Editing notes

Existing personal details and project descriptions are preserved. Sparse original NPTEL lecture summaries are replaced by fuller week-by-week notes. The 22 common worksheets are retained with black underlined answers and improved margins. A dedicated Interchange reflection has been added using the recorded activity total.

ShareMeal is described in the source as a planned project/pitch, so no completed app, pilot, or certification is claimed.

About Me

Who I am, what drives me and where I am headed

“I chose CSE to build strong programming and problem-solving skills, so I can create software that helps real people.”

I am a first-year Computer Science and Engineering student. I enjoy solving problems and combining logic with creativity to build things that work. I want to build applications for real-world problems, and my first idea is ShareMeal, a platform that connects surplus food with people who need it. Alongside my software career, I also plan to prepare for the UPSC Civil Services Examination and become an IAS Officer, so I can serve society with integrity and discipline.

Snapshot

Studying	B.E. Computer Science and Engineering, CSE-C (2026 - 2030)
Core target	A career as a Software Engineer in a leading IT company (Google, Amazon)
Currently learning	C programming, JavaScript basics (next), English writing and vocabulary
Learning style	Learn by building, and improve through feedback and revision
Second goal	IAS Officer through the UPSC Civil Services Examination
Strength	Problem solving, creativity, clear career direction

Areas of Interest

Full-Stack Development
Building complete applications, from the screen users see to the database behind it.

Social Impact Technology
Using software to solve community problems such as food waste and hunger.

Problem Solving
Breaking hard problems into steps and testing practical solutions.

Public Service and Leadership
Preparing for civil services with discipline, communication and responsibility.

Soft Skills Coursework

Communication Skills: 8-week course summary

“Communication skills grow in layers.”

Course	Communication Skills (8 weeks)
Structure	Basics (Weeks 1-3), relationships (Weeks 4-5), thinking and influence (Weeks 6-7), real study and work life (Week 8)

Week	Topic	Key ideas I learned
1	The Basics	Communication is two-way. Clear messages need a purpose, audience and simple words. Listening matters as much as speaking.
2	Presentation and Interaction	Plan an opening, key points and a strong close. Voice, pace and eye contact keep people engaged.
3	Visual, Nonverbal and Aural	Body language often says more than words. Visuals should be simple and support the message.
4	Individuals, Groups, Cultures	Group roles and teamwork improve results. Cultural awareness and respect are key.
5	Emotional and Social Skills	Empathy, patience and calm conflict handling build trust.
6	Creativity and Problem Solving	Define the problem, list options, choose, act and review. Question assumptions.
7	Motivation, Persuasion, Leadership	Persuade with credibility and logic. Negotiate for win-win outcomes.
8	Survival Strategies	Time management, clear writing, reliability and well-being keep you resilient.

Why It Matters to Me

Software engineers work in teams, explain ideas and write clearly. UPSC also rewards strong answer writing. These weeks give me a plan to improve my writing and presentation skills.

ShareMeal: 90-Second Pitch

A structured pitch script

1. The Problem (30 sec)

“Every day, hostels, restaurants and homes throw away good food, while people nearby go hungry. Why? Because donors and NGOs do not connect in time. Donations depend on phone calls, and food spoils before it reaches anyone.”

2. The Solution (30 sec)

“Meet ShareMeal. A donor posts surplus food in under a minute. Nearby verified NGOs and volunteers are alerted, one accepts, and pickup is confirmed in the app. Time limits and live status keep the food safe and the process trusted.”

3. Feasibility and Pilot (30 sec)

“We are starting small, with a pilot in a college hostel. We use simple tools: HTML, CSS, JavaScript, Node.js and a database. Success means more meals shared, less food wasted, and a community that helps each other.”

Pitch note: this script is drafted from my project plan and can be adjusted after surveying the local community.

Inspiration: Satya Nadella

A software engineer who became one of the world's most respected leaders

Full name	Satya Narayana Nadella
Role	Chairman and CEO, Microsoft (CEO since February 2014)
Education	Manipal Institute of Technology; University of Wisconsin-Milwaukee; University of Chicago Booth
Known for	Cloud (Azure), AI and culture change

Biographical Summary

Satya Nadella is an engineer by training and a leader by choice. He joined Microsoft in 1992, led its cloud business and became CEO in 2014. He is admired for a quiet, thoughtful style: he listens first, learns constantly and leads with empathy.

Leadership Traits

Empathy
Good leadership and design start with understanding people.

Growth Mindset
He moved Microsoft from a “know-it-all” to a “learn-it-all” culture.

Collaboration
Partnership and teamwork over ego and internal rivalry.

Calm Vision
Early bets on cloud and AI, made with a steady style.

Why He Inspires Me

His path from a middle-class family in Hyderabad to the top of a global tech company shows that steady learning and effort can take you far. I want to treat mistakes as feedback, understand users before writing code, and keep learning every day.

Let's Connect

Let's collaborate on beginner-friendly coding projects, or talk about problem solving, ShareMeal and learning English for tech careers.

Tech stack, languages and the path ahead

Tech Stack and Tooling

Domain	Tools
Languages	C (current); JavaScript (next); Python (planned)
Web (planned)	HTML, CSS, JavaScript, Node.js with Express
Databases (planned)	SQLite or MongoDB, SQL basics
Version control	Git, GitHub, VS Code

English Skills (CEFR)

Skill	Level	Source
Speaking (read aloud)	B1 Intermediate	Cambridge Speak & Improve, 4 Oct 2026
Writing	A2 Pre-Intermediate, improving	Cambridge Write & Improve
Vocabulary	A2: about 1,500 words known, 1,250 left to reach B1	Online vocabulary test
Course practice	Interchange Level 2: 142 of 240 activities, 92% average	Cambridge Digital Workbook

Career Roadmap

DONE	Started B.E. in Computer Science and Engineering; set career goals and wrote a SWOT analysis.
IN PROGRESS	Building strong foundations in C and English; planning the ShareMeal project.
GOAL	Learn JavaScript, build projects and share them on GitHub.
LONG-TERM	Become a Software Engineer in a leading company, then prepare for the UPSC Civil Services Examination.

Certifications and Achievements

- CEFR B1 in read-aloud speaking: Speak & Improve (Cambridge), October 2026.
- CEFR A2 writing level with improvement noted: Write & Improve (Cambridge).
- Completed the 8-week Communication Skills course summary (Section 03).
- B.E. candidate in Computer Science and Engineering, batch 2026 - 2030.

SWOT Analysis: Software Engineering Career Path

Strategic evaluation of my own profile

Target profile	1st Year CSE Student (Roll No: 26CS1252)
Target domain	Software Engineering / Full-Stack Development (Google, Amazon)
Core base	C Programming

Strengths (Internal)

- Problem-solving mindset
- Creative approach: logic plus creativity
- Interest in building real applications
- Clear career direction
- Strong ambition

Weaknesses (Internal)

- Beginner stage
- Programming knowledge limited to C
- Full-stack skills still developing
- Limited hands-on experience
- English writing at A2 level

Opportunities (External)

- Full-stack path from C to web apps
- JavaScript as the next skill
- Google and Amazon as target employers
- Free tools: GitHub, Cambridge English
- Parallel IAS pathway

Threats (External)

- High competition
- Rapid technology change
- Balancing CSE and IAS preparation
- Slow progress delaying full-stack readiness
- Strong interview demands

SWOT Action Direction

Build: use problem solving and creativity to create practical applications. **Improve:** strengthen C fundamentals, learn JavaScript step by step, and raise writing to B1. **Explore:** move toward full-stack development while preparing for preferred roles and the IAS exam. **Manage:** keep consistent learning with a weekly timetable.

English Assessment & Practice Supplement

Featured Project: ShareMeal

Reducing food waste and hunger in our community

Project lead	Hemaguru R
Project	ShareMeal: Surplus Food Sharing
Domain / Level	Social Impact, Full-Stack Web | 1st Year CSE, Beginner

“Our goal is simple: connect extra food with people who need it, before it spoils.”

The Challenge

Good food is thrown away by hostels, restaurants, functions and homes, while people nearby go hungry. Donors do not know who needs food, and NGOs do not know when and where it is available.

Slow Phone-Call Donations
Food often spoils before it reaches anyone.

No Real-Time View
No simple way to see nearby surplus food.

Trust and Safety Worries
Donors worry about safety and who will collect the food.

Missed Connections
Volunteers and NGOs want to help but lack timely information.

The Solution

A simple web and mobile-friendly platform where donors post surplus food in under a minute, and nearby verified receivers or volunteers accept and collect it before it expires. Time limits, location matching and status updates keep it fast and trustworthy.

How It Works

Step	Action	Result
1. Post	Donor enters food type, quantity, place and safe-until time	Listing created
2. Notify	System finds nearby receivers and volunteers	Alert sent
3. Accept	A receiver accepts the listing	Listing locked
4. Pickup	Volunteer or receiver collects the food	Status: Collected
5. Feedback	Donor and receiver confirm and rate	Trust score updated

Key Features, Stack and Plan

- **Features:** quick listing with photo and expiry, nearby matching, live status, verified users, impact dashboard.
- **Stack:** HTML, CSS, JavaScript front end; Node.js with Express; MongoDB or SQLite; map and location API; Git and GitHub.
- **Plan (14 weeks):** learn JavaScript and survey the hostel mess and NGOs (1-3), build the front end (4-6), add back end and status tracking (7-10), location matching, hostel pilot and deployment (11-14).
- **Safety:** only fresh, covered food; verified profiles and ratings; exact address shared only after a request is accepted.
- **Future scope:** mobile app, Tamil and Hindi support, SMS alerts, partnerships with NGOs and local authorities.

Interchange Exercises & Reflection

Recorded coursework: Cambridge Interchange Level 2 digital workbook | 142 out of 240 activities | completed, with a 92% average, as shown on my CambridgeOne progress page at the end. These figures describe the recorded activities, not completion of the entire workbook.

What the exercises are helping me practise

Short listening, reading and language activities can improve my ability to understand instructions, select suitable expressions and respond in complete sentences.

How this connects with my goals

A software engineer needs to communicate a bug clearly, read requirements and explain a proposed feature. My UPSC preparation also makes careful reading and organised writing useful skills.

My current improvement priorities

I want to move from individual correct answers to confident speaking and writing. I can read a short article, summarise its main point and check my grammar after each practice session.

Practical weekly routine

Complete a few additional workbook activities when available; record difficult vocabulary; practise a short spoken explanation of ShareMeal; write and revise a brief paragraph about a topic from college.

Reflection

Completing 142 of 240 activities with a 92% average is steady progress. I should not treat a high score as mastery, but use it to find weaker areas and keep practising regularly.

Week 1 - Lecture 1

Introduction 1: Highlights of Developing Soft Skills

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

Soft skills describe habits that help a person interact, make decisions and use technical knowledge responsibly. They include listening, speaking clearly, preparing for a task, working with others and accepting feedback. The introductory lecture reminds learners that a degree is important, but behaviour can determine whether knowledge is understood and applied.

Understanding and interpretation

Practise the combination of a clear message, respectful listening and a useful follow-up. Communication improves when I check that another person understands the intended meaning, not merely when I finish speaking.

My learning and personal connection

I want to use technology to help people. With ShareMeal, clear communication is necessary so donors and volunteers understand the proposed process without assuming that the platform has already been launched.

Example I can relate to

A donor, an NGO and a volunteer may interpret the same pickup message differently unless its details are precise.

Practice activity for this week

Explain the ShareMeal donation idea aloud in one minute, then check whether a listener understands the intended steps.

Learning note based on the provided lecture topics; this is not a claim of verified NPTEL course completion.

Week 2 - Lecture 2

Introduction 2: Further Highlights of Developing Soft Skills

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

The second introduction connects self-awareness with personal development. Looking at how I respond to pressure, mistakes, disagreements and unfamiliar work reveals strengths and areas for growth. Managing my phone use, improving reading habits, presenting information carefully and maintaining trustworthy relationships are examples of everyday soft-skill practice.

Understanding and interpretation

Preparation should be purposeful: identify the audience, organise the important points, use simple supporting evidence and invite questions. Ethical conduct matters because trust is difficult to rebuild after a careless promise or misleading explanation.

My learning and personal connection

The same idea can sound different to a hostel manager, a volunteer or a student. I should adjust examples to the listener while keeping the project facts consistent.

Example I can relate to

Using simple words to explain how food is listed and collected can help a classmate understand the proposed ShareMeal system.

Practice activity for this week

Prepare a short explanation of ShareMeal for two audiences: a potential donor and a student volunteer.

Learning note based on the provided lecture topics; this is not a claim of verified NPTEL course completion.

Week 3 - Lecture 3

Mindset 1: Definition and Types

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

A mindset is a collection of beliefs and assumptions that influences how people interpret situations. An optimistic belief may encourage effort, while a restrictive belief may make challenges appear impossible before they have been attempted. A mindset can influence confidence, choices, concentration and reactions to advice.

Understanding and interpretation

Fixed and growth mindsets offer a useful comparison. A fixed reaction treats an initial mistake as proof of permanent inability. A growth-oriented reaction asks what method, preparation or support could lead to a better result. This is not blind positivity: the task may still be difficult.

My learning and personal connection

I am learning C and planning to study JavaScript. Not yet knowing full-stack development does not mean I cannot make progress; I can begin with a small page and test it carefully.

Example I can relate to

Not knowing a web framework yet is a starting point for structured study, not proof that the idea must be abandoned.

Practice activity for this week

Identify a challenging JavaScript concept and write a practical three-step plan for learning it.

Learning note based on the provided lecture topics; this is not a claim of verified NPTEL course completion.

Week 4 - Lecture 4

Mindset 2: Learning Mindsets

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

Learning is more effective when difficult work is approached as something that can be improved through strategy, feedback and revision. A fixed outlook might avoid hard assignments to protect confidence; a learning-focused outlook attempts a manageable step, examines the outcome and tries an improved method.

Understanding and interpretation

Feedback should be specific and actionable. Instead of saying that I am simply bad at something, I can identify a weak concept, compare my answer with a worked example and revisit it. Small improvements provide stronger evidence than vague motivation alone.

My learning and personal connection

I can use constructive comments about ShareMeal to improve details such as pickup confirmation, safety messages and user steps.

Example I can relate to

A peer who finds a confusing ShareMeal screen provides information that can improve the proposed workflow.

Practice activity for this week

Ask a peer to review a sample donor-listing screen and record one change based on feedback.

Learning note based on the provided lecture topics; this is not a claim of verified NPTEL course completion.

Week 5 - Lecture 5

Mindset 3: Secrets of Developing Growth Mindsets

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

A growth mindset develops through repeated and intentional behaviour: setting attainable goals, welcoming correction, learning from peers and measuring progress across attempts. Changing a negative sentence into a hopeful one is useful, but practical action must follow that change of attitude.

Understanding and interpretation

Useful growth goals include a clear outcome, a practice schedule and a way to review mistakes. Progress is rarely perfectly linear. A difficult week can reveal which habit or learning method needs adjustment, rather than indicating that the entire goal is unrealistic.

My learning and personal connection

My software and UPSC goals both demand continued learning. Rather than attempt everything at once, I can set achievable goals and review whether my practice is effective.

Example I can relate to

Weekly C practice and small design exercises can support the long-term full-stack goal without claiming completed development.

Practice activity for this week

Practise a programming exercise on three separate days and compare mistakes and corrections.

Learning note based on the provided lecture topics; this is not a claim of verified NPTEL course completion.

Week 6 - Lecture 6

Managing Time 1: Importance and Perceptions of Time

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

Time is a limited resource, and people differ in how they value urgent tasks, long-term goals, leisure and responsibilities. The first time-management lecture encourages awareness of how time is actually spent. Without an honest account of distractions and task duration, even a neat timetable can become impractical.

Understanding and interpretation

An effective schedule should include focused study, important non-academic duties, breaks and some flexibility. Keeping a short time-use record for a day can reveal avoidable delays, late starts or unrealistic expectations about how much work fits into one session.

My learning and personal connection

A timetable should protect programming practice, college coursework and reading without treating every moment of rest as wasted time.

Example I can relate to

I need regular time for course study and reading, as well as programming; recording time use makes that balance more realistic.

Practice activity for this week

Log one day of study, reading and personal activities; identify two adjustments that protect important work.

Learning note based on the provided lecture topics; this is not a claim of verified NPTEL course completion.

Week 7 - Lecture 7

Managing Time 2: Using Time Efficiently

Course: Enhancing Soft Skills and Personality | IIT Kanpur | Prof. T. Ravichandran

Core idea

Good time management is not the same as remaining busy. It involves identifying important outcomes, estimating effort, prioritising work, reducing interruptions and checking completion. Working on too many tasks at once can lead to mistakes and unfinished activities.

Understanding and interpretation

A practical daily plan lists two or three priorities, places demanding work in a suitable time block and leaves room for unexpected tasks. At the end of the day, comparing actual progress with the plan gives evidence for improving the next schedule.

My learning and personal connection

In a ShareMeal prototype, reliability matters more than extra features. I should finish a simple donor listing flow and test it before developing a larger system.

Example I can relate to

Finishing a donor-registration prototype is a clearer priority than trying to build every planned feature simultaneously.

Practice activity for this week

Choose the three most useful proposed ShareMeal features, prioritise them and defer optional additions.

Learning note based on the provided lecture topics; this is not a claim of verified NPTEL course completion.

VOCABULARY WORK SHEET

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 1, 2, and 3.

1. To find out what someone's job is, you usually ask, ·What do you do?·
2. A manager who oversees a team and ensures targets are met is often said to be in charge of the department.
3. Employees who work outside standard office hours in rotation (e.g., one week morning, next week evening) are working in shifts.
4. Outside specialists hired by companies to persuade top executives to leave their current firms are known as headhunters.
5. Job applicants typically submit a CV (curriculum vitae) detailing the story of their working life alongside a covering letter.

Part B: Matching Terms to Definitions

Match each business term on the left with its correct description on the right.

1. B_____ Flexitime
2. C_____ Teleworking
3. E_____ Psychometric test
4. D_____ Shortlist
5. A_____ Referees

- **A.** Previous employers or teachers named to provide character or performance references.
- **B.** A system allowing employees to choose working hours within agreed limits.
- **C.** Working from home using a computer and telecommunications.
- **D.** A selected pool of qualified candidates chosen for final interviews.
- **E.** A written test used to assess a candidate's intelligence and personality.

Part C: Sentence Correction

Identify and correct the errors in the following sentences.

1. *Error:* "I am in charge for the design department." → *Correction:* I am in charge of the design department.

2. *Error:* "He is going to the work by train every morning." → *Correction:*
   He goes to work by train every morning.
3. *Error:* "She is a very responsible in her daily tasks." → *Correction:*
   She is very responsible in her daily tasks.

Part A: Fill in the Blanks

Complete the sentences using the correct terms from Units 4 and 5.

1. Someone who has just left university with a degree is referred to as a graduate.
2. A worker who requires virtually no specialized training or formal qualifications is classified as unskilled.
3. Salespeople often receive a basic salary plus commission, which is a percentage on everything they sell.
4. Senior executives may receive share (stock) options, giving them the right to buy company shares at low prices.
5. High-ranking corporate executives with excessive compensation packages are sometimes referred to informally as fat cats.

Part B: Matching Collocations

Match the adjectives/phrases on the left with their correct prepositional complements.

1. E_____ Skilled _____
2. D_____ Good _____
3. A_____ Computer _____
4. B_____ Self _____
5. C_____ Fringe _____

- **A.** literate
- **B.** starter / motivated
- **C.** benefits
- **D.** at / in
- **E.** with

Part C: Application & Context Analysis

Explain the difference between the following pairs in 1-2 sentences:

1. **Salary vs. Wages:**
   A salary is normally a fixed regular payment, often monthly; wages are usually calculated by hours or days worked.
   _____
2. **Severance package vs. Bonus:**
   A severance package is compensation given when employment ends; a bonus is extra pay for performance or results.
   _____

Part A: Fill in the Blanks

Complete the sentences using terms from Units 6, 7, and 8.

1. Manual workers who use their hands and wear blue collars are often contrasted with white-collar workers in offices.
2. When workers stop working temporarily to protest pay or conditions, they go on strike.
3. A company that reduces its management layers and makes itself leaner is said to have delayered.
4. When an employee is dismissed through no fault of their own because their job no longer exists, they are made redundant.
5. An invisible barrier that prevents women from rising beyond a certain corporate level is called the _ glass __ ceiling.

Part B: Matching Health & Safety / Legal Terms

Match each workplace issue with its accurate classification.

1. B_____ Repetitive Strain Injury (RSI)
2. D_____ Passive smoking
3. A_____ Sexual harassment
4. C_____ Equal opportunities
5. E_____ Whistleblowing

- **A.** Unwelcome sexual behavior in the workplace
- **B.** Physical injury caused by continuous data entry or typing
- **C.** British term equivalent to US affirmative action
- **D.** Breathing in other people's tobacco smoke involuntarily
- **E.** Reporting illegal or unethical practices within an organization

Part C: Short Answer Exercises

1. What is the difference between being **dismissed** and being **made redundant**?
   Dismissal means an employer ends someone's employment, often because of conduct or performance. Redundancy happens when the job itself is no longer needed.
   _____
2. What is an **open-plan office**?
   An open-plan office is a shared workspace with few or no dividing walls between desks.
   _____

Part A: Fill in the Blanks

Complete the sentences using terms from Units 9, 10, and 11.

1. Directors who are outsiders and do not participate in the day-to-day running of the company are non-executive directors.
2. In the US, the top manager is often the CEO, while chief operating officers (COOs) take care of the day-to-day running.

3. Someone who founds or establishes their own company and takes financial risks is an entrepreneur.
4. Powerful leaders who control massive business empires are often called magnates, moguls, or tycoons.
5. Businesses that are sold off by the state to private investors are privatized.

Part B: Matching Corporate Terms

Match the terms on the left with their definitions.

1. A_____ SME
2. D_____ Corporate culture
3. E_____ Enterprise zone
4. B_____ Head up
5. C_____ Boardroom

- **A.** Small and Medium-sized Enterprise
- **B.** To head or lead a department or activity
- **C.** The room where directors meet
- **D.** The shared beliefs and working style of a company
- **E.** A designated region with fewer laws and lower taxes to encourage business

Part C: Error Correction

Correct the italicized phrases:

1. "He is the head up of our marketing department." →
   He heads up our marketing department.
2. "We need to buy a commerce for our new online shop." →
   We need to set up an e-commerce business for our new online shop.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 12, 13, and 14.

1. A self-employed person working alone, especially a builder or plumber, is a sole trader.
2. A company whose shares can be freely bought and sold on the stock market is a Public Limited Company or PLC.
3. Organizations with social aims like helping the sick or poor are non-profit organizations or charities.
4. Software developers often release a final test version, called a beta version, before official launch.
5. If a design defect is discovered after a product launch, a company may have to recall it.

Part B: Sector Classification

*Classify each industry as either **Manufacturing (M)** or **Services (S)**.*

1.· 1·M Aerospace
2.· 2·S Catering
3.· 3·M Pharmaceuticals
4.· 4·S Property / Real Estate
5.· 5·M Steel production

Part C: Short Definitions

1. Define **CADCAM**:
   CADCAM means Computer-Aided Design and Computer-Aided Manufacturing; computers help design and produce goods.
   _____
2. Define **Focus group**:
   A focus group is a small group of people asked to discuss a product, idea, or advertisement to provide feedback.
   _____

Part A: Fill in the Blanks

Complete the sentences using terms from Units 15, 16, and 17.

1.· Products that are no longer up-to-date because they use old technology are obsolete.
2. Legal protection for an invention that stops others from copying its design is a patent.
3.· The maximum amount that a plant or company can produce is its capacity.
4. Materials, components, labor, and capital used in production are collectively known as inputs.
5. Manufacturing goods efficiently without waste by having components arrive exactly when needed is just-in-time (JIT) production.

Part B: Matching Terms

1. B_____ R&D
2. A_____ Royalties
3. C_____ Craft industry
4. E_____ Work-in-progress
5. D_____ Outsourcing

- **A.** Payments made to an author or inventor for using their protected work
- **B.** Research and Development department
- **C.** Manual, labor-intensive production of items like furniture
- **D.** Using outside suppliers for services previously done in-house
- **E.** Goods that are currently being made on the production line

Part C: Short Explanations

1. Why do companies implement **Just-in-Time (JIT)** manufacturing?
   Companies use JIT to reduce inventory and storage costs, minimize waste, and receive materials only when they are needed.

_____

Part A: Fill in the Blanks

Complete the sentences using terms from Units 18, 19, and 20.

1. The objective of quality control is conformance to specifications with zero defects.
2. Comparing your performance against the best operators in the industry is called benchmarking.
3. People who buy everyday services like train travel are customers, while those who buy professional services are clients.
4. A company that sells more than any other competitor in a market is the market leader.
5. When competition is extremely strong and aggressive, it is often described as cut-throat or fierce.

Part B: Matching Terms

1. B_____ Kaizen
2. C_____ Mystery shopper
3. E_____ Market segment
4. D_____ Key players
5. A_____ BPR

- **A.** Business Process Re-engineering
- **B.** Japanese term for continuous improvement
- **C.** Person pretending to be a customer to check service quality
- **D.** The most important companies in a particular market
- **E.** A distinct group of buyers targeted within a market

Part C: Analysis Task

1. What is the difference between a **market leader** and a **challenger**?
   A market leader has the largest market share; a challenger is a competitor trying to increase its share and overtake the leader.

_____

Part A: Fill in the Blanks

Vocabulary in My Own Words

These examples use vocabulary from the 22 common worksheets. They are written to match this student's interests and do not represent completed projects or work experience.

01. Workplace roles

An NGO coordinator might be responsible for confirming that a surplus-food collection has been assigned.

02. Recruitment and skills

A software internship application should describe my C programming knowledge accurately rather than overstate my experience.

03. Working schedules

A volunteer collection system needs clear pickup windows because donated food cannot be kept indefinitely.

04. Team management

The ShareMeal idea would require donors, receivers and volunteers to understand their separate responsibilities.

05. Company structures

A nonprofit organisation and a private company can serve communities in different ways while using professional planning.

06. Industry categories

Restaurants provide services, while food-packaging factories belong primarily to manufacturing.

07. Operations and quality

A safe-food checklist is more important than simply collecting a high number of donation requests.

08. Service improvement

Feedback from donors and NGOs could help identify delays in a ShareMeal pilot.

09. Marketing and communication

A poster explaining how surplus-food pickup works might encourage hostels to participate.

10. Retail practices

Understanding distribution and inventory helps explain why unused food must reach recipients promptly.

11. Professional meetings

A project-group meeting could begin with an agenda covering safety, collection timing and user verification.

Vocabulary in My Own Words

These examples use vocabulary from the 22 common worksheets. They are written to match this student's interests and do not represent completed projects or work experience.

12. Presentations

In a ShareMeal pitch, I should communicate the hunger problem and the proposed donation workflow in a logical order.

13. Legal responsibility

A project that shares personal contact details needs clear consent and sensible rules for information use.

14. Finance vocabulary

Budgeting for hosting, messages and mapping would help assess whether a small pilot is realistic.

15. Economic awareness

Food costs and local economic conditions can influence community needs and donation patterns.

16. Information safeguards

Receiver details should be shown only to verified participants when a donation has been accepted.

17. Planning and deadlines

For ShareMeal, I can divide development into learning JavaScript, designing pages and testing the donation flow.

18. Leadership

Listening to NGO feedback before changing the design is a practical example of empathetic leadership.

19. Workplace communication

A pickup confirmation should state the place, quantity and time in language that leaves no ambiguity.

20. Introductions and roles

During a classroom demonstration, I should introduce who acts as a donor and who acts as a receiver.

21. Meeting documentation

Action notes can record who will check the food-safety rules before the next design review.

22. Negotiation

If volunteers disagree on collection timings, discussing constraints could lead to a workable schedule for everyone.

Professional and workplace vocabulary

I learned useful terms for jobs, recruitment, working arrangements and workplace responsibilities. This helps me understand formal communication in an office.

Word meanings and matching

Matching words with definitions helped me recognise the meaning of unfamiliar terms and choose vocabulary that fits the context.

Grammar and sentence correction

Correcting sentences helped me pay attention to prepositions, verb forms and clear sentence structure. I can use these skills in writing and speaking.

Business and employment concepts

The exercises introduced ideas such as salaries, wages, employee benefits and workplace policies, helping me understand professional situations.

Applying words in context

Fill-in-the-blanks and short-answer activities encouraged me to think about the meaning of each sentence instead of memorising answers.

My next steps

I will revise unfamiliar words, practise using them in original sentences and apply them in interviews, presentations, emails and everyday conversations.

Overall reflection: Better vocabulary, clearer English and greater professional confidence.
