ENCO9 | CAREER PACK | 2026

GOKUL.B

First-Year CSE Student | Aspiring Cybersecurity Enthusiast

PersonalCareer Profile and Four-YearPlan | Professional English I (Lab Integrated)
B.E. Computer Science and Engineering, 2026 - 2030 | St Joseph College of Engineering, OMR, Chennai

Student	GOKUL.B
College	St Joseph College of Engineering, OMR, Chennai
Department	Computer Science and Engineering (CSE)
Batch / year	2026-2030/First Year (2026-2027)
Target role	Cyberscurity Analyst
Career hero	Kevin Mitnick

01 About Me

I am a First-Year Computer Science Engineering (CSE) student with a strong interest in Cybersecurity, programming, and problem-solving. I am passionate about understanding how computer systems work and learning how to protect applications, networks, and data from security threats.

My current academic focus is on developing a strong foundation in Python programming, computer fundamentals, logical thinking, and problem-solving to prepare for advanced learning in cybersecurity

Long-term goal	Cyberscurity Analyst
Reason for choice	solving security problem
Email	gokul.balaji1512@gmail.com

02 CAREER GOAL

Acompany manager plans work, organises people and resources, makes decisions and tracks results so that a business reaches its goals. Every industry needs managers, which is why I picked this path for its job security. As I grow I hope to add deeper reasons, such as building strong teams and solving real business problems.

Technical credibility	Problem-solving	Skills to build
A CSE degree helps me understand how software is built and judge what timelines are realistic.	Coding trains me to split big problems into small steps, which is the heart of project management.	Time management, communication, leadership and teamwork, through the English lab, clubs and hackathons.

03 Skills and Technology

Programming languages	C, Python (both currently being learned)
Tools / software	Visual Studio, canva, ChatGPT
Topics to ask me about	C coding: program structure, data types, input/output, conditions, loops, functions, arrays, strings and introductory pointers

C gives me solid fundamentals in memory, loops and functions, and Python lets me turn ideas into working programs fast. I use ChatGPT as a learning aid to clear up doubts.

04 Projects

Project	Technology/Tools	Description
password strength checker	Python	Checks password strength and gives suggestion to improve password security

My proposed engineering-student career and placement platform is detailed in Section 11. I plan to build mini-projects and publish them on GitHub with clear documentation.

05 Online Profiles,Achievement and activities

GitHub	github.com/gokul-007-xyz
LinkedIn	www.linkedin.com/in/gokul-b-7b3839440/?isSelfProfile=true
Email	gokul.balaji1512@gmail.com

Activities and development goals

- Aim for recognition through a hackathon.
- Consider an introductory C or Python course and a business English course.
- Attend a workshop and a hackathon this year.
- Join a college club and volunteer at an event.

06 Personal Profile and SWOC

Strengths
Quick learner; learning coding; hard-working and responsible.

Weaknesses
Often has many doubts while learning.

Opportunities
Hackathons and college clubs.

Challenges
Managing several tasks and deadlines; competition from other businesses and professionals.

Improvement routine for coding practice

- Code for 30 to 45 minuteseveryday.
- Write each doubt in a notebook.
- Try to solve it first, then ask a teacher, senior or classmate.
- Review the solved doubts every weekend.

07 English Proficiency

CEFR results from two online assessments

CEFR LEVEL
B1

Preply Online English Test

Vocabulary-basedlevelassessment
Level: Intermediate
Words known: 1,000 at this level
To next level (A2): 2,000 more words
Meaning: can understand and use basic expressions and phrases.

Researchprojectspeakingassessment.Levelawarded for each read-aloud part:

Part 1	Part 2	Part 3	Part 4
B1	B1	B1	B1

Where I stand on the CEFR scale

A1 | Preply	A2	B1	B2	C1	C2
	Basic	Intermediate	Upper-int.	Advanced	Proficient

Assessment	Result	Next target
Preply online English test	B1(intermediate)	C1(Advanced)
Speak & Improve, read aloud	Parts 1-4: B1, B1, B1, B1	Keep practising reading and speaking

Sources: Preply online English test and the Speak & Improve research project.

08 Lecture Summaries: NPTEL Soft Skills Course

Course	Enhancing Soft Skills and Personality (NPTEL, IIT Kanpur)
Instructor	Prof. T. Ravichandran
Format	8 weeks, about 40 lectures of roughly 30 minutes each
Covered here	Lectures 1 to 3

Soft skills matter for my goal of becoming a manager, because managers work mainly with people.

Lecture 01: Introduction-1, highlights of the Developing Soft Skills course (Lectures 1-24)

Prof.Ravichandran of IIT Kanpur welcomeslearners to Enhancing Soft Skills andPersonality, an eight-week NPTEL course of about 40 lectures of 30 minutes each. Because it follows his earlier course, Developing Soft Skills and Personality, this lecture previews that course's first 24 lectures so that new learners are not at a disadvantage. He stresses experiential learning: learning should change behaviour, so students must be ready for change and should take notes. Soft skills are people skills, and beginning with the end in mind, an idea from Stephen Covey, keeps effort focused. Perceptions differ, like the blind men and the elephant, so we should first understand and then be understood. Self-management skills include self-awareness, confidence, emotional balance, stress handling and spiritual intelligence, along with excellence, Maslow's self-actualisation and McClelland's need for achievement. The preview then covers conflict resolution through win-win solutions by negotiation, mediation or arbitration, and stress, where good stress differs from distress. Habits are explained through the habit cycle, dopamine and the Zeigarnik effect, with the advice to replace bad habits with good ones. It ends with active listening and its barriers, and telephone skills such as clear speech, patience and handling difficult callers.

Lecture 02: Introduction-2, highlights of the Developing Soft Skills course (Lectures 25-48)

The second introduction previews the remaining24 lectures of the earlier course. It begins with technology and communication, asking whether people are becoming cyborgs and urging us to ask who controls technology, who benefits and whether we truly have a choice. Mobile phones were meant to save time but can cause addiction, so the phone should be treated as a servant, with good etiquette such as avoiding it during face-to-face talk. The email lectures give principles of planning, preparedness, persuasiveness and perseverance, and teach netiquette: a formal salutation, no capital-letter shouting, no slang, correct spelling, and treating the receiver as a human being.

The course then covers effective communication, its process and components, and barriers arising from personality, perception, emotion, language, culture and technology. Nonverbal communication follows, with its functions, types such as eye contact, touch, space and time, tips to read cues using context, cluster and change, and body language for interviews and group discussions. Presentation skills cover overcoming fear, structuring a speech, using visuals and body language. The final lectures cover reading techniques such as skimming and scanning, and human relations, trust and integrity, with the golden rule of treating others as you want to be treated. He closes by saying the new course is more advanced, focusing on interpersonal and management skills.

Lecture 03: Mindset 1, definition and types

This lecture introduces mindset, the firstconcept of thecourse itself. Prof. Ravichandran opens with examples where the same situation produces different reactions: two shoe-company representatives on an island where nobody wears shoes, one seeing no chance and the other a splendid opportunity, and a rose garden seen as beautiful roses or as frightening stones. He defines mindset as a person's attitude, outlook, habit of thinking and way of interpreting the world, shaped by earlier experience and peer group.

Types include defensive versus offensive, environmentalist, technological, positive and negative, abundance versus scarcity, public versus private, and press mindset. Everyone has a mindset, so the useful question is whether it gives favourable results; a harmful one leads to mental inertia, where thinking becomes fossilised and a person repeats the same failures. He then introduces Carol Dweck of Stanford and her book Mindset: The New Psychology of Success, which contrasts fixed and growth mindsets. He asks learners to check where they stand.

Fixed vs growth mindset

Fixed mindset	Growth mindset
Avoids challenges	Welcomes challenges
Resists change	Embraces change
Focuses on limits	Looks for opportunities
Rejects criticism	Values feedback
Stays in the comfort zone	Explores new things
Thinks effort is futile	Learns from failure
Believes nothing can be done	Believes everything is possible
Stops learning after college	Keeps learning for life

What I take from these lectures

Growth mindset	People skills	Habits
Treat my doubts and first-year challenges as chances to grow, not as limits.	Build listening, communication and conflict-handling skills, which every manager needs.	Finish what I start and replace bad habits with good ones, supporting my daily coding routine.

09 Four-Year Career Plan

Year	Focus	Key actions
Year 1 (2026-27)	Learn some hackathon concepts, improve in other subjects, learn other languages, build coding skills	Daily C and Python practice; GitHub mini-projects; attend a hackathon or workshop
Year 2 (2027-28)	Learn more programming languages such as Python and C	Data structures; larger team projects; join a club
Year 3 (2028-29)	Placement training and interview preparation	Aptitude and coding tests; resume; mock interviews
Year 4 (2029-30)	Job employment and internship	Internship; campus interviews; first job

A realistic route to company manager is to start as an engineer or executive, take on team-lead duties, then move into management.

10 Career Hero: Kevin mitnick

Kevin David Mitnick (1963–2023) was an American hacker who later became a famous cybersecurity consultant, author, and public speaker. He became particularly well known for social engineering—the use of psychological manipulation to persuade people to reveal information or perform actions.

- Early life and hacking
- He became interested in telephone systems and computers when he was young.
- During the 1980s and 1990s, he gained unauthorized access to various computer systems.
- His motivation was often described as curiosity, challenge, and the excitement of defeating security, rather than primarily financial profit.

11 Project Canvas and Pitch

Planned architecture, feasibility and a 90-second presentation

Technical approach	Use Lovable to build the first website and Python for suitable supporting features. Begin with a CSE roadmap and curated resource pages. Choose storage and hosting after the prototype requirements are clear.
Core modules	Career choices and quiz; year-wise roadmap; learning resources; project and profile guidance; aptitude, coding and interview preparation.
Target impact	Help students make informed career choices, follow an organised learning path and prepare a stronger placement profile.
First-version scope	One CSE roadmap, selected learning links and practical profile-building checklists. Add quiz and practice features in later versions.
Feasibility / pilot	Create the first version, ask a small group of classmates to try key tasks, record their feedback and improve the pages. No completed pilot or user results are reported.
Constraints	Keep information accurate, avoid broken links, use suitable learning resources and balance project work with studies.
Future roadmap	Add progress tracking, more engineering branches, personalised learning suggestions, mock-interview resources and internship information.
Success measures	Check whether students can find their next learning step, complete key website tasks and report that the guidance is clear. Set numerical targets after the first trial.

90-second pitch | 1. The problem - 30 seconds

"Engineering students often have many career questions but no clear starting point. Information about skills, projects and placement is spread across different websites. A first-year student may know the job they want, yet still be unsure about what to learn this semester and how to prepare for it."

2. The solution - 30 seconds

"My idea is a career and placement platform for engineering students. It will bring career guidance, year-wise skill roadmaps, learning resources and profile-building tips into one website. Students can explore roles, practise skills, develop projects and prepare for interviews through a clear sequence of steps."

3. Feasibility and next step - 30 seconds

"I plan to start with a small CSE-focused website using Lovable and Python. The first version will include a roadmap, selected learning resources and profile checklists. I will ask classmates to test it, collect their feedback and improve it before adding more branches, progress tracking and placement features."

11 Project Ideation

EngineeringStudentCareerand Placement Platform

Aproposed platform that supports engineering students from choosing a career to preparing for placement. The features below form the plan for the first version.

Project owner	Gokul.B
Course	EN25C09	Professional English I (Lab Integrated)
Project stage	Idea and first-version planning
Target users	Engineering students and engineers planning their next career step
My proposed role	Define the requirements, organise the learning content, build the first version and collect feedback.

The challenge

Career information, learning resources and placement preparation are spread across many websites. Students can struggle to decide what to learn first, organise their progress and connect college learning with the skills needed for a job.

Career uncertainty	Students need a clear view of fields, job roles and the skills each role requires.
Scattered learning	Roadmaps and useful resources need to be organised by year and learning stage.
Profile preparation	Students need practical guidance for projects, GitHub, LinkedIn, resumes and certifications.
Placement readiness	Aptitude practice, coding preparation, mock interviews and internship information need one clear starting point.

The proposed solution

A small, easy-to-use website brings career guidance, year-wise learning roadmaps, profile-building support and placement preparation together. The first version focuses on CSE students, then improves through classmates' feedback.

Student workflow

Explore a career → Choose a roadmap → Learn and practise → Build a profile → Prepare for placement.

A career quiz can help students explore options. Curated resources support learning. Project and profile checklists help students prepare evidence of their skills. Practice activities support interview preparation.

Access and content quality

Plan a browser-based, mobile-friendly website with simple navigation. Review resource links regularly, show when information was last checked and provide a way for students to report outdated content.

12 Education and Career Development

Program	B.E. Computer Science and Engineering
College	St Joseph College of Engineering, OMR, Chennai (as recorded in my original profile)
Batch / year	2026-2030 I First Year (2026-2027)
Student ID	26CS1236
Class / section	CSE C
Focus areas	Current: C and Python fundamentals. Planned: data structures, algorithms, logical reasoning and problem-solving.

Technical development and professional strengths

Current foundation: I am learning C and Python. I learn quickly, work hard and take responsibility seriously.
Development priorities: practise analytical thinking, write clear and well-documented code, test programs, and explore web technologies and additional languages as my fundamentals improve.

Professional habits to build: adapt to new tools, work respectfully in a team, communicate progress, meet agreed deadlines and focus on quality. These habits support both software work and my long-term management goal.

Career roadmap by stage

STARTED	Began the B.E. CSE degree and first-year learning.
IN PROGRESS	Build foundations in C and Python; practise coding and improve English.
NEXT GOAL	Complete practical projects, publish clear GitHub documentation and gain teamwork experience through clubs and events.
LONG TERM	Graduate, begin in an engineering or executive role, take on team-lead responsibilities and progress toward company management.

Future goals

In the near term, I want to strengthen my programming fundamentals, build a useful project portfolio and become more confident in English. Over time, I want to develop technical judgement, planning, leadership and teamwork so I can take on greater responsibility.

Personal statement

I want to earn responsibility through steady effort and useful work. I will ask questions, learn from mistakes and improve step by step. My aim is to combine a strong technical foundation with clear communication and dependable teamwork as I work toward becoming a company manager.

"The expert in anything was once a beginner."

13 Career SWOT Analysis

A planning view of the CSE-to-management pathway

Thiscareer-level analysis complements my personal SWOC in Section 06. It identifies areas to consider as I build technical experience and prepare for leadership.

Strengths | Internal foundation

- C and Python learning can build a useful base for technical problem-solving.
- Quick learning, hard work and responsibility support consistent development.
- A clear management goal gives direction to technical study and people-skill practice.
- Software projects can demonstrate useful work and provide opportunities to practise planning.

Weaknesses | Internal development needs

- As a first-year student, I still need deeper programming, data-structure and algorithm knowledge.
- Frequent doubts can slow my progress unless I record and resolve them systematically.
- I need to strengthen English communication and balance theory with practical work.

Opportunities | Areas to explore

- Use GitHub and open-source learning to build a public record of progress.
- Explore AI, cloud and web development as future learning directions.
- Use internships, hackathons, college clubs and team projects to gain experience.
- Explore different industries and working arrangements as my skills and interests develop.

Threats | External risks to plan for

- Competition for entry-level roles and changing hiring conditions can affect opportunities.
- AI-assisted coding and changing tools require continuous learning and sound judgement.
- Technical knowledge can become outdated without regular practice and upskilling.
- Work pressure can affect wellbeing; realistic planning and work-life balance matter.

My response

Follow a regular study routine, complete small projects, practise communication, seek feedback and review my career plan each semester. Build demonstrable skills before seeking greater responsibility.

14 Additional Soft-Skills Learning

Furtherpointsfromthecourseworkcoverageinthereference portfolio

Learning through behaviour and habits

Learning should lead to a lasting change in behaviour across physical, mental, emotional, social and spiritual development. In conflict, explain the underlying need and look for a win-win outcome. Stress can be understood as a mismatch between demands and available resources. The habit sequence links thought, action, reward, habit and character.

Communication in practice

The five Ps of email are **planning, preparedness, persuasiveness, presentability and perseverance**. Set aside phone-free time. Prepare presentations by knowing the topic, rehearsing, using three or four main points, choosing simple visuals and ending positively. Reading practice can combine skimming, scanning, grouping words and close reading.

Further study

Explore Carol Dweck's Mindset: The New Psychology of Success and the talk The Power of Believing You Can Improve. Apply the lesson by treating feedback and mistakes as opportunities to improve. These are suggested next resources, not completed study.

"Circumstances do not make a person, they reveal him."

15 Additional Career Inspiration

The reference portfolio includes Addy Osmani as an additional example for CSE students. Its profile describes an early C++ browser project called XWebs, work on Chrome and developer tools at Google, and contributions to web performance, developer experience, technical writing and AI-assisted development.
It also records a move to Anthropic in 2026 as a Member of Technical Staff working in the area of Claude Code. This is presented as information from the supplied reference portfolio; current employment details have not been independently checked.

Lessons I can apply

Start with small programs, understand the fundamentals, experiment with real projects, learn from mistakes and share useful knowledge. Tools change, so problem-solving and continuous learning remain valuable. Sundar Pichai remains my main career hero, as described in Section 10.

"Build,learn, experiment, and keep improving."

16 Let's Connect

Email	gokul.balaji1512@gmail.com

GitHub L	github.com/gokul-007-xyz

15 Summary of Interchange Exercises

I learnt to speak about earlier events with better clarity and confidence.
The activities helped me notice how verbs change when an action is already completed.
I practised describing where people were, what they did and how situations were different before.
Working with everyday examples made it easier to understand the meaning of sentences.
I also became more comfortable using common past expressions in normal conversation.

The lessons showed me how to talk about routines and habits from an earlier time in life.
I learnt to explain activities that happened regularly in the past but have now changed.
The childhood-pet conversation helped me connect grammar with familiar personal memories.
It also gave me practice in comparing my earlier routines with the way things are today.
I understood that the same idea can be expressed through statements, questions and negative forms.

By completing the activities, I paid more attention to sentence order and suitable verb forms.
I found it easier to answer questions about personal history without translating every sentence.
The exercises encouraged me to use complete sentences instead of giving only short answers.
They also improved my confidence in sharing memories and describing changes over time.
Overall, the interchange practice made past-time conversations easier, clearer and more natural for me.

Complete the sentences using terms from Units 9, 10, and 11.

1. Directors who are outsiders and do not participate in the day-to-day running of the company are non-executive directors.
2. In the US, the top manager is often the CEO, while managers take care of the day-to-day running.
3. Someone who founds or establishes their own company and takes financial risks is an entrepreneur.
4. Powerful leaders who control massive business empires are often called magnates, moguls, or tycoons.
5. Businesses that are sold off by the state to private investors are privatized.

Part B: Matching Corporate Terms

Match the terms on the left with their definitions.

1. ___A_____ SME
2. ___D_____ Corporate culture
3. ___E____ Enterprise zone
4. ___B_____ Head up
5. ___C_____ Boardroom

- **A.** Small and Medium-sized Enterprise
- **B.** To head or lead a department or activity
- **C.** The room where directors meet
- **D.** The shared beliefs and working style of a company
- **E.** A designated region with fewer laws and lower taxes to encourage business

Part C: Error Correction

Correct the italicized phrases:

1. "He is the head up of our marketing department." He **heads up** our marketing department
2. "We need to buy a commerce for our new online shop." We need to buy **e-commerce software.**

PartA:Fillinthe Blanks

Complete the sentences using terms from Units 12, 13, and 14.

1. A self-employed person working alone, especially a builder or plumber, is a one-man band.
2. A company whose shares can be freely bought and sold on the stock market is a Public Limited Company or PLC.
3. Organizations with social aims like helping the sick or poor are non-profit organizations or charities.
4. Software developers often release a final test version, called a beta version, before official launch.
5. If a design defect is discovered after a product launch, a company may have to recall it.

Part B: Sector Classification

*Classify each industry as either **Manufacturing (M)** or **Services (S)**.*

1. ____M____ Aerospace
2. ____S____ Catering
3. ____M____ Pharmaceuticals
4. ____S____ Property / Real Estate
5. ____M____ Steel production

PartC:ShortDefinitions

1. Define **CADCAM**: **CADCAM** means computer-aided design and computer-aided manufacturing
2. Define **Focusgroup**: **A focusgroup** is a small group of people asked for opinions about a product, service, or idea

PartA:Fillinthe Blanks

Complete the sentences using terms from Units 15, 16, and 17.

1. Products that are no longer up-to-date because they use old technology are obsolete.
2. Legal protection for an invention that stops others from copying its design is a patent.

Part B: Matching Collocations

Match the adjectives/phrases on the left with their correct prepositional complements.

1. E Skilled
2. D Good
3. A Computer
4. B Self
5. C Fringe

- **A.** literate
- **B.** starter / motivated
- **C.** benefits
- **D.** at / in
- **E.** with

Part C: Application & Context Analysis

Explain the difference between the following pairs in 1-2 sentences:

1. **Salary vs. Wages:** A salary is normally a fixed regular payment often monthly wages are usually calculated by hours or days worked.
2. **Severance package vs. Bonus:** A server package is compensation given when employment ends.
3. A bonus is extra payforperformance or result.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 6, 7, and 8.

1. Manual workers who use their hands and wear blue collars are often contrasted with white-collar workers in offices.
2. When workers stop working temporarily to protest pay or conditions, they go on strike.
3. A company that reduces its management layers and makes itself leaner is said to have downsized and delayered .
4. When an employee is dismissed through no fault of their own because their job no longer exists, they are made redundant.
5. An invisible barrier that prevents women from rising beyond a certain corporate level is called the glass ceiling.

Part B: Matching Health & Safety / Legal Terms

Match each workplace issue with its accurate classification. Repetitive Strain Injury (RSI)

Passive smoking Repetitive strain injury

1. B
2. D Passive smoking
3. A Sexual harrasement
4. C Equal oppurtunities
5. E Whistleblowing

- **A.** Unwelcome sexual behavior in the workplace
- **B.** Physical injury caused by continuous data entry or typing
- **C.** British term equivalent to US affirmative action
- **D.** Breathing in other people's tobacco smoke involuntarily
- **E.** Reporting illegal or unethical practices within an organization

Part C: Short Answer Exercises

1. What is the difference between being **dismissed** and being **made redundant**? Being **dismissed** means an employer terminates someone's employment,often for conduct or performance reasons.Being **made reduntant** means the job itself is no longer needed.
2. What is an **open-plan office**? An **open-plan office** is a workspace where many employees work in one shared area rather than seperate enclosed offices.

Part A: Fill in the Blanks

3. The maximum amount that a plant or company can produce is its capacity.
4. Materials, components, labor, and capital used in production are collectively known as resources.
5. Manufacturing goods efficiently without waste by having components arrive exactly when needed is just in timeproduction.

Part B: Matching Terms

1. ____B____ R&D
2. ____A____ Royalties
3. ____C____ Craft industry
4. ____E____ Work-in-progress
5. ____D____ Outsourcing

- **A.** Payments made to an author or inventor for using their protected work
- **B.** Research and Development department
- **C.** Manual, labor-intensive production of items like furniture
- **D.** Using outside suppliers for services previously done in-house
- **E.** Goods that are currently being made on the production line

PartC:ShortExplanations

1. Why do companies implement **Just-in-Time (JIT)** manufacturing? . Companies use Just-in-Time (JIT) to receive materials when needed, reduce storage and inventory costs, and minimize waste.

PartA:FillintheBlanks

Complete the sentences using terms from Units 18, 19, and 20.

1. The objective of quality control is conformance to specifications with zero defects.
2. Comparing your performance against the best operators in the industry is called benchmarking.
3. People who buy everyday services like train travel are customers, while those who buy professional services are clients.
4. A company that sells more than any other competitor in a market is the market leader.
5. When competition is extremely strong and aggressive, it is often described as cut-throat or fierce.

Part B: Matching Terms

1. ____B____ Kaizen
2. ____C____ Mystery shopper
3. ____E____ Market segment
4. ____D____ Key players
5. ____A____ BPR

- **A.** Business Process Re-engineering
- **B.** Japanese term for continuous improvement
- **C.** Person pretending to be a customer to check service quality
- **D.** The most important companies in a particular market
- **E.** A distinct group of buyers targeted within a market

Part C: Analysis Task

1. What is the difference between a **market leader** and a **challenger**? . A market leader has the largest market share or strongest position. A challenger tries to gain share and compete with the leader.

PartA:FillintheBlanks

1. The four Ps of marketing are product, price, place , and promotion.
2. Consumer goods that last a long time, such as cars and washing machines, are consumer durables .
3. Products that do not have a brand name are known as generic products or generics.
4. Cheap items sold at or below cost to attract customers into a store are loss leaders.
5. A small group of buyers with specialized needs forms a niche market.

Part B: Matching Terms

1. ____A____ FMCG
2. ____B____ Own-brand

3. ____D____ Upmarket
4. ____C____ Trade up
5. ____E____ Price war

- **A.** Fast-Moving Consumer Goods (fast-selling items like food)
- **B.** Products sold under the retailer's own name
- **C.** Moving from basic models to more sophisticated, expensive ones
- **D.** Designed for higher-income users; upscale
- **E.** When competing companies continually reduce prices in response to each other

PartC:ShortAnswer

1. Name the **Four Ps** of the marketing mix: Product, Price, Place, Promotion.

PartA:Fillinthe Blanks

Complete the sentences using terms from Units 24, 25, and 26.

1. Wholesalers and retailers are collectively known as distribution .
2. A retail store that is part of a group of shops all sharing the same name is a chain store.
3. Unsolicited direct mail sent to consumers' homes is often dismissively called junk mail.
4. A series of advertisements for a particular product or company is an advertising campaign.
5. Businesses combining traditional physical shops with online e-commerce operations practice bricks -and-mortar retail.

Part B: Matching Terms

1. ____C____ Cold call
2. ____E____ Franchise
3. ____A____ Billboard (AmE)
4. ____D____ Loyalty card
5. ____B____ B2B

- **A.** Open-air hoarding used for advertising
- **B.** Business-to-Business e-procurement
- **C.** Unannounced sales phone call to someone with no prior contact
- **D.** Card offering reward points based on customer spending
- **E.** Business format run by a franchisee under a franchisor's brand

PartA:Fillinthe Blanks

1. Money received from sales is known as revenue or turnover .
2. Costs that do not change when production goes up or down (e.g., rent) are fixed costs.
3. Products that have very good profitability and generate large cash surpluses are cash cows .
4. Customers who owe money to a business are recorded as accounts receivable.
5. Independent outside accountants who examine a company's accounts to see if they give a true and fair view are auditors.

Part B: Matching Financial Terms

1. ___A_____ COGS
2. ___C_____ Goodwill
3. ___B_____ Depreciation
4. ___E_____ In the red
5. ___D_____ Window dressing

- **A.** Cost of Goods Sold (variable manufacturing costs)
- **B.** Reduction in the book value of fixed assets over time
- **C.** An intangible asset representing a company's good reputation
- **D.** Creative accounting making results look better than they are
- **E.** Operating at a financial loss or having a negative bank balance

Part A: Fill in the Blanks

5. When concluding a presentation, speakers typically open the floor to deal with questions from the audience .

Part B: Matching Presentation Stages

1. ____C____ Visual aids

2. ____B____ Body language

3. ____D____ Rapport

4. ____E____ Q&A session

5. ____A____ Handouts

- **A.** Printed materials distributed to listeners to supplement a presentation
- **B.** Postures, gestures, and facial expressions used while speaking
- **C.** Charts, slides, and diagrams used to illustrate key points visually
- **D.** A harmonious, trusting relationship between speaker and listeners
- **E.** The time at the end of a presentation dedicated to answering inquiries

Part C: Error Correction

Correct the italicized phrases:

1. "During my presentation, I will show you some visual supports." During my presentation, I will show you some visual aids

2. "Let's open the floor for some inquiries from the spectators." Let's open the floor for some questions from the audience.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 62 through 66.

1. A negotiation style where both sides aim for an outcome that benefits everyone involved is known as a win-win situation.

2. Offering something you value less in exchange for something the other party values less during talks is making trade -offs.

3. When negotiations completely stall and neither side is willing to move or compromise, they have reached a deadlock.

4. An agreement between two or more parties that is enforceable by law after a successful negotiation is a contract.

5. A neutral third party brought in to help resolve a deadlock and mediate an agreement is a mediator.

Part B: Matching Negotiation Tactics

1. ___A_____ Probing

2. ___D_____ Counter-proposal

3. ___B_____ Deadlock

1. The person who is in charge of running a meeting and keeping participants on track is the chairperson or chair, often referred to simply as the chair.

2. A list of items to be discussed during a meeting, sent out in advance, is called the agenda .

3. When negotiators or meeting participants reach a middle-ground solution where both sides make concessions, they reach a compromise .

4. Using cautious language to avoid making overly direct or absolute statements is known in discussion techniques as hedging.

5. When a meeting discussion completely breaks down and no agreement can be reached, it is referred to as a deadlock.

Part B: Matching Meeting Terms

1. ____C____ AGM

2. ____E____ Minutes

3. ____A____ Consensus

4. ____B____ Action points

5. ____D____ Hedging

- **A.** General agreement reached by all participants
- **B.** Specific tasks assigned to individuals to complete after a meeting finishes
- **C.** Annual General Meeting held once a year for shareholders
- **D.** Avoiding direct or committal statements using qualifying language
- **E.** The written record of decisions and discussions made during a meeting

Part C: Short Answer Exercises

1. What is the main responsibility of a meeting chairperson before a meeting begins? . Before the meeting, the chairperson should prepare and review the agenda, clarify the purpose, and ensure participants and arrangements are ready

2. What is the difference between reaching a **consensus** and voting on a decision? Consensus means the group broadly agrees on a decision; voting selects an option by counting votes, even if some people disagree.

Part A: Fill in the Blanks

1. The visual items used during a presentation, such as slides, handouts, or overhead projections, are called visual aids.

2. Establishing a positive connection and good mutual relationship with your audience during a presentation is building rapport.

3. The opening part of a presentation where you welcome the audience and outline your structure is the introduction.

4. Moving around too much or making nervous hand gestures can distract from your body language during a speech.

4. ___E_____ Concession

5. ___C_____ Mediator

- **A.** Asking probing questions to discover the other party's underlying needs
- **B.** A stall in talks where neither side will compromise
- **C.** An independent third party assisting in dispute resolution
- **DT.** A responding offer made in reaction to an initial proposal
- **E.** Something given up voluntarily to reach an agreement

Part C: Short Answer Exercises

1. What is the difference between a **hard bargaining** style and a **win-win** style? Hard bargaining focuses on winning and protecting one side's position; win-win negotiation seeks an outcome that benefits both sides

2. Why is checking the final contract details essential after reaching an agreement? Checking the final contract ensures that terms, responsibilities, dates, and costs are accurate and that the written agreement reflects what was agreed.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 36 and 37.

1. When a company sells its shares to the public for the first time, it floats the company in a IPO.

2. Short-term lending to businesses is known as commercial credit .

3. Financial products derived from underlying assets, such as futures and options contracts, are known as derivatives.

4. An extended period of rising share prices and optimistic dealer sentiment is referred to as a bull market.

5. Shares in long-established, stable companies with a history of profit in both good and bad times are called blue chips.

Part B: Matching Financial Markets

1. ____B____ Forex

2. ____C____ Bourse

3. ____A____ NASDAQ

4. ____E____ FTSE

5. ____D____ Bear market

- **A.** New York stock market index focusing heavily on high-tech companies

1. "The country's economic indicators show a high rate of inflation speeds." The country's economic indicators show a high rate of inflation.

2. "When output reaches its lowest level, it hits a peak before rising." When output reaches its lowest level, it hits a trough before rising.

Part A: Fill in the Blanks

1. Buying or selling securities using confidential information that is not publicly available is illegal insider dealing.

2. A secret agreement among competing companies in the same market to fix prices at a certain level is price fixing .

3. A type of fraud where an employee illegally steals and gets money from their employer is known as embezzlement .

4. The process of hiding the illegal origin of criminal money, often by purchasing property, is money laundering.

5. Directing investment funds exclusively into companies that do not harm people or the environment is ethical investment.

Part B: Matching Crime & Ethics Terms

1. ____D____ Embezzlement

2. ____A____ Counterfeiting

3. ____B____ Bribery

4. ____E____ Code of ethics

5. ____C____ Sweatshop labor

- **A.** Making illegal fake copies of banknotes, documents, or luxury goods
- **B.** Offering or receiving illegal payments to persuade someone to act corruptly
- **C.** Manual labor performed under severely exploitative, underpaid conditions
- **D.** The illegal theft of funds by someone entrusted with managing them within a firm
- **E.** A formal corporate document outlining required moral standards of behavior

Part C: Short Answer Exercises

1. What is the purpose of establishing **Chinese walls** within financial institutions? Chinese walls separate sensitive information between departments to prevent conflicts of interest and inappropriate sharing of confidential information.

2. Why do institutional investors conduct annual **social performance audits**? . Social performance audits assess whether companies act responsibly toward workers, communities, and the environment.

Part A: Fill in the Blanks

- **B.** Foreign exchange market for buying and selling national currencies
- **C.** An alternative term for a stock market or stock exchange
- **D.** A market characterized by falling prices and pessimistic dealer sentiment
- **E.** London's Financial Times Stock Exchange index

Part C: Short Answer Exercises

1. What is the difference between a **futures contract** and an **options contract**? A futures contract obliges the parties to buy or sell under agreed terms at a future date; an options contract gives the buyer the right, but not the obligation, to do so.

2. Why are major financial centres like London and New York often referred to by nicknames like "The City" or "Wall Street"? The nicknames refer to the districts and streets where major financial institutions and markets are concentrated

Part A: Fill in the Blanks

1. The study of how money works, is used, and whether economic activities are profitable is called economics.

2. When a country exports more goods and services than it imports, it maintains a trade surplus.

3. The total monetary value of all goods and services produced within a particular country is its Gross Domestic Product (GDP).

4. A period of negative economic growth where economic output contracts is known as a recession.

5. When a bad recession becomes extremely severe, widespread, and prolonged, it is called a slump or depression.

Part B: Matching Economic Indicators

1. ____C____ Inflation rate
2. ____D____ Trade deficit
3. ____E____ Stagflation
4. ____B____ Trough
5. ____A____ Stagnation

- **A.** A period when the economy is growing very slowly or not at all
- **B.** The lowest point in an economic cycle before output starts rising again
- **C.** The speed at which general consumer price levels are rising
- **D.** When import payments exceed export earnings, creating a trade gap
- **E.** A difficult economic condition combining slow growth with rapid inflation

Part C: Error Correction

Correct the italicized phrases:

1. The overall period during which a project or task should be completed is referred to as the timescale or deadline.

2. When work is completed later than the planned completion date, it is behind schedule and there is a delay.
3. Work that is difficult in an interesting, rewarding, and enjoyable way is described as challenging.

4. An extreme state of physical and mental exhaustion caused by chronic work stress is known as burnout.
5. The metaphor used to describe the exhausting, highly competitive modern corporate work environment is the rat race .

Part B: Matching Time & Stress Terms

1. ___D_____ Downtime

2. ___E_____ Prioritize

3. ___C_____ Perfectionism

4. ___A_____ Downshifting

5. ___B_____ Stress-induced

- **A.** Choosing to leave behind a stressful career for a simpler, balanced lifestyle
- **B.** An unexpected illness or condition brought on by excessive pressure
- **C.** An unworkable aim for flawlessness when there is no need for it
- **D.** Periods when machinery or computers cannot operate because they are broken
- **E.** Arranging tasks in order of importance before working on them

Part C: Short Answer Exercises

1. What are the key dangers of striving for **perfectionism** when managing daily tasks? Perfectionism can waste time, increase stress, delay completion, and make it difficult to decide when work is good enough.

2. How do **downshifters** typically redefine their personal idea of success? . Downshifters often define success through wellbeing, time with family, meaningful activities, and a better work-life balance rather than status or income alone

Part A: Fill in the Blanks

1. People working below a manager in an organizational hierarchy are known as subordinates .

2. A leadership quality that is forward-thinking, with the power to see clearly how things will be in the future, is called being a visionary.

3. Management decisions that are arrived at by asking employees to contribute in a process of consultation are built on consultation.

4. Granting employees the initiative and authority to make decisions without asking managers first is called empowerment.

5. A corporate environment characterized by male dominance, aggressiveness, and physical strength is a macho culture.

4. ____C____ Pager

5. ____A____ Videoconferencing

- **A.** Holding a face-to-face meeting across locations using computers and cameras
- **B.** A family name shared across relatives
- **C.** A device that receives written messages while on the move
- **D.** Arriving at meetings or appointments on time
- **E.** A relaxed yet professional style of dress that avoids full suits

Part C: Short Answer Exercises

1. What is the standard convention regarding names in the English-speaking business world? First names are commonly used in English-speaking business settings, though formal titles and surnames may be appropriate initially or in formal contexts.

2. How do attitudes toward **time** and schedules vary across different business cultures?

Some cultures value strict punctuality and fixed schedules, while others take a more flexible approach and place greater emphasis on relationships.

Part A: Fill in the Blanks

1. A formal meeting open to all shareholders of a company held once a year is an Annual General Meeting or AGM.

2. Before a meeting begins, the chairperson prepares a list of items to be discussed, known as the agenda.

3. During a meeting, the person taking notes records the decisions and discussions to produce the official minutes.

4. When a chairperson wants to open a meeting or direct attention to the first item, they formally . opens / calls to order the meeting.

5. Inviting specific participants to speak during a discussion helps ensure everyone has an opportunity to share their views / opinions.

Part B: Matching Meeting Terms

1. ___C_____ Chairperson

2. ___E_____ Agenda

3. ___D_____ Minutes

4. ___B_____ Action points

5. ___A_____ Venue

- **A.** The official physical or virtual location where a meeting takes place
- **B.** Specific tasks assigned to individuals to execute after the meeting concludes
- **C.** The person responsible for running the meeting and keeping order

Part B: Matching Leadership & Cultural Terms

1. ___B_____ Authoritarian
2. ___E_____ Decentralized
3. ___D_____ Deference
4. ___C_____ Corporate culture
5. ___A_____ Canteen culture

- **A.** Unofficial, unapproved ways that people within an organization think and talk
- **B.** A management style that imposes decisions from above without consultation
- **C.** The shared values, habits, and working style of a specific company
- **D.** Respectful submission and yielding to the authority of superiors
- **E.** Organizational structures where decision-making authority is spread out

Part C: Error Correction

Correct the italicized phrases:

1. "The manager is very remote, so she is completely approachable by all staff." The manager is very approachable, so staff feel comfortable speaking to her. (Or: "The manager is very remote, so she is not approachable by all staff.")

2. ~~"We operate a top-down~~ consensus approach in our department." We operate a bottom-up consultative approach in our department.

Part A: Fill in the Blanks

Complete the sentences using terms from Units 46, 47, and 48.

1. In the English-speaking business world, people routinely use first names even when they do not know each other very well.

2. A company day where employees are allowed to wear less formal clothing than a standard business suit is called a casuals Friday.

3. Being at work when you do not actually need to be there, simply to demonstrate commitment, is known as a culture of presentation .

4. A phone extension that is not connected by a physical wire, allowing movement around a home or office, is a cordless phone.

5. ~~A pho~~ne number that provides free access for callers, such as an 0800 number, is a toll-free number.

Part B: Matching Etiquette Terms

1. ____B____ Surname
2. ____E____ Smart casual
3. ____D____ Punctuality

- **D.** The written record of what was discussed and decided
- **E.** The structured list of topics scheduled for discussion

Part C: Short Answer Exercises

1. What are the key responsibilities of a chairperson *during* a meeting?

The chairperson guides the discussion, keeps order and time, gives participants a chance to speak, clarifies decisions, and summarizes action points

2. Why is it important to distribute an agenda well in advance of a meeting?

An early agenda lets participants prepare, gather information, and understand the meeting's purpose and topics.

Part A: Fill in the Blanks

1. Using cautious language and qualifying phrases to avoid making overly direct or absolute statements is called hedging.

2. A negotiation approach where both parties work to find solutions that benefit everyone involved is a win-situation.

3. Asking detailed and probing questions during negotiations helps uncover the other party's underlying interests / needs.

4. When negotiators offer something they value less in exchange for a concession from the other side, they are making trade-offs.

5. When a negotiation stalls completely because neither side will compromise or move forward, they have reached a deadlock.

Part B: Matching Discussion & Negotiation Terms

1. ____D____ Hedging
2. ____C____ Consensus
3. ____E____ Probing
4. ____B____ Counter-proposal
5. ____A____ Mediator

- **A.** An independent third party brought in to help resolve a deadlock
- **B.** A responding offer made in reaction to an initial bargaining position
- **C.** General agreement reached collectively by all participants
- **D.** Using cautious, non-committal language to soften statements
- **E.** Asking exploratory questions to investigate underlying interests

Part C: Error Correction

Correct the italicized phrases:

Part A: Fill in the Blanks

Complete the sentences using terms from Units 62 and 63.

1. A negotiation where two parties try to reach an agreement over a contract or dispute is heavily influenced by the initial opening offer / opening position of negotiation.

2. Before entering formal talks, experienced negotiators spend significant time preparing their strategy, identifying their objectives and acceptable walk-away points.

3. The bargaining stage involves making concessions and counter-proposals to move the discussion closer to a mutually acceptable agreement.

4. Different negotiators exhibit different negotiating styles, ranging from cooperative and collaborative to highly confrontational and hard bargaining.

5. When preparing for a complex international deal, understanding cultural nuances is just as critical as analyzing the financial terms of the deal.

Part B: Matching Negotiation Terms

1. ____C____ Bargaining

2. ____D____ Concession

3. ____A____ Counter-proposal

4. ____E____ Negotiating style

5. ____B____ Deal

- **A.** A responding offer made in reaction to an initial bargaining position
- **B.** An agreement or contract reached after successful discussions
- **C.** The active discussion process of trading concessions to reach agreement
- **D.** Something given up voluntarily by one party to encourage agreement
- **E.** The characteristic approach or behavioral pattern adopted by a negotiator

Part C: Error Correction

Correct the italicized phrases:

1. "During the bargaining phase, we refused to make any concessions and immediately signed the contract."

During the bargaining phase, we made concessions and then signed the contract after reaching agreement

2. "His negotiating style was entirely cooperative, meaning he shouted down every proposal made by the other side."

His negotiating style was confrontational, meaning he shouted down every proposal made by the other side

1. "We reached a deadlock, so we made a win-win compromise that pleased nobody."

We reached a deadlock, so we could not reach a win-win compromise that pleased both sides

2. "During the meeting, he used too much hedging so his point was extremely direct and clear."

During the meeting, he used too little hedging, so his point was extremely direct and clear.

Part A: Fill in the Blanks

1. A brief presentation given to inform colleagues or clients about a specific project update or status report is often structured around different types of presentations, such as a product launch.

2. When preparing a presentation, speakers should practice to ensure proper timing, avoiding rushing through the material or exceeding the allocated . time limit / allotted time.

3. Maintaining eye contact, varying vocal tone, and projecting your voice properly are all vital elements of managing your delivery / voice during a speech.

4. Building positive engagement and mutual connection with your audience is essential for establishing good rapport early in your presentation.

5. Visual materials such as slides, handouts, and diagrams used to illustrate key concepts during a speech are called visual aids.

Part B: Matching Presentation Terms

1. ___D_____ Preparation

2. ___A_____ Rapport

3. ___B_____ Body language

4. ___C_____ Visual aids

5. ___E_____ Q&A session

- **A.** A harmonious, trusting relationship established between speaker and listeners
- **B.** Postures, gestures, and physical movements used while speaking
- **C.** Charts, slides, and diagrams used to clarify information visually
- **D.** The structured process of planning, drafting, and organizing your speech
- **E.** The concluding segment dedicated to answering listener inquiries

Part C: Short Answer Exercises

1. What are the key dos and don'ts when preparing the introduction of a presentation? Start with a clear welcome, introduce the topic and purpose, and give a brief outline. Avoid long, irrelevant openings, reading everything from slides, or making unsupported claims

2. How should a speaker handle difficult or hostile questions during the final question-and-answer period?

Stay calm and respectful, listen fully, clarify the question if needed, answer with facts, and admit honestly when you do not know. Do not argue or take the question personally.

OMR, CHENNAI - 119

EN25C09: Professional English- I (LAB INTEGRATED)

MODEL EXAM I –PRACTICE WORKSHEET

PART - A (15 X 1 = 15 Marks)

Answer ALL questions. Each question carries 1 mark.

1. Fill in the blank with the correct form of the verb given in bracket:

The automated system _____ (monitor) the temperature continuously to ensure safe operation.

Answer: monitors

2. Fill in the blank with the correct past form of the verb given in bracket:

The engineers _____ (record) the vibration readings during yesterday's trial.

Answer: recorded

3. Complete the sentence with the appropriate comparative form of the adjective in bracket:

The newly developed composite material is significantly _____ (strong) than the conventional material while maintaining a lower weight.

Answer: stronger

4. Fill in the blank with an appropriate modal auxiliary verb: (must/can/might)

Engineers _____ follow safety regulations while operating heavy machinery.

Answer: must

5. Fill in the blank with a suitable modal auxiliary verb expressing capability: (can, may, might)

Modern sensors _____ detect even minor changes in temperature.

Answer: can

3. ***Combine the technical statements into a single cohesive sentence using a defining or non-defining relative clause:***

   The engineer designed a new cooling system. It reduces the temperature of industrial machines.

   Answer:
   (Non-defining alternative: a new cooling system, which reduces the temperature of industrial machines.)

4. ***Complete the following conditional sentences logically:***

   (a) If the battery voltage drops below the required level,
   Answer :The device will shutdown automatically .

   (b) If the technician had checked the connections earlier,
   Answer The failure would not have occured.

5. ***Convert the following active sentences into the Impersonal Passive Voice suitable for formal engineering reports:***

   The laboratory assistant heated the solution to 80°C before testing.

   Answer:
   The solution was heated to 80 c before testing

6. ***Rewrite the following direct engineering query into Reported (Indirect) Speech:***

   The project manager asked the technician, "Have you inspected the pressure valves before starting the compressor?"

   Answer:
   The project manager asked the technician whether he had inspected the pressure valves before starting the computer

7. ***Identify and correct the grammatical errors involving mass/uncountable nouns in the following sentences:***

   (a) ***The engineer received many feedbacks on the new design.***
   Answer :The engineer received a lot of feedback (not 'feedbacks') on the new design

   (b) ***The students received several useful advices from their teacher.*** Answer : The students received several pieces of useful advice (not 'advices') from their teacher.

8. ***Rewrite the sentences using an Infinitive of Purpose or a Gerund construction:***

6. Combine the sentences into a single coherent sentence using a suitable relative pronoun:

(a) The laboratory developed a new testing device. (b) The device measures material strength with high precision.

Answer: the laboratory developed a new testing device that measures material strength with high precision

7. Complete the sentence using the correct form of the verb in bracket (First Conditional – If Clause):

If the temperature rises (rise) above the permissible limit, the cooling system will activate automatically.

8. Complete the sentence using the correct form of the verb in bracket (Third Conditional – Past Unreal Conditional):

If the technician had inspected the circuit earlier, the equipment _____(not / fail) during operation.

Answer: would not have failed

9. Combine the following sentence using an infinitive of purpose (to + verb):

The mechanics installed dual damper springs. They wanted to isolate chassis resonance.

Answer: the mechanics installed dual damper springs to isolate classic resonance

10. Fill in the blank with the gerund form of the verb in bracket after the preposition:

The research team reduced energy consumption by _____ (optimize) the motor control algorithm.

Answer: optimizing

11. Convert the following active voice into the Impersonal Passive Voice:

The lab assistant poured 50 mL of hydrochloric acid into the titration flask.

Answer: 50 ml of hydrolchloric acid was poured into the titration flask

12. Fill in the blank with the appropriate adverbial form derived from the adjective in bracket:

The robotic arm moves _____ (smooth) to ensure accurate positioning of the component.

Answer: smoothly

13. Rewrite the direct into indirect speech:

The project supervisor asked the engineer, "Did you calibrate the pressure sensor before testing?"

Answer: the project supervisor asked the engineer whether(if) he had calibrated the pressure sensors before testing

14. Identify the incorrect noun form and rewrite the sentence correctly:

The laboratory purchased several new equipments for conducting material testing.

Answer: incorrect noun: equipments .correct sentence :the laboratory purchased several new pieces of equipment for conducting material testing

15. Fill in the blank using the correct irregular comparative form (better, worse, farther/further, less, more):

Because the heat sink had poor thermal paste contact, heat dissipation was _____ (bad) than expected.

Answer: worse

PART - B(10X2=20Marks)

Answer all questions. Each question carries 2 marks.

1. ***Rewrite the following active operational and laboratory description in the Simple Past Tense:***

   The engineer calibrates the pressure sensor and verifies its accuracy.

   Answer:
   the engineer calibrated the pressure sensor and verified its accuracy

2. ***Draft two comparative sentences comparing a laptop and a desktop computer in terms of portability and screen size.***

   Answer **(Portability):a laptop is more portable than a desktop computer**

   Answer ***(Screen Size):*** A desktop computer usually has a large screen than a laptop

Q27.a.

Bharatanatyam: a traditional art form of Tamil Nadu Outline: Introduction (origin) - Body 1 (traditional practices) - Body 2 (preservation and promotion) Conclusion. Word count: 250 Bharatanatyam is the pride of Tamil Nadu and one of India's oldest classical dance forms. Its roots lie in the ancient Tamil epic Silappathikaram and in the temple sculptures of Thanjavur and Chidambaram, which depict poses described in the Natya Shastra. Originally called Sadir or Dasi Attam, it was performed by devadasis in temples as an offering to the deity. In the twentieth century, Rukmini Devi Arundale and E. Krishna Iyer revived it and restored its dignity on the public stage. Traditionally, the dance combines nritta (pure movement), nritya (expressive storytelling) and natya (drama). Dancers wear pleated silk costumes, temple jewellery and ghungroos, and use precise footwork, hand gestures called mudras and facial expressions to narrate mythological stories. The art is taught through the guru-shishya parampara, in which students train for years under a master. The training ends with the arangetram, the debut performance. Today, rapidly changing entertainment habits threaten this heritage, but modern initiatives can protect it. Schools and colleges can introduce dance classes and cultural clubs. Online platforms can stream performances and tutorials. Government scholarships and festivals such as the Margazhi season in Chennai can support young artists. Collaborations with film, fusion music and digital storytelling can attract youth without losing the tradition's core, while video archives can safeguard rare compositions. In conclusion, Bharatanatyam is more than entertainment; it is a living record of our history, spirituality and identity. By combining tradition with technology and encouraging young learners, we can ensure its anklet bells keep ringing for generations.

Q27.b **An educational trip to Mahabalipuram Travel plan**

Destination: Mahabalipuram, about 55 km from Chennai

Transport: College bus via East Coast Road, leaving 7:00 AM and returning by 6:00 PM

Arrangements: Principal's permission, accompanying faculty, official guide, entry tickets, first-aid kit

Schedule: Shore Temple, Pancha Rathas, Arjuna's Penance, lunch, sculpture street Descriptive feature

(Word count: 250)

Our department organised an educational trip to Mahabalipuram, a UNESCO World Heritage Site about 55 km from Chennai. The visit aimed to help us understand the history and culture of Tamil Nadu through first-hand observation. We left the college by bus at 7 a.m. and reached the ancient Pallava port town in ninety minutes along the scenic East Coast Road. Our first stop was the Shore Temple, an eighth-century granite structure standing proudly against the sea breeze. Next we visited the Pancha Rathas, five monolithic chariots carved from single rocks, and Arjuna's Penance, a giant relief narrating mythological scenes. Krishna's Butter Ball, a massive boulder balanced on a slope, amazed everyone. Our guide explained Dravidian architecture and the maritime trade between the Pallavas and Southeast Asia. For lunch, we enjoyed local food: fresh seafood, sambar rice, curd rice and crispy vadai at a beachside restaurant, followed by filter coffee. The simple, flavourful meals showed us how closely cuisine is tied to coastal culture. Observing the region, we noticed that stone carving is still a living tradition. Local sculptors chisel idols using techniques passed down through generations. The residents were warm and proud of their heritage, and the annual Mamallapuram Dance Festival shows how the culture is celebrated. We returned by 6 p.m., tired but enriched. Everyone carried home notes, photographs and memories. The trip taught us that history is best learned by standing in front of it, and it deepened our respect for the artisans who created this timeless legacy.

(a) ***The technician wears safety gloves. He wants to protect his hands.*** rightarrow
Answer:The technician wears safety gloves to protect his hands.

(b) ***The cooling fan operates continuously. It prevents the motor from overheating.*** Answer:The cooling fan operates continuously to prevent the motor from overheating

9. ***Fill in the blanks with the correct adverbial forms of the bracketed words:***

a) The machine operates efficiently.(efficient) to reduce energy consumption.

(b) The technician checked the electrical connections carefully (careful) before starting the machine.

10. ***Insert suitable modal auxiliary verbs to match the specified functional meaning:***

(a) The robotic arm can (capability) lift heavy components with precision.

(b) Visitors must not (strict prohibition) enter the testing area without authorization.

PART - C(5X13=65Marks)

Answer all questions (Choose either 'a' or 'b' where options are provided). Each question carries 13 marks.

Question 26

26. a) Write a set of eight clear, imperative safety instructions to promote safe and responsible use of the internet and protect users from cyber threats. ***(13 Marks)***

o ***Workspace / Planning Area:***

1. Create strong, unique passwords for every account, and never reuse them.
2. Enable two-factor authentication on all important accounts.
3. Do not click suspicious links or open attachments from unknown senders.
4. Keep your operating system, browser and antivirus software updated.
5. Never share passwords, OTPs or bank details with anyone online
6. Avoid public Wi-Fi for banking, or use a trusted VPN.
7. Download apps and files only from official stores and verified we
8. Report cyberbullying, scams and fraud immediately to the cyber crime helpline (1930) or cybercrime.gov.in.

Question 27 (Choose either 27.a or 27.b)

27. a) Write a descriptive essay of 250 words about "A Traditional art form in your region and how modern initiatives can preserve its cultural significance." Discuss its historical origins, traditional practices, and ways to promote and sustain it among younger generations. ***(13 Marks)***

OR

27. b) Write a structured travel plan and descriptive feature (250 words) on "An Educational Trip to a Place of Historical and Cultural Importance." Include travel arrangements, important landmarks, local food experiences, and observations of the region's cultural heritage and traditions. ***(13 Marks)***

28. b) Draft a formal Letter of Request to the Principal of your college seeking permission to participate in a technical workshop on Artificial Intelligence and Emerging Technologies organised by a reputed institution. Mention the objectives of participation, the expected learning outcomes, and the arrangements required. ***(13 Marks)***

Subject: Request for permission to attend a technical workshop on Artificial Intelligence and Emerging Technologies

Respected Sir/Madam,

I am a first-year student of [Department]. I request your permission to participate in a technical workshop on "Artificial Intelligence and Emerging Technologies", organised by [Name of Institution] on [date] at [venue].

Objectives: To gain practical knowledge of AI tools and concepts, learn about emerging technologies from industry experts, and strengthen my technical skills for future projects.

Expected learning outcomes: I expect to understand the basics of machine learning, gain hands-on experience and earn a participation certificate. I will also share what I learn with my classmates.

Arrangements required:

1. Permission for absence from classes on the workshop days, with a commitment to cover the missed portions.
2. A bonafide certificate for registration.
3. Permission to travel to the venue at my own expense.

I will follow the rules of both institutions. I shall be grateful if you grant my request.

Thanking you,

Yours obediently,
Gokul.B Roll No. 26CS1236

Question 29 (Choose either 29.a or 29.b)

29. a) Compose an analytical essay (250–300 words) comparing the advantages and disadvantages of Artificial Intelligence–Based Assessment versus Traditional Teacher-Based Assessment in engineering education. Evaluate assessment accuracy, feedback time, fairness, and the role of human judgement. ***(13 Marks)***

OR

29. b) Write a compare-and-contrast essay of 250–300 words analysing the advantages and disadvantages of Living in Urban Areas versus Rural Areas. Discuss employment opportunities, cost of living, access to education and healthcare, and quality of life. ***(13 Marks)***

Q29.a AI-based vs teacher-based assessment in engineering education

Matrix: Accuracy, feedback time, fairness and human judgement, compared for AI and teachers.

Word count: 266

Assessment is central to engineering education, and the rise of Artificial Intelligence has sparked a debate between AI-based and traditional teacher-based evaluation. On accuracy, AI grades objective answers, code and numerical problems consistently and without fatigue. Teachers, however, interpret creative or partially correct solutions better, where an algorithm may miss the student's intent. Feedback time is AI's greatest strength: students receive results and suggestions within seconds, while manual evaluation of large classes can take weeks and delay improvement

Fairness is a mixed issue. An AI tool is free from mood, favouritism and tiredness, so every script is judged by the same rules. However, it may carry bias from its training data and can penalise unusual but valid answers. Teachers may be subjective, but they can consider effort, context and progress. Human judgement remains irreplaceable. Teachers evaluate originality, ethical reasoning, teamwork and communication, qualities engineers need but machines cannot fully measure. They also provide motivation and personal mentoring. AI, on the other hand, offers analytics that reveal learning gaps across a whole class. AI assessment also has disadvantages, including high setup cost, technical failures, data privacy risks and over-dependence on technology. Traditional assessment is slow and inconsistent for large groups, yet it builds a personal bond between teacher and student. In conclusion, neither method is perfect alone. The best approach is a blended model in which AI handles routine, objective evaluation and instant feedback, while teachers assess creativity, reasoning and character. Such cooperation will make assessment faster, fairer and more meaningful. In engineering education, where skills and problem-solving matter most, this balance is especially valuable for students.

Q29.b Living in urban areas vs rural areas

Matrix: Employment, cost of living, education and healthcare, and quality of life, compared for urban and rural **Word count:** 275

Choosing between city and village life is a decision many young engineers face, as both have clear benefits and drawbacks. Employment: Urban areas offer a wide range of jobs in IT, manufacturing, finance and services, with higher salaries and career growth. Cities also host internships, startups and industry networking that help fresh graduates. Rural areas depend mainly on agriculture and small industries, so opportunities are limited and many young people migrate. Cost of living: Cities are expensive; rent, transport, food and utilities consume a large share of income. However, higher salaries in cities do not always translate into higher savings. Villages are cheaper, with lower housing costs and fresh local food, although earnings are also lower. Education and healthcare: Cities have reputed colleges, coaching centres, specialist hospitals and advanced diagnostic facilities. Urban children also enjoy wider exposure to libraries, laboratories and extracurricular activities. Rural areas often lack good schools, higher education institutions and hospitals, so people travel long distances for emergency care. Digital learning and telemedicine are now narrowing this gap. Quality of life: Villages offer clean air, open space, peace and strong community bonds. Rural residents also face fewer transport options and limited entertainment. Cities bring pollution, traffic, noise, overcrowding and stress, but they also provide entertainment, better transport, high-speed internet and modern amenities. Improved roads and internet in villages, together with the spread of remote work, are reducing the difference between the two. To conclude, urban life suits those seeking career growth and facilities, while rural life suits those who value affordability, calm and community. With better infrastructure in villages and better planning in cities, both can offer a good quality of life.

Question 28 (Choose either 28.a or 28.b)

28. a) Write a formal Letter of Request to the Librarian of your college seeking permission to extend library working hours during the semester examination period. Explain the academic benefits, the expected student participation, and the arrangements required to ensure proper use of library facilities. ***(13 Marks)***

The Librarian
St. Joseph's College of Engineering
OMR, Chennai - 119

Subject: Request for extension of library working hours during semester examinations

Respected Madam/Sir,

I am a first-year student of [Department]. I request your kind permission to extend the library's working hours during the upcoming semester examinations.

During examinations, students need a quiet, well-resourced place to study. The library's reference books, previous question papers and journals are not easily available elsewhere, and hostel students find it hard to study in shared rooms. Hours extended until 9:00 PM would allow systematic revision, reduce last-minute stress and improve academic performance.

I expect about 100 to 150 students to use the library daily. To ensure proper use, I suggest that:

1. A staff member be on duty during the extra hours.
2. Entry be allowed only with a valid ID card.
3. Silence and library rules be strictly followed.
4. Lights and fans be arranged in the reading hall.

I assure you of the students' full cooperation. Kindly consider my request.

Thanking you,

Yours faithfully,
Gokul.B (Roll No. 26CS1236

Question 30 (Choose either 30.a or 30.b)

30. a) Draft a personal email to your school friend sharing your experiences during the first semester of your engineering course. Describe your new friendships, classroom activities, adjustment to college life, and expectations for the upcoming semester examinations. ***(13 Marks)***

OR

30. b) Draft a personal email to your school friend describing your experience attending the orientation programme for first-year engineering students at your college. Highlight the activities conducted, the introduction to academic facilities and college regulations, and how the programme helped you understand college life and prepare for your academic journey. ***(13 Marks)***

Q30.b Email about the orientation programee

To:deepak001@gmail.com
Subject: My orientation programme at college

Hi Deepak,

How are you? I want to tell you about the orientation programme for first-year students at my college. It was a wonderful start. The programme began with a welcome address by the Principal, followed by icebreaking games and group activities that helped us meet our classmates. Seniors shared their experiences and gave useful advice about studies and campus life. We were then taken on a tour of the library, laboratories, workshops, sports ground and canteen. The faculty explained the college rules, including attendance requirements, the dress code and the examination system. The programme helped me understand college life and removed much of my nervousness. I now feel prepared and motivated for my academic journey. Please write back and tell me about your college too. Hoping to meet you soon!

Best wishes,
Deepak

Q30.a Email about the first semester

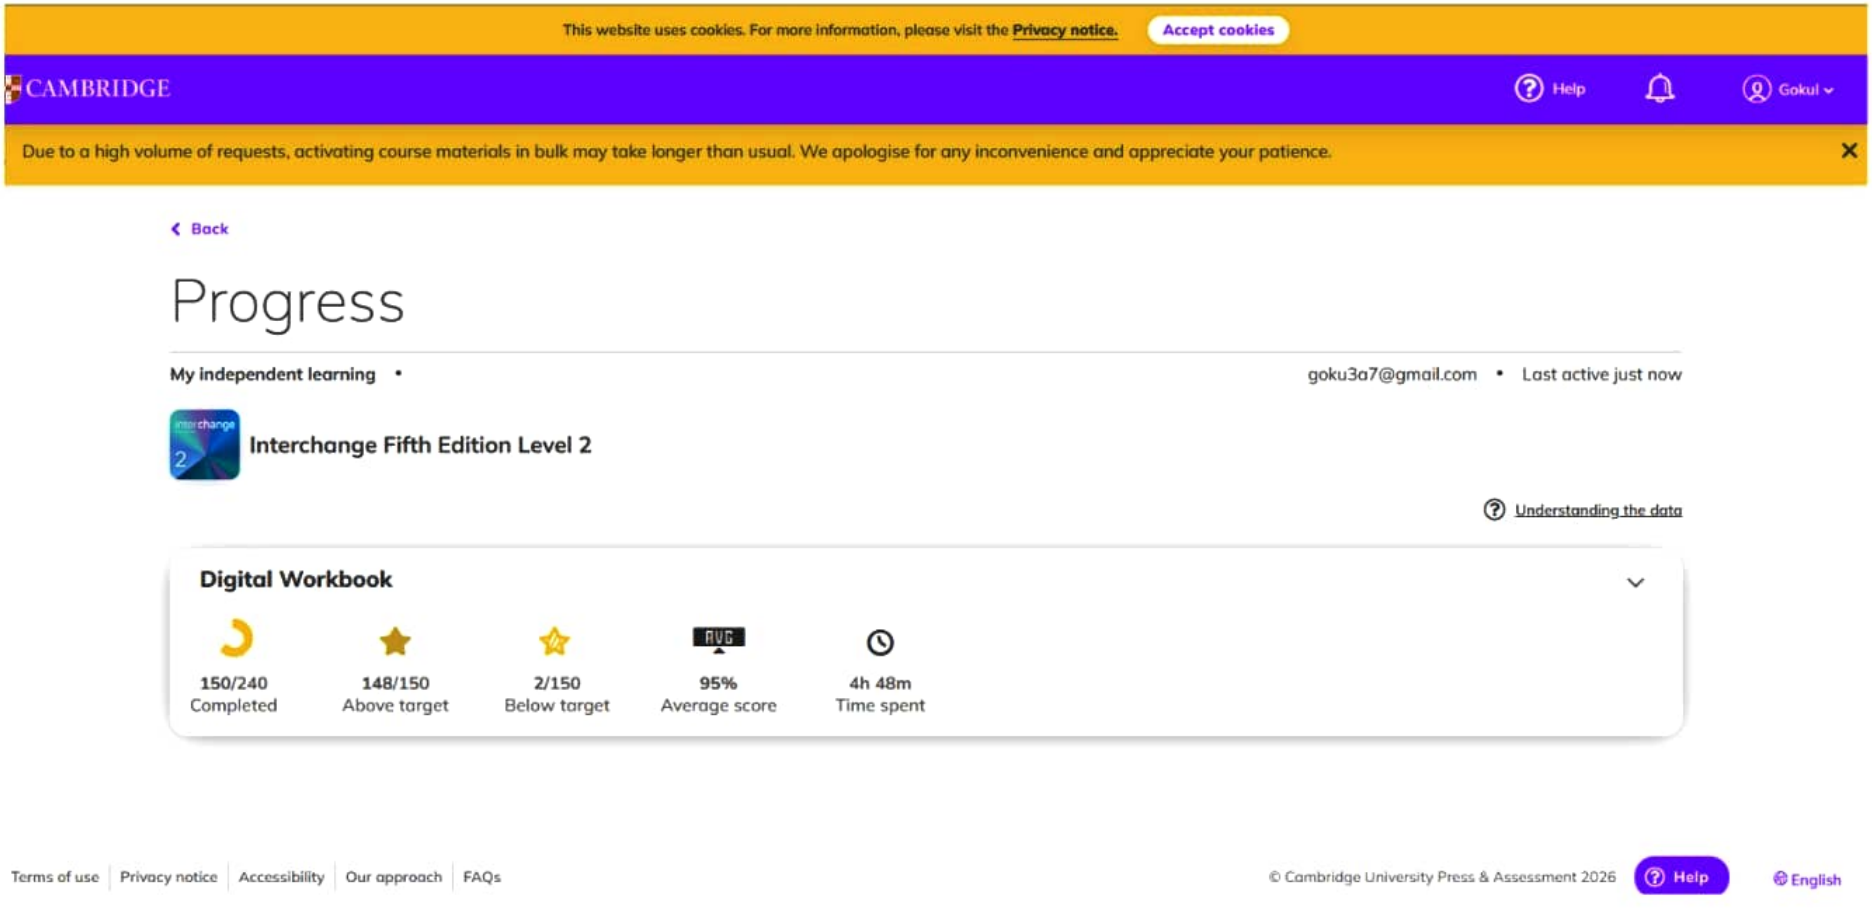

To:deepak001@gmail.com
Subject: My first semester in engineering

Hi,Deepak

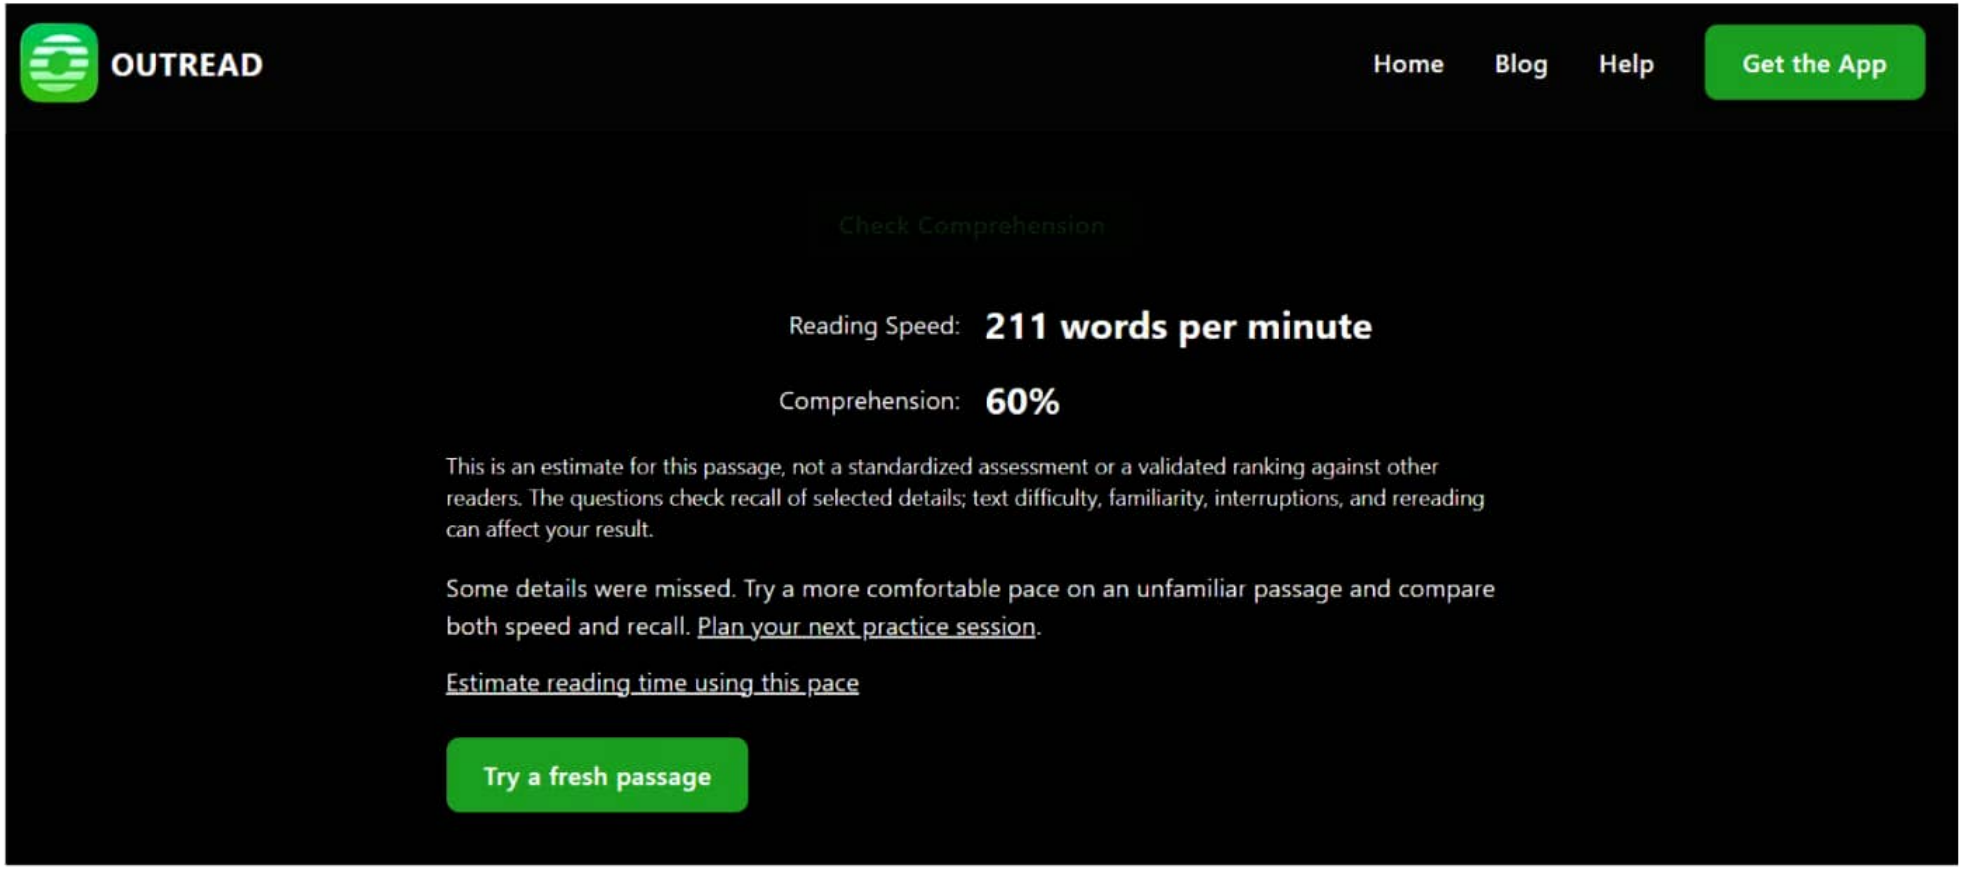

I hope you are doing well! I wanted to tell you about my first semester. College felt strange at first, but I have made great friends. My roommate and classmates have become like family, and we study and have fun together. In class, we have lab sessions, group presentations and coding practice, which are very different from school. I enjoy the hands-on experiments the most. Adjusting to hostel life took time, especially managing my schedule and daily chores, but I now feel more independent and disciplined. The workload is heavier, so I have learnt to plan my time and make notes regularly. The semester examinations are coming up. I am a little nervous but confident, as I revise daily and do group study. How is your college going? Do write back and tell me everything. Let's meet during the holidays!

Take care,
Gokul
