissed refers to losing a job through an employer decision, often linked to conduct. Being made redundant means the role has disappeared.
2. What is an **open-plan office**?
   It is an office layout where employees work together in a large space with few dividing walls.

_____

Part A: Fill in the Blanks

Complete the sentences using terms from Units 9, 10, and 11.

1. Directors who are outsiders and do not participate in the day-to-day running of the company are non-executive directors.
2. In the US, the top manager is often the CEO, while chief operating officers (COOs) take care of the day-to-day running.

3. Someone who founds or establishes their own company and takes financial risks is an entrepreneur.
4. Powerful leaders who control massive business empires are often called magnates, moguls, or tycoons.
5. Businesses that are sold off by the state to private investors are privatized.

Part B: Matching Corporate Terms

Match the terms on the left with their definitions.

1. A SME
2. D Corporate culture
3. E Enterprise zone
4. B Head up
5. C Boardroom

- **A.** Small and Medium-sized Enterprise
- **B.** To head or lead a department or activity
- **C.** The room where directors meet
- **D.** The shared beliefs and working style of a company
- **E.** A designated region with fewer laws and lower taxes to encourage business

Part C: Error Correction

Correct the italicized phrases:

1. "He is the head up of our marketing department." →
   He heads up our marketing department.
2. "We need to buy a commerce for our new online shop." →
   We need to set up an e-commerce business for our new online shop.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 12, 13, and 14.

1. A self-employed person working alone, especially a builder or plumber, is a sole trader.
2. A company whose shares can be freely bought and sold on the stock market is a Public Limited Company or PLC.
3. Organizations with social aims like helping the sick or poor are non-profit organizations or charities.
4. Software developers often release a final test version, called a beta version, before official launch.
5. If a design defect is discovered after a product launch, a company may have to recall it.

Part B: Sector Classification

*Classify each industry as either **Manufacturing (M)** or **Services (S)**.*

1.· 1·M Aerospace
2.· 2·S Catering
3.· 3·M Pharmaceuticals
4.· 4·S Property / Real Estate
5.· 5·M Steel production

Part C: Short Definitions

1. Define **CADCAM**:
   Computer-Aided Design and Computer-Aided Manufacturing (CADCAM) uses computers in product design and production.
2. Define **Focus group**:
   It is a small discussion group used to collect reactions and suggestions about an idea or product.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 15, 16, and 17.

1.· Products that are no longer up-to-date because they use old technology are obsolete.
2. Legal protection for an invention that stops others from copying its design is a patent.
3.· The maximum amount that a plant or company can produce is its capacity.
4. Materials, components, labor, and capital used in production are collectively known as inputs.
5. Manufacturing goods efficiently without waste by having components arrive exactly when needed is just-in-time (JIT) production.

Part B: Matching Terms

1. B_____ R&D
2. A_____ Royalties
3. C_____ Craft industry
4. E_____ Work-in-progress
5. D_____ Outsourcing

- **A.** Payments made to an author or inventor for using their protected work
- **B.** Research and Development department
- **C.** Manual, labor-intensive production of items like furniture
- **D.** Using outside suppliers for services previously done in-house
- **E.** Goods that are currently being made on the production line

Part C: Short Explanations

1. Why do companies implement **Just-in-Time (JIT)** manufacturing?
   Companies choose JIT to avoid excess inventory and receive components as production requires them.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 18, 19, and 20.

1. The objective of quality control is conformance to specifications with zero defects.
2. Comparing your performance against the best operators in the industry is called benchmarking.
3. People who buy everyday services like train travel are customers, while those who buy professional services are clients.
4. A company that sells more than any other competitor in a market is the market leader.
5. When competition is extremely strong and aggressive, it is often described as cut-throat or fierce.

Part B: Matching Terms

1. B_____ Kaizen
2. C_____ Mystery shopper
3. E_____ Market segment
4. D_____ Key players
5. A_____ BPR

- **A.** Business Process Re-engineering
- **B.** Japanese term for continuous improvement
- **C.** Person pretending to be a customer to check service quality
- **D.** The most important companies in a particular market
- **E.** A distinct group of buyers targeted within a market

Part C: Analysis Task

1. What is the difference between a **market leader** and a **challenger**?
   A leader holds the top market position. A challenger competes to gain a larger share and become number one.

Part A: Fill in the Blanks

1. The four Ps of marketing are product, price, place, and promotion.
2. Consumer goods that last a long time, such as cars and washing machines, are consumer durables.
3. Products that do not have a brand name are known as unbranded products or generics.
4. Cheap items sold at or below cost to attract customers into a store are loss leaders.

5.· A small group of buyers with specialized needs forms a niche market.

Part B: Matching Terms

1. A_____ FMCG
2. B_____ Own-brand
3. D_____ Upmarket
4. C_____ Trade up
5. E_____ Price war

- **A.** Fast-Moving Consumer Goods (fast-selling items like food)
- **B.** Products sold under the retailer's own name
- **C.** Moving from basic models to more sophisticated, expensive ones
- **D.** Designed for higher-income users; upscale
- **E.** When competing companies continually reduce prices in response to each other

Part C: Short Answer

1. Name the **Four Ps** of the marketing mix:
   Product, Price, Place and Promotion.

_____

Part A: Fill in the Blanks

Complete the sentences using terms from Units 24, 25, and 26.

1.· Wholesalers and retailers are collectively known as intermediaries.
2.· A retail store that is part of a group of shops all sharing the same name is a chain store.
3. Unsolicited direct mail sent to consumers' homes is often dismissively called junk mail.
4. A series of advertisements for a particular product or company is an advertising campaign.
5. Businesses combining traditional physical shops with online e-commerce operations practice bricks-and-mortar retail.

Part B: Matching Terms

1. C_____ Cold call
2. E_____ Franchise
3. A_____ Billboard (AmE)
4. D_____ Loyalty card
5. B_____ B2B

- **A.** Open-air hoarding used for advertising
- **B.** Business-to-Business e-procurement
- **C.** Unannounced sales phone call to someone with no prior contact

- **D.** Card offering reward points based on customer spending
- **E.** Business format run by a franchisee under a franchisor's brand

Part A: Fill in the Blanks

1. Money received from sales is known as revenue or turnover.
2. Costs that do not change when production goes up or down (e.g., rent) are fixed costs.
3. Products that have very good profitability and generate large cash surpluses are cash cows.
4. Customers who owe money to a business are recorded as accounts receivable.
5. Independent outside accountants who examine a company's accounts to see if they give a true and fair view are auditors.

Part B: Matching Financial Terms

1. A_____ COGS
2. C_____ Goodwill
3. B_____ Depreciation
4. E_____ In the red
5. D_____ Window dressing

- **A.** Cost of Goods Sold (variable manufacturing costs)
- **B.** Reduction in the book value of fixed assets over time
- **C.** An intangible asset representing a company's good reputation
- **D.** Creative accounting making results look better than they are
- **E.** Operating at a financial loss or having a negative bank balance

Part A: Fill in the Blanks

1. The person who is in charge of running a meeting and keeping participants on track is the chairperson or chair, often referred to simply as the chair.

2. A list of items to be discussed during a meeting, sent out in advance, is called the agenda.

3. When negotiators or meeting participants reach a middle-ground solution where both sides make concessions, they reach a compromise.

4. Using cautious language to avoid making overly direct or absolute statements is known in discussion techniques as hedging.

5. When a meeting discussion completely breaks down and no agreement can be reached, it is referred to as a deadlock.

Part B: Matching Meeting Terms

1. C AGM
2. E Minutes
3. A Consensus
4. B Action points
5. D Hedging

- **A.** General agreement reached by all participants
- **B.** Specific tasks assigned to individuals to complete after a meeting finishes
- **C.** Annual General Meeting held once a year for shareholders
- **D.** Avoiding direct or committal statements using qualifying language
- **E.** The written record of decisions and discussions made during a meeting

Part C: Short Answer Exercises

1. What is the main responsibility of a meeting chairperson before a meeting begins?
A chairperson needs to plan the session and make sure everyone receives the agenda and supporting information.

2. What is the difference between reaching a **consensus** and voting on a decision?
A consensus comes from broad agreement, while a vote settles a matter by counting individual preferences.

Part A: Fill in the Blanks

1. The visual items used during a presentation, such as slides, handouts, or overhead projections, are called visual aids.

2. Establishing a positive connection and good mutual relationship with your audience during a presentation is building rapport.

3. The opening part of a presentation where you welcome the audience and outline your structure is the introduction.

4. Moving around too much or making nervous hand gestures can distract from your body language during a speech.

5. When concluding a presentation, speakers typically open the floor to deal with questions from the audience.

Part B: Matching Presentation Stages

1. _C_____ Visual aids
2. _B_____ Body language
3. _D_____ Rapport
4. _E_____ Q&A session
5. _A_____ Handouts

- **A.** Printed materials distributed to listeners to supplement a presentation
- **B.** Postures, gestures, and facial expressions used while speaking
- **C.** Charts, slides, and diagrams used to illustrate key points visually
- **D.** A harmonious, trusting relationship between speaker and listeners
- **E.** The time at the end of a presentation dedicated to answering inquiries

Part C: Error Correction

Correct the italicized phrases:

1. "During my presentation, I will show you some visual supports." → During my presentation, I will show you some visual aids.

2. "Let's open the floor for some inquiries from the spectators." → Let's open the floor for questions from the audience.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 62 through 66.

1. A negotiation style where both sides aim for an outcome that benefits everyone involved is known as a win-win situation.

2. Offering something you value less in exchange for something the other party values less during talks is making trade-offs.

3. When negotiations completely stall and neither side is willing to move or compromise, they have reached a deadlock.

4. An agreement between two or more parties that is enforceable by law after a successful negotiation is a contract.

5. A neutral third party brought in to help resolve a deadlock and mediate an agreement is a mediator.

Part B: Matching Negotiation Tactics

1. _A_____ Probing
2. _D_____ Counter-proposal
3. _B_____ Deadlock
4. _E_____ Concession
5. _C_____ Mediator

- **A.** Asking probing questions to discover the other party's underlying needs
- **B.** A stall in talks where neither side will compromise
- **C.** An independent third party assisting in dispute resolution
- **DT.** A responding offer made in reaction to an initial proposal
- **E.** Something given up voluntarily to reach an agreement

Part C: Short Answer Exercises

1. What is the difference between a **hard bargaining** style and a **win-win** style?

In hard bargaining, each side pushes strongly for its own advantage. A win-win approach looks for shared benefits.

2. Why is checking the final contract details essential after reaching an agreement?

A final check confirms that responsibilities, terms and legal requirements are correctly recorded.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 36 and 37.

1. When a company sells its shares to the public for the first time, it floats the company in a flotation / initial public offering (IPO).

2. Short-term lending to businesses is known as commercial credit.

3. Financial products derived from underlying assets, such as futures and options contracts, are known as derivatives.

4. An extended period of rising share prices and optimistic dealer sentiment is referred to as a bull market.

5. Shares in long-established, stable companies with a history of profit in both good and bad times are called blue chips.

Part B: Matching Financial Markets

1. B Forex
2. C Bourse
3. A NASDAQ
4. E FTSE
5. D Bear market

- **A.** New York stock market index focusing heavily on high-tech companies
- **B.** Foreign exchange market for buying and selling national currencies
- **C.** An alternative term for a stock market or stock exchange
- **D.** A market characterized by falling prices and pessimistic dealer sentiment
- **E.** London's Financial Times Stock Exchange index

Part C: Short Answer Exercises

1. What is the difference between a **futures contract** and an **options contract**?
Futures normally create an obligation to deal later. Options provide the buyer with a choice, not a duty.

2. Why are major financial centres like London and New York often referred to by nicknames like "The City" or "Wall Street"?

The names refer to major finance centres and are often used to mean the financial sector in each city.

Part A: Fill in the Blanks

1. The study of how money works, is used, and whether economic activities are profitable is called economics.

2. When a country exports more goods and services than it imports, it maintains a trade surplus.

3. The total monetary value of all goods and services produced within a particular country is its Gross Domestic Product (GDP).

4. A period of negative economic growth where economic output contracts is known as a recession.

5. When a bad recession becomes extremely severe, widespread, and prolonged, it is called a slump or depression.

Part B: Matching Economic Indicators

1. C Inflation rate
2. D Trade deficit
3. E Stagflation
4. B Trough
5. A Stagnation

- **A.** A period when the economy is growing very slowly or not at all
- **B.** The lowest point in an economic cycle before output starts rising again
- **C.** The speed at which general consumer price levels are rising
- **D.** When import payments exceed export earnings, creating a trade gap
- **E.** A difficult economic condition combining slow growth with rapid inflation

Part C: Error Correction

Correct the italicized phrases:

1. "The country's economic indicators show a high rate of inflation speeds." → The country's economic indicators show a high rate of inflation.

2. "When output reaches its lowest level, it hits a peak before rising." → When output reaches its lowest level, it hits a trough before rising.

Part A: Fill in the Blanks

1. Buying or selling securities using confidential information that is not publicly available is illegal insider dealing.

2. A secret agreement among competing companies in the same market to fix prices at a certain level is price fixing.

3. A type of fraud where an employee illegally steals and gets money from their employer is known as embezzlement.

4. The process of hiding the illegal origin of criminal money, often by purchasing property, is money laundering.

5. Directing investment funds exclusively into companies that do not harm people or the environment is ethical investment.

Part B: Matching Crime & Ethics Terms

1. D Embezzlement
2. A Counterfeiting
3. B Bribery
4. E Code of ethics
5. C Sweatshop labor

- **A.** Making illegal fake copies of banknotes, documents, or luxury goods
- **B.** Offering or receiving illegal payments to persuade someone to act corruptly
- **C.** Manual labor performed under severely exploitative, underpaid conditions
- **D.** The illegal theft of funds by someone entrusted with managing them within a firm
- **E.** A formal corporate document outlining required moral standards of behavior

Part C: Short Answer Exercises

1. What is the purpose of establishing **Chinese walls** within financial institutions?
They are information barriers that keep confidential details from reaching departments where they could be misused.

2. Why do institutional investors conduct annual **social performance audits**?
Investors use social audits to see whether businesses follow ethical standards and manage social impacts.

Part A: Fill in the Blanks

1. The overall period during which a project or task should be completed is referred to as the timescale or timeframe.

2. When work is completed later than the planned completion date, it is behind schedule and there is a delay.

3. Work that is difficult in an interesting, rewarding, and enjoyable way is described as challenging.

4. An extreme state of physical and mental exhaustion caused by chronic work stress is known as burnout.

5. The metaphor used to describe the exhausting, highly competitive modern corporate work environment is the rat race.

Part B: Matching Time & Stress Terms

1. D Downtime
2. E Prioritize
3. C Perfectionism
4. A Downshifting
5. B Stress-induced

- **A.** Choosing to leave behind a stressful career for a simpler, balanced lifestyle
- **B.** An unexpected illness or condition brought on by excessive pressure
- **C.** An unworkable aim for flawlessness when there is no need for it

- **D.** Periods when machinery or computers cannot operate because they are broken
- **E.** Arranging tasks in order of importance before working on them

Part C: Short Answer Exercises

1. What are the key dangers of striving for **perfectionism** when managing daily tasks?
Chasing flawless results can slow work, increase pressure and make it harder to finish important tasks.

2. How do **downshifters** typically redefine their personal idea of success?
For downshifters, success means a fulfilling, balanced life rather than a larger salary or title.

Part A: Fill in the Blanks

1. People working below a manager in an organizational hierarchy are known as subordinates.

2. A leadership quality that is forward-thinking, with the power to see clearly how things will be in the future, is called being a visionary.

3. Management decisions that are arrived at by asking employees to contribute in a process of consultation are built on consultation.

4. Granting employees the initiative and authority to make decisions without asking managers first is called empowerment.

5. A corporate environment characterized by male dominance, aggressiveness, and physical strength is a macho culture.

Part B: Matching Leadership & Cultural Terms

1. B_____ Authoritarian
2. E_____ Decentralized
3. D_____ Deference
4. C_____ Corporate culture
5. A_____ Canteen culture

- **A.** Unofficial, unapproved ways that people within an organization think and talk

- **B.** A management style that imposes decisions from above without consultation
- **C.** The shared values, habits, and working style of a specific company
- **D.** Respectful submission and yielding to the authority of superiors
- **E.** Organizational structures where decision-making authority is spread out

Part C: Error Correction

Correct the italicized phrases:

1. "The manager is very remote, so she is completely approachable by all staff." → The manager is very approachable, so all staff feel comfortable speaking to her.

2. "We operate a top-down consensus approach in our department." → We use a consultative, consensus-based approach in our department.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 46, 47, and 48.

1. In the English-speaking business world, people routinely use first names even when they do not know each other very well.

2. A company day where employees are allowed to wear less formal clothing than a standard business suit is called a casual Friday.

3. Being at work when you do not actually need to be there, simply to demonstrate commitment, is known as a culture of presenteeism.

4. A phone extension that is not connected by a physical wire, allowing movement around a home or office, is a cordless phone.

5. A phone number that provides free access for callers, such as an 0800 number, is a toll-free number.

Part B: Matching Etiquette Terms

1. B Surname
2. E Smart casual
3. D Punctuality
4. C Pager

5. AVideoconferencing

- **A.** Holding a face-to-face meeting across locations using computers and cameras
- **B.** A family name shared across relatives
- **C.** A device that receives written messages while on the move
- **D.** Arriving at meetings or appointments on time
- **E.** A relaxed yet professional style of dress that avoids full suits

Part C: Short Answer Exercises

1. What is the standard convention regarding names in the English-speaking business world?
Businesspeople in English-speaking settings frequently address one another by their given names.

2. How do attitudes toward **time** and schedules vary across different business
In certain cultures, arriving on time is essential; in others, timing and schedules are treated less rigidly.

Part A: Fill in the Blanks

1. A formal meeting open to all shareholders of a company held once a year is an Annual General Meeting or AGM.

2. Before a meeting begins, the chairperson prepares a list of items to be discussed, known as the agenda.

3. During a meeting, the person taking notes records the decisions and discussions to produce the official minutes.

4. When a chairperson wants to open a meeting or direct attention to the first item, they formally opens the meeting.

5. Inviting specific participants to speak during a discussion helps ensure everyone has an opportunity to share their views.

Part B: Matching Meeting Terms

1. C Chairperson
2. E Agenda
3. D Minutes

4. BAction points

5. AVenue

- **A.** The official physical or virtual location where a meeting takes place
- **B.** Specific tasks assigned to individuals to execute after the meeting concludes
- **C.** The person responsible for running the meeting and keeping order
- **D.** The written record of what was discussed and decided
- **E.** The structured list of topics scheduled for discussion

Part C: Short Answer Exercises

1. What are the key responsibilities of a chairperson *during* a meeting?
During the meeting, the chairperson directs each item, manages speaking time and records agreed outcomes.

2. Why is it important to distribute an agenda well in advance of a meeting?
An early agenda gives attendees time to review topics, resulting in more productive discussions.

Part A: Fill in the Blanks

1. Using cautious language and qualifying phrases to avoid making overly direct or absolute statements is called hedging.

2. A negotiation approach where both parties work to find solutions that benefit everyone involved is a win-win situation.

3. Asking detailed and probing questions during negotiations helps uncover the other party's underlying needs.

4. When negotiators offer something they value less in exchange for a concession from the other side, they are making trade-offs.

5. When a negotiation stalls completely because neither side will compromise or move forward, they have reached a deadlock.

Part B: Matching Discussion & Negotiation Terms

1. D_____ Hedging

2. C_____ Consensus

3. EProbing

4. BCounter-proposal

5. AMediator

- **A.** An independent third party brought in to help resolve a deadlock
- **B.** A responding offer made in reaction to an initial bargaining position
- **C.** General agreement reached collectively by all participants
- **D.** Using cautious, non-committal language to soften statements
- **E.** Asking exploratory questions to investigate underlying interests

Part C: Error Correction

Correct the italicized phrases:

1. "We reached a deadlock, so we made a win-win compromise that pleased nobody." → We avoided deadlock by reaching a win-win compromise that satisfied both sides.

2. "During the meeting, he used too much hedging so his point was extremely direct and clear." → During the meeting, he used very little hedging, so his point was direct and clear.

Part A: Fill in the Blanks

1. A brief presentation given to inform colleagues or clients about a specific project update or status report is often structured around different types of presentations, such as a product launch.

2. When preparing a presentation, speakers should practice to ensure proper timing, avoiding rushing through the material or exceeding the allocated time.

3. Maintaining eye contact, varying vocal tone, and projecting your voice properly are all vital elements of managing your delivery during a speech.

4. Building positive engagement and mutual connection with your audience is essential for establishing good rapport early in your presentation.

5. Visual materials such as slides, handouts, and diagrams used to illustrate key concepts during a speech are called visual aids.

Part B: Matching Presentation Terms

1. DPreparation
2. ARapport
3. BBody language
4. CVisual aids
5. EQ&A session

- **A.** A harmonious, trusting relationship established between speaker and listeners
- **B.** Postures, gestures, and physical movements used while speaking
- **C.** Charts, slides, and diagrams used to clarify information visually
- **D.** The structured process of planning, drafting, and organizing your speech
- **E.** The concluding segment dedicated to answering listener inquiries

Part C: Short Answer Exercises

1. What are the key dos and don'ts when preparing the introduction of a presentation?
Give a warm welcome, explain your aim and preview the sections. Do not begin with unnecessary details or vague statements.

2. How should a speaker handle difficult or hostile questions during the final question-and-answer period?
Keep a calm tone, make sure you understand the question and reply factually rather than defensively.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 62 and 63.

1. A negotiation where two parties try to reach an agreement over a contract or dispute is heavily influenced by the initial stage of negotiation.

2. Before entering formal talks, experienced negotiators spend significant time preparing their strategy, identifying their objectives and acceptable bargaining points.

3. The bargaining stage involves making concessions and counter-proposals to move the discussion closer to a mutually acceptable agreement.

4. Different negotiators exhibit different negotiating styles, ranging from cooperative and collaborative to highly confrontational and hard bargaining.

5. When preparing for a complex international deal, understanding cultural nuances is just as critical as analyzing the financial terms of the deal.

Part B: Matching Negotiation Terms

1. C Bargaining
2. D Concession
3. A Counter-proposal
4. E Negotiating style
5. B Deal

- **A.** A responding offer made in reaction to an initial bargaining position
- **B.** An agreement or contract reached after successful discussions
- **C.** The active discussion process of trading concessions to reach agreement
- **D.** Something given up voluntarily by one party to encourage agreement
- **E.** The characteristic approach or behavioral pattern adopted by a negotiator

Part C: Error Correction

Correct the italicized phrases:

1. "During the bargaining phase, we refused to make any concessions and immediately signed the contract." →
During the bargaining phase, we exchanged concessions before agreeing on and signing the contract.

2. "His negotiating style was entirely cooperative, meaning he shouted down every proposal made by the other side." →
His negotiating style was entirely confrontational: he shouted down every proposal made by the other side.

OMR, CHENNAI - 119

EN25C09: Professional English- I (LAB INTEGRATED)

MODEL EXAM I –PRACTICE WORKSHEET

PART - A (15 X 1 = 15 Marks)

Answer ALL questions. Each question carries 1 mark.

1. Fill in the blank with the correct form of the verb given in bracket:

The automated system _____ (monitor) the temperature continuously to ensure safe operation.

Answer: monitors

2. Fill in the blank with the correct past form of the verb given in bracket:

The engineers _____ (record) the vibration readings during yesterday's trial.

Answer: recorded

3. Complete the sentence with the appropriate comparative form of the adjective in bracket:

The newly developed composite material is significantly _____ (strong) than the conventional material while maintaining a lower weight.

Answer: stronger

4. Fill in the blank with an appropriate modal auxiliary verb: (must/can/might)

Engineers _____ follow safety regulations while operating heavy machinery.

Answer: must

5. Fill in the blank with a suitable modal auxiliary verb expressing capability: (can, may, might)

Modern sensors _____ detect even minor changes in temperature.

Answer: can

6. Combine the sentences into a single coherent sentence using a suitable relative pronoun:

(a) The laboratory developed a new testing device. (b) The device measures material strength with high precision.

Answer: the laboratory developed a new testing device that measures material strength with high precision

7. Complete the sentence using the correct form of the verb in bracket (First Conditional – If Clause):

If the temperature rises (rise) above the permissible limit, the cooling system will activate automatically.

8. Complete the sentence using the correct form of the verb in bracket (Third Conditional – Past Unreal Conditional):

If the technician had inspected the circuit earlier, the equipment _____(not / fail) during operation.

Answer: would not have failed

9. Combine the following sentence using an infinitive of purpose (to + verb):

The mechanics installed dual damper springs. They wanted to isolate chassis resonance.

Answer: the mechanics installed dual damper springs to isolate classic resonance

10. Fill in the blank with the gerund form of the verb in bracket after the preposition:

The research team reduced energy consumption by _____ (optimize) the motor control algorithm.

Answer: optimizing

11. Convert the following active voice into the Impersonal Passive Voice:

The lab assistant poured 50 mL of hydrochloric acid into the titration flask.

Answer: 50 ml of hydrolchloric acid was poured into the titration flask

12. Fill in the blank with the appropriate adverbial form derived from the adjective in bracket:

The robotic arm moves _____ (smooth) to ensure accurate positioning of the component.

Answer: smoothly

3. ***Combine the technical statements into a single cohesive sentence using a defining or non-defining relative clause:***

   The engineer designed a new cooling system. It reduces the temperature of industrial machines.

   Answer:
   (Non-defining alternative: a new cooling system, which reduces the temperature of industrial machines.)

4. ***Complete the following conditional sentences logically:***

   (a) If the battery voltage drops below the required level,
   Answer :The device will shutdown automatically .

   (b) If the technician had checked the connections earlier,
   Answer The failure would not have occured.

5. ***Convert the following active sentences into the Impersonal Passive Voice suitable for formal engineering reports:***

   The laboratory assistant heated the solution to 80°C before testing.

   Answer:
   The solution was heated to 80 c before testing

6. ***Rewrite the following direct engineering query into Reported (Indirect) Speech:***

   The project manager asked the technician, "Have you inspected the pressure valves before starting the compressor?"

   Answer:
   The project manager asked the technician whether he had inspected the pressure valves before starting the computer

7. ***Identify and correct the grammatical errors involving mass/uncountable nouns in the following sentences:***

   (a) ***The engineer received many feedbacks on the new design.***
   Answer ;The engineer received a lot of feedback (not 'feedbacks') on the new design

   (b) ***The students received several useful advices from their teacher.*** Answer : The students received several pieces of useful advice (not 'advices') from their teacher.

8. ***Rewrite the sentences using an Infinitive of Purpose or a Gerund construction:***

13. Rewrite the direct into indirect speech:

The project supervisor asked the engineer, "Did you calibrate the pressure sensor before testing?"

Answer: the project supervisor asked the engineer whether(if) he had calibrated the pressure sensors before testing

14. Identify the incorrect noun form and rewrite the sentence correctly:

The laboratory purchased several new equipments for conducting material testing.

Answer: incorrect noun: equipments .correct sentence :the laboratory purchased several new pieces of equipment for conducting material testing

15. Fill in the blank using the correct irregular comparative form (better, worse, farther/further, less, more):

Because the heat sink had poor thermal paste contact, heat dissipation was _____ (bad) than expected.

Answer: worse

PART - B(10X2=20Marks)

Answer all questions. Each question carries 2 marks.

1. ***Rewrite the following active operational and laboratory description in the Simple Past Tense:***

   The engineer calibrates the pressure sensor and verifies its accuracy.

   Answer:
   the engineer calibrated the pressure sensor and verified its accuracy

2. ***Draft two comparative sentences comparing a laptop and a desktop computer in terms of portability and screen size.***

Answer **(Portability):a laptop is more portable than a desktop computer**

Answer ***(Screen Size):*** A desktop computer usually has a large screen than a laptop

(a) ***The technician wears safety gloves. He wants to protect his hands.*** rightarrow
Answer:The technician wears safety gloves to protect his hands.

(b) ***The cooling fan operates continuously. It prevents the motor from overheating.*** Answer:The cooling fan operates continuously to prevent the motor from overheating

9. ***Fill in the blanks with the correct adverbial forms of the bracketed words:***

a) The machine operates efficiently.(efficient) to reduce energy consumption.

(b) The technician checked the electrical connections carefully (careful) before starting the machine.

10. ***Insert suitable modal auxiliary verbs to match the specified functional meaning:***

(a) The robotic arm can (capability) lift heavy components with precision.

(b) Visitors must not (strict prohibition) enter the testing area without authorization.

PART - C(5X13=65Marks)

Answer all questions (Choose either 'a' or 'b' where options are provided). Each question carries 13 marks.

Question 26

26. a) Write a set of eight clear, imperative safety instructions to promote safe and responsible use of the internet and protect users from cyber threats. ***(13 Marks)***

o ***Workspace / Planning Area:***

1. Create strong, unique passwords for every account, and never reuse them.
2. Enable two-factor authentication on all important accounts.
3. Do not click suspicious links or open attachments from unknown senders.
4. Keep your operating system, browser and antivirus software updated.
5. Never share passwords, OTPs or bank details with anyone online
6. Avoid public Wi-Fi for banking, or use a trusted VPN.
7. Download apps and files only from official stores and verified we
8. Report cyberbullying, scams and fraud immediately to the cyber crime helpline (1930) or cybercrime.gov.in.

Question 27 (Choose either 27.a or 27.b)

27. a) Write a descriptive essay of 250 words about "A Traditional art form in your region and how modern initiatives can preserve its cultural significance." Discuss its historical origins, traditional practices, and ways to promote and sustain it among younger generations. ***(13 Marks)***

OR

27. b) Write a structured travel plan and descriptive feature (250 words) on "An Educational Trip to a Place of Historical and Cultural Importance." Include travel arrangements, important landmarks, local food experiences, and observations of the region's cultural heritage and traditions. ***(13 Marks)***

Q27.a.

Bharatanatyam: a traditional art form of Tamil Nadu Outline: Introduction (origin) - Body 1 (traditional practices) - Body 2 (preservation and promotion) Conclusion. Word count: 250 Bharatanatyam is the pride of Tamil Nadu and one of India's oldest classical dance forms. Its roots lie in the ancient Tamil epic Silappathikaram and in the temple sculptures of Thanjavur and Chidambaram, which depict poses described in the Natya Shastra. Originally called Sadir or Dasi Attam, it was performed by devadasis in temples as an offering to the deity. In the twentieth century, Rukmini Devi Arundale and E. Krishna Iyer revived it and restored its dignity on the public stage. Traditionally, the dance combines nritta (pure movement), nritya (expressive storytelling) and natya (drama). Dancers wear pleated silk costumes, temple jewellery and ghungroos, and use precise footwork, hand gestures called mudras and facial expressions to narrate mythological stories. The art is taught through the guru-shishya parampara, in which students train for years under a master. The training ends with the arangetram, the debut performance. Today, rapidly changing entertainment habits threaten this heritage, but modern initiatives can protect it. Schools and colleges can introduce dance classes and cultural clubs. Online platforms can stream performances and tutorials. Government scholarships and festivals such as the Margazhi season in Chennai can support young artists. Collaborations with film, fusion music and digital storytelling can attract youth without losing the tradition's core, while video archives can safeguard rare compositions. In conclusion, Bharatanatyam is more than entertainment; it is a living record of our history, spirituality and identity. By combining tradition with technology and encouraging young learners, we can ensure its anklet bells keep ringing for generations.

Q27.b **An educational trip to Mahabalipuram Travel plan**

Destination: Mahabalipuram, about 55 km from Chennai

Transport: College bus via East Coast Road, leaving 7:00 AM and returning by 6:00 PM

Arrangements: Principal's permission, accompanying faculty, official guide, entry tickets, first-aid kit

Schedule: Shore Temple, Pancha Rathas, Arjuna's Penance, lunch, sculpture street Descriptive feature

(Word count: 250)

Our department organised an educational trip to Mahabalipuram, a UNESCO World Heritage Site about 55 km from Chennai. The visit aimed to help us understand the history and culture of Tamil Nadu through first-hand observation. We left the college by bus at 7 a.m. and reached the ancient Pallava port town in ninety minutes along the scenic East Coast Road. Our first stop was the Shore Temple, an eighth-century granite structure standing proudly against the sea breeze. Next we visited the Pancha Rathas, five monolithic chariots carved from single rocks, and Arjuna's Penance, a giant relief narrating mythological scenes. Krishna's Butter Ball, a massive boulder balanced on a slope, amazed everyone. Our guide explained Dravidian architecture and the maritime trade between the Pallavas and Southeast Asia. For lunch, we enjoyed local food: fresh seafood, sambar rice, curd rice and crispy vadai at a beachside restaurant, followed by filter coffee. The simple, flavourful meals showed us how closely cuisine is tied to coastal culture. Observing the region, we noticed that stone carving is still a living tradition. Local sculptors chisel idols using techniques passed down through generations. The residents were warm and proud of their heritage, and the annual Mamallapuram Dance Festival shows how the culture is celebrated. We returned by 6 p.m., tired but enriched. Everyone carried home notes, photographs and memories. The trip taught us that history is best learned by standing in front of it, and it deepened our respect for the artisans who created this timeless legacy.

28. b) Draft a formal Letter of Request to the Principal of your college seeking permission to participate in a technical workshop on Artificial Intelligence and Emerging Technologies organised by a reputed institution. Mention the objectives of participation, the expected learning outcomes, and the arrangements required. ***(13 Marks)***

Iswarya Roll No. 26CS1307
[Department], I Year
St. Joseph's College of Engineering, OMR, Chennai - 119
20 October 2026

The Principal
St. Joseph's College of Engineering
OMR, Chennai - 119

Subject: Request for permission to attend a technical workshop on Artificial Intelligence and Emerging Technologies

Respected Sir/Madam,

I am a first-year student of [Department]. I request your permission to participate in a technical workshop on "Artificial Intelligence and Emerging Technologies", organised by [Name of Institution] on [date] at [venue].

Objectives: To gain practical knowledge of AI tools and concepts, learn about emerging technologies from industry experts, and strengthen my technical skills for future projects.

Expected learning outcomes: I expect to understand the basics of machine learning, gain hands-on experience and earn a participation certificate. I will also share what I learn with my classmates.

Arrangements required:

1. Permission for absence from classes on the workshop days, with a commitment to cover the missed portions.
2. A bonafide certificate for registration.
3. Permission to travel to the venue at my own expense.

I will follow the rules of both institutions. I shall be grateful if you grant my request.

Thanking you,

Yours obediently,
Iswarya (Roll No. 26CS1307

Question 29 (Choose either 29.a or 29.b)

29. a) Compose an analytical essay (250–300 words) comparing the advantages and disadvantages of Artificial Intelligence–Based Assessment versus Traditional Teacher-Based Assessment in engineering education. Evaluate assessment accuracy, feedback time, fairness, and the role of human judgement. ***(13 Marks)***

OR

29. b) Write a compare-and-contrast essay of 250–300 words analysing the advantages and disadvantages of Living in Urban Areas versus Rural Areas. Discuss employment opportunities, cost of living, access to education and healthcare, and quality of life. ***(13 Marks)***

Question 28 (Choose either 28.a or 28.b)

28. a) Write a formal Letter of Request to the Librarian of your college seeking permission to extend library working hours during the semester examination period. Explain the academic benefits, the expected student participation, and the arrangements required to ensure proper use of library facilities. ***(13 Marks)***

Iswarya Roll No. 26CS1307
[Department], I Year
St. Joseph's College of Engineering, OMR, Chennai - 119
20 October 2026

The Librarian
St. Joseph's College of Engineering
OMR, Chennai - 119

Subject: Request for extension of library working hours during semester examinations

Respected Madam/Sir,

I am a first-year student of [Department]. I request your kind permission to extend the library's working hours during the upcoming semester examinations.

During examinations, students need a quiet, well-resourced place to study. The library's reference books, previous question papers and journals are not easily available elsewhere, and hostel students find it hard to study in shared rooms. Hours extended until 9:00 PM would allow systematic revision, reduce last-minute stress and improve academic performance.

I expect about 100 to 150 students to use the library daily. To ensure proper use, I suggest that:

1. A staff member be on duty during the extra hours.
2. Entry be allowed only with a valid ID card.
3. Silence and library rules be strictly followed.
4. Lights and fans be arranged in the reading hall.

I assure you of the students' full cooperation. Kindly consider my request.

Thanking you,

Yours faithfully,
Iswarya (Roll No. 26CS1307

Q29.a AI-based vs teacher-based assessment in engineering education

Matrix: Accuracy, feedback time, fairness and human judgement, compared for AI and teachers.

Word count: 266

Assessment is central to engineering education, and the rise of Artificial Intelligence has sparked a debate between AI-based and traditional teacher-based evaluation. On accuracy, AI grades objective answers, code and numerical problems consistently and without fatigue. Teachers, however, interpret creative or partially correct solutions better, where an algorithm may miss the student's intent. Feedback time is AI's greatest strength: students receive results and suggestions within seconds, while manual evaluation of large classes can take weeks and delay improvement

Fairness is a mixed issue. An AI tool is free from mood, favouritism and tiredness, so every script is judged by the same rules. However, it may carry bias from its training data and can penalise unusual but valid answers. Teachers may be subjective, but they can consider effort, context and progress. Human judgement remains irreplaceable. Teachers evaluate originality, ethical reasoning, teamwork and communication, qualities engineers need but machines cannot fully measure. They also provide motivation and personal mentoring. AI, on the other hand, offers analytics that reveal learning gaps across a whole class. AI assessment also has disadvantages, including high setup cost, technical failures, data privacy risks and over-dependence on technology. Traditional assessment is slow and inconsistent for large groups, yet it builds a personal bond between teacher and student. In conclusion, neither method is perfect alone. The best approach is a blended model in which AI handles routine, objective evaluation and instant feedback, while teachers assess creativity, reasoning and character. Such cooperation will make assessment faster, fairer and more meaningful. In engineering education, where skills and problem-solving matter most, this balance is especially valuable for students.

Q29.b Living in urban areas vs rural areas

Matrix: Employment, cost of living, education and healthcare, and quality of life, compared for urban and rural **Word count:** 275

Choosing between city and village life is a decision many young engineers face, as both have clear benefits and drawbacks. Employment: Urban areas offer a wide range of jobs in IT, manufacturing, finance and services, with higher salaries and career growth. Cities also host internships, startups and industry networking that help fresh graduates. Rural areas depend mainly on agriculture and small industries, so opportunities are limited and many young people migrate. Cost of living: Cities are expensive; rent, transport, food and utilities consume a large share of income. However, higher salaries in cities do not always translate into higher savings. Villages are cheaper, with lower housing costs and fresh local food, although earnings are also lower. Education and healthcare: Cities have reputed colleges, coaching centres, specialist hospitals and advanced diagnostic facilities. Urban children also enjoy wider exposure to libraries, laboratories and extracurricular activities. Rural areas often lack good schools, higher education institutions and hospitals, so people travel long distances for emergency care. Digital learning and telemedicine are now narrowing this gap. Quality of life: Villages offer clean air, open space, peace and strong community bonds. Rural residents also face fewer transport options and limited entertainment. Cities bring pollution, traffic, noise, overcrowding and stress, but they also provide entertainment, better transport, high-speed internet and modern amenities. Improved roads and internet in villages, together with the spread of remote work, are reducing the difference between the two. To conclude, urban life suits those seeking career growth and facilities, while rural life suits those who value affordability, calm and community. With better infrastructure in villages and better planning in cities, both can offer a good quality of life.

Question 30 (Choose either 30.a or 30.b)

30. a) Draft a personal email to your school friend sharing your experiences during the first semester of your engineering course. Describe your new friendships, classroom activities, adjustment to college life, and expectations for the upcoming semester examinations. ***(13 Marks)***

OR

30. b) Draft a personal email to your school friend describing your experience attending the orientation programme for first-year engineering students at your college. Highlight the activities conducted, the introduction to academic facilities and college regulations, and how the programme helped you understand college life and prepare for your academic journey. ***(13 Marks)***

Q30.b Email about the orientation programee

To iishu6978@gmail.com
Subject: My orientation programme at college

Hi Dinesh,

How are you? I want to tell you about the orientation programme for first-year students at my college. It was a wonderful start. The programme began with a welcome address by the Principal, followed by icebreaking games and group activities that helped us meet our classmates. Seniors shared their experiences and gave useful advice about studies and campus life. We were then taken on a tour of the library, laboratories, workshops, sports ground and canteen. The faculty explained the college rules, including attendance requirements, the dress code and the examination system. The programme helped me understand college life and removed much of my nervousness. I now feel prepared and motivated for my academic journey. Please write back and tell me about your college too. Hoping to meet you soon!

Best wishes,

Iswarya

Q30.a Email about the first semester

To iishu6978@gmail.com
Subject: My first semester in engineering

Hi Dinesh,

I hope you are doing well! I wanted to tell you about my first semester. College felt strange at first, but I have made great friends. My roommate and classmates have become like family, and we study and have fun together. In class, we have lab sessions, group presentations and coding practice, which are very different from school. I enjoy the hands-on experiments the most. Adjusting to hostel life took time, especially managing my schedule and daily chores, but I now feel more independent and disciplined. The workload is heavier, so I have learnt to plan my time and make notes regularly. The semester examinations are coming up. I am a little nervous but confident, as I revise daily and do group study. How is your college going? Do write back and tell me everything. Let's meet during the holidays!

Take care,

Iswarya

SUMMARY OF INTERCHANGE WORKSHEETS

Overview

• The worksheets helped me improve my understanding of English grammar, vocabulary, punctuation, sentence structure, and everyday communication.

• I practised identifying language errors, choosing suitable words, and applying corrections in context.

• The activities helped me notice how grammar and vocabulary work together when communicating naturally.

What I Have Learned

• I strengthened my understanding of tenses, articles, prepositions, sentence patterns, punctuation, and word usage.

• I practised using idioms and expressions and distinguishing between words with similar meanings.

• I became more aware of how context affects the choice of words and expressions.

Challenges I Faced

• At times, I found it difficult to select the most natural tense, preposition, or sentence structure.

• I learned that a sentence may be grammatically correct but still sound unnatural in conversation.

• While speaking, I sometimes repeated words or used expressions that could be made clearer.

What I Want to Improve Further

• I want to expand my vocabulary and improve grammar, punctuation, and sentence formation.

• I want to speak more fluently and organise my thoughts without pausing too often.

• I will continue checking my own writing and learning from corrections.

Usefulness and Impact

• The practice has made me more careful about the way I use English in writing and speaking.

• It has improved my confidence and helped me understand why corrections are needed.

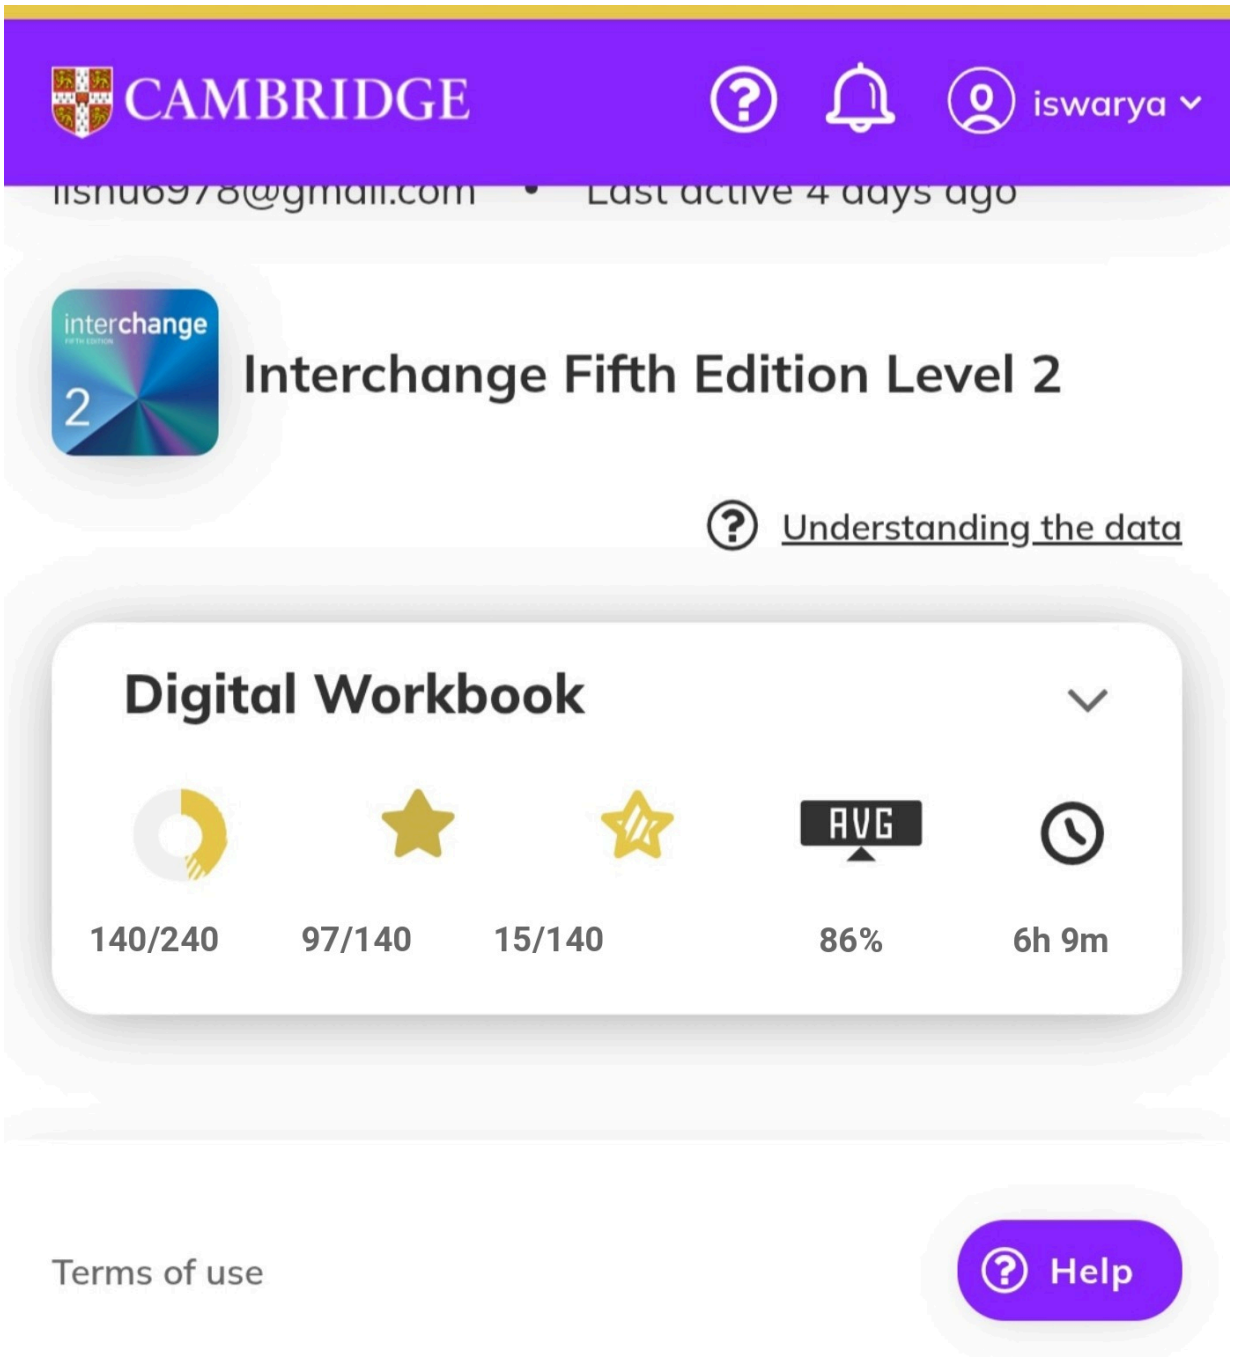

• I am becoming more independent in recognising and improving my language mistakes.

Overall Reflection

I have learned that improving English involves more than memorising rules. It also requires understanding context, noticing natural expressions, and practising regularly. These skills will support my academic work, presentations, and future professional communication.

PROJECT PROPOSAL: IDEATION

LEAK GUARD — Sensitive Data Leakage Prevention

1. The Need Behind the Idea

Personal information and confidential files are shared every day through emails, web forms, cloud platforms, and digital applications. Sometimes sensitive details such as phone numbers, identity information, passwords, or private documents may be shared with the wrong person or exposed through unsafe links. A user may not notice the risk before sending or uploading the information. This creates a need for a simple system that can identify sensitive data and warn users before a possible leak occurs.

The central question: How can we detect sensitive information before it is accidentally exposed?

2. How the Idea Developed

The idea is based on common digital safety problems: people sometimes paste private information into public forms, upload confidential files to open locations, or share links without checking access permissions. These situations show that data protection should not depend only on users remembering every safety rule. A helpful tool can provide an additional check at the moment information is about to be shared.

3. From the Problem to a System

Leak Guard is planned as a privacy-support tool that checks text or selected files for possible sensitive information. It can look for patterns such as email addresses, phone numbers, identification-like numbers, and other user-defined confidential terms. When a possible risk is found, the system can highlight the matching content, explain why it may be sensitive, and suggest masking or removing it before sharing. The tool is intended to assist the user; it does not replace careful judgement or an organisation’s security policy.

Detect → Classify → Alert → Mask → Review

4. Proposed Innovation

The proposed solution combines rule-based pattern detection with the possibility of adding machine-learning support in a later stage. In the initial version, predefined patterns and keywords can identify common sensitive data. A clear warning screen can show the type of information detected and allow the user to review the content. Future versions may use context-aware AI to reduce unnecessary alerts and identify sensitive information that does not follow a fixed pattern.

5. Core Features

Sensitive-data detection: Identify common personal and confidential information such as email addresses, phone numbers, and configured ID patterns.

Risk alerts: Display a warning when potentially sensitive content is detected before sharing.

Data masking: Suggest hiding selected characters or replacing sensitive values with placeholders.

File and text review: Allow users to check pasted text and supported files before uploading or sending.

User-defined rules: Let users add keywords or data patterns that should be treated as confidential.

Privacy-first handling: Process content carefully and avoid storing scanned data unless the user explicitly chooses to save it.

6. Innovation Potential

Leak Guard focuses on prevention rather than responding only after information has been exposed. Giving users a timely warning and a simple way to mask information may reduce accidental sharing. The idea can be developed from a basic pattern-checking prototype into a smarter assistant that understands context and supports more types of sensitive information.

7. Potential Applications

Students: Check assignments or shared documents before posting personal details.

Educational institutions: Help users notice accidental exposure of student or staff information.

Small businesses: Review text and documents before sharing customer or business details.

Work teams: Add a safety check to routine file and message-sharing workflows.

8. Future Scope

Future improvements may include context-aware machine-learning models, browser or email integration, support for more file formats, configurable organisational policies, audit summaries that do not expose the original sensitive content, and multilingual detection. These are proposed enhancements and are not claimed as completed features.

9. Conclusion

Leak Guard aims to make safer data sharing easier by identifying possible sensitive information, alerting users, and suggesting masking before exposure. By combining simple detection methods with a privacy-first design and future AI/ML improvements, the proposed project can support responsible use of digital information.

Protect sensitive data before it becomes a data leak.

LINKEDIN PROFILE

S. Iswarya

Computer Science and Engineering Student | Aspiring AI & ML Engineer

Profile URL: linkedin.com/in/iswarya-sreenivasulu-941769312

About

I am a Computer Science and Engineering student interested in Artificial Intelligence and Machine Learning. I am currently strengthening my programming fundamentals, logical reasoning, and problem-solving skills. I enjoy learning new concepts, exploring how technology can address practical problems, and improving through consistent practice.

I aim to develop my knowledge of Python, data analysis, machine learning, and deep learning through coursework, guided learning, and hands-on projects. I value curiosity, collaboration, clear communication, and responsible use of technology.

Education

St. Joseph's College of Engineering
Computer Science and Engineering
2026–2030

Skills and Interests

• Foundational C programming and computational thinking.

• Creative problem-solving, communication, and presentation design.

• Artificial Intelligence, Machine Learning, Python, Data Science, and Deep Learning (learning interests).

Languages

Telugu — Native | Tamil — Proficient | English — Proficient

Contact

Email: iishu6978@gmail.com
GitHub: github.com/ishucore

LinkedIn page content was not fully accessible in the public page view; this profile summary uses the details provided by you and the information available in the uploaded record.

GITHUB PROFILE

ishucore

Learning today. Building tomorrow.

Profile URL: https://github.com/ishucore

Profile Overview

The public GitHub profile uses the username **ishucore** and the profile tagline **“Learning today. Building tomorrow.”** This expresses a learning-focused approach to software development and technical growth.

Technical Direction

As an aspiring AI & ML Engineer, I plan to use GitHub to organise my coding practice, document learning projects, and gradually build a portfolio. My initial focus is on strengthening C and Python fundamentals before moving towards data analysis and machine-learning projects.

Planned Repository Development

• Beginner programming exercises with clear explanations.

• Small Python projects and data-analysis experiments.

• Introductory machine-learning projects using accessible datasets.

• Project README files describing the problem, approach, tools, and learning outcomes.

Professional Links

GitHub: https://github.com/ishucore
LinkedIn: https://www.linkedin.com/in/iswarya-sreenivasulu-941769312
Email: iishu6978@gmail.com

Only the username and tagline were visible on the public GitHub page when checked. No public repositories were displayed at that time, so repository achievements have not been assumed or added.

PROFESSIONAL PROFILE: LEARNING AND ACHIEVEMENTS

S. Iswarya | Aspiring AI & ML Engineer

Skills

• C programming — foundational.

• Creative problem-solving, presentation design, and communication.

Languages

Telugu — Native
Tamil — Proficient
English — Proficient

Certification / Learning

Fundamentals of Computing — SWAYAM (Ongoing)

Hackathon Participation

BuildX Hackathon — Participation Certificate
Crescent Institute
4–5 November 2026

Career Goal

AI & ML Engineer — building strong foundations today to develop practical, responsible AI solutions in the future.

Profile Summary

I am a first-year CSE student interested in Artificial Intelligence and Machine Learning. I enjoy learning how technology works, solving problems, and exploring ways to use computing for practical needs. I am strengthening my foundations in programming, computational thinking, and logical reasoning through consistent learning and hands-on practice.

Technical Interests

Artificial Intelligence • Machine Learning • Deep Learning • Data Science • Computer Vision • Natural Language Processing • Python programming

Current Skills

Foundational C programming • Creative problem-solving • Presentation design • Communication

Languages

Telugu — Native | Tamil — Proficient | English — Proficient

Certification / Learning

Fundamentals of Computing — SWAYAM / NPTEL (Ongoing)

Hackathon Participation

BuildX Hackathon — Participation Certificate
Participated at Crescent Institute on **4–5 November 2026**.

Project Proposal

LEAK GUARD — Sensitive Data Leakage Prevention
A proposed privacy-support tool to detect potentially sensitive information, alert users before sharing, and suggest masking to help prevent accidental data exposure.

Career Objective

To become an AI & ML Engineer by building strong technical foundations and creating useful, secure, and responsible technology solutions.
